Stromsdorfer, 2012-12-06 Peter T Chinloy and Ernst W Stromsdorfer I Background to Adjustments in Labor Markets The book examines the process of adjustment in labor markets across countries arising from external shocks and shifts in international competitiveness The examination of specific countries and their data permits a comparison of alternative institutions for compensating and redeploying labor Four countries are involved whose labor markets are both competitive and complementary Canada Japan Mexico and the United States Both public labor market institutions such as direct government

compensation of displaced workers and the effect of unemployment insurance and private market arrangements such as employer employee agreements on layoffs the work contract and severance pay are considered Comparative examination across countries of labor market and related institutions is thus possible The book has a common theme namely the adjustment of labor markets to exogenous shocks particularly those externally induced The unifying focus is on workers whose specific skills in an industry or firm render them relatively immobile *Geographical Labor Market Imbalances* Chiara

this book I increasingly became aware of the extent to which much of the finest social science research has been devoted to the issue of unemployment Unemployment rightly is a key issue in the social sciences for search of social and political answers to the economic social and psychological distress caused by uncertainty and macroeconomic change I was glad to find my own worries shared by eminent and respected scholars George Akerlof once confessed to pursue the study of unemployment ultimately because of his father's distress from fear of unemployment and Wout Ultee started research on unemployment from the consideration that parents talk about unemployment risks should not come to dominate marriage parties or other family occasions The problem of unemployment is thus hardly confined to actual loss of income but one where economic insecurity begins to undermine the very fabric of society In consequence to combat unemployment should indeed be a foremost issue in societies striving for freedom and justice for their citizenry yet to succeed obviously requires an

understanding of the underlying economic realities If this study could contribute to this endeavor all the time spent in writing would seem well spent indeed Against the significant body of existing social science research on unemployment it seems appropriate to be clear about the scope and limitations of the current study however
