First Cut A Season In The Anatomy Lab:

First Cut Albert Howard Carter III, 2025-09-23 With humor compassion and wisdom Howard Carter recounts the semester he spent watching first year medical students in a human anatomy lab From the tentative early incisions of the back the symbolic weight of extracting the heart and by the end the curious mappings of the brain we embark on a path that is at once frightening awesome and finally redemptive

Speaking for the Dead D. Gareth Jones, Maja I. Whitaker, 2016-04-01 Speaking for the Dead is an incisive examination of the highly topical and often controversial issues surrounding the use of human cadavers in scientific research Fully revised and updated to include recent developments in this area this new edition incorporates the repeated organ scandals in the UK body parts scandals in the United States and the abuses of bodies in China The book provides new material on neuroimaging neuroethics and Alzheimer's disease and the major ethical issues they raise for society in addition to discussing plastination in the form of BodyWorlds types of exhibitions As human anatomists and bioethicists the authors offer a unique perspective on these issues crossing the boundaries between clinical medical legal and ethical concerns Their exploration of both historical and contemporary data results in a clear and comprehensive examination of issues at the forefront of bioethics With its clear writing style and use of non technical language Speaking for the Dead will be an essential book for all those interested in bioethics an area which continues to increase in significance with the development of new techniques for the manipulation of human cadavers As human anatomists and bioethicists the authors offer a unique perspective on these issues crossing the boundaries between clinical medical legal and ethical concerns Their exploration of historical developments as well as their analyses of recent case studies result in a pertinent and comprehensive examination of issues at the forefront of bioethics

After We Die Norman L. Cantor, 2010-11-11 What will become of our earthly remains What happens to our bodies during and after the various forms of cadaver disposal available Who controls the fate of human remains What legal and moral constraints apply Legal scholar Norman Cantor provides a graphic informative and entertaining exploration of these questions After We Die chronicles not only a corpse's physical state but also its legal and moral status including what rights if any the corpse possesses In a claim sure to be controversial Cantor argues that a corpse maintains a quasi human status granting it certain protected rights both legal and moral One of a corpse's purported rights is to have its predecessor's disposal choices upheld After We Die reviews unconventional ways in which a person can extend a personal legacy via their corpse's role in medical education scientific research or tissue transplantation This underlines the importance of leaving instructions directing post mortem disposal Another cadaveric right is to be treated with respect and dignity After We Die outlines the limits that post mortem human dignity poses upon disposal options particularly the use of a cadaver or its parts in educational or artistic displays Contemporary illustrations of these complex issues abound In 2007 the well publicized death of Anna Nicole Smith highlighted the passions and disputes surrounding the handling of human remains Similarly following the 2003 death of

baseball great Ted Williams the family in fighting and legal proceedings surrounding the corpse s proposed cryogenic disposal also raised contentious questions about the physical legal and ethical issues that emerge after we die In the tradition of Sherwin Nuland s *How We Die* Cantor carefully and sensitively addresses the post mortem handling of human remains

The Violence of Care Sameena Mulla, 2023-11-21 Winner 2017 Margaret Mead Award presented by the American Anthropological Association and the Society for Applied Anthropology Honorable Mention 2015 Eileen Basker Memorial Prize presented by the Society for Medical Anthropology Analyzes the ways in which nurses work to collect and preserve evidence while addressing the needs of sexual assault victims as patients Every year in the US thousands of women and hundreds of men participate in sexual assault forensic examinations Drawing on four years of participatory research in a Baltimore emergency room Sameena Mulla reveals the realities of sexual assault response in the forensic age Taking an approach developed at the intersection of medical and legal anthropology she analyzes the ways in which nurses work to collect and preserve evidence while addressing the needs of sexual assault victims as patients Mulla argues that blending the work of care and forensic investigation into a single intervention shapes how victims of violence understand their own suffering recovery and access to justice in short what it means to be a victim As nurses race the clock to preserve biological evidence institutional practices technologies and even state requirements for documentation undermine the way in which they are able to offer psychological and physical care Yet most of the evidence they collect never reaches the courtroom and does little to increase the number of guilty verdicts Mulla illustrates the violence of care with painstaking detail illuminating why victims continue to experience what many call secondary rape during forensic intervention even as forensic nursing is increasingly professionalized Revictimization can occur even at the hands of conscientious nurses simply because they are governed by institutional requirements that shape their practices *The Violence of Care* challenges the uncritical adoption of forensic practice in sexual assault intervention and post rape care showing how forensic intervention profoundly impacts the experiences of violence justice healing and recovery for victims of rape and sexual assault

The Great Dead Body Teachers Jackie Dent, 2023-03-08 LONGLISTED FOR THE MARK EVETTE MORAN NIB LITERARY AWARD LONGLISTED FOR THE WALKLEY BOOK AWARD Donating our bodies for dissection to assist in teaching the next generation of doctors gives a worthwhile perspective on the altruism that in retrospect defines some among us including Dent s grandparents *The Great Dead Body Teachers* entertains educates and generates much that is worthy of contemplation *The Journal of Law and Medicine* Since I was a child I ve been interested in dead bodies When I was eight years old I dug up the remains of my pet budgie Zazbut He had been buried for about eight weeks in a patch of grass outside our house in Dasmarinas a fortified village in Manila in the Philippines The first exhumation was the beginning of my intrigue with death which has persisted As a journalist I ve written about graveyards funerals and death doulas I always visit the local cemetery wherever I am in the world But one thing that has largely been hidden from me in this death trip is the dead body Dissection might not be a

normal topic to contemplate but when both your paternal grandparents donate their bodies to science it does intermittently cross your mind This is the story of how Jackie Dent s grandparents Ruby and Julie gave their bodies to science when they died No one in her family seems to know why or what really happened with their bodies afterwards Were they avid science buffs Was it to save on cremation costs How do scientists tackle the practicalities and ethics of cutting up the dead for research And who are body donors generally Weaving the personal with the history of anatomy and the dissected Jackie Dent explores the world of whole body donation all the while looking for answers as to what happened to her grandparents

"Something Urgent I Have to Say to You" Herbert Leibowitz,2024-05-01 Herbert Leibowitz s *Something Urgent I Have to Say to You* provides a new perspective on the life and poetry of the doctor poet William Carlos Williams a key American writer who led one of the more eventful literary lives of the twentieth century Friends with most of the contemporary innovators of his era Ezra Pound James Joyce Ford Madox Ford and Louis Zukofsky among others Williams made a radical break with the modernist tradition by seeking to invent an entirely fresh and singularly American poetic whose subject matter derived from the everyday lives of the citizens and poor immigrant communities of northern New Jersey His poems mirrored both the conflicts of his own life and the convulsions that afflicted American society two world wars a rampaging flu pandemic and the Great Depression Leibowitz s biography offers a compelling description of the work that inspired a seminal controversial movement in American verse as well as a rounded portrait of a complicated man pugnacious and kindly ambitious and insecure self critical and imaginative *Something Urgent I Have to Say to You* is both a long overdue assessment of a major American writer and an entertaining examination of the twentieth century avant garde art and poetry scene with its memorable cast of eccentric pioneers including Marcel Duchamp Man Ray Marianne Moore and Gertrude Stein

Digging for the Disappeared Adam Rosenblatt,2015-04-01 The mass graves from our long human history of genocide massacres and violent conflict form an underground map of atrocity that stretches across the planet s surface In the past few decades due to rapidly developing technologies and a powerful global human rights movement the scientific study of those graves has become a standard facet of post conflict international assistance *Digging for the Disappeared* provides readers with a window into this growing but little understood form of human rights work including the dangers and sometimes unexpected complications that arise as evidence is gathered and the dead are named Adam Rosenblatt examines the ethical political and historical foundations of the rapidly growing field of forensic investigation from the graves of the disappeared in Latin America to genocides in Rwanda and the former Yugoslavia to post Saddam Hussein Iraq In the process he illustrates how forensic teams strive to balance the needs of war crimes tribunals transitional governments and the families of the missing in post conflict nations *Digging for the Disappeared* draws on interviews with key players in the field to present a new way to analyze and value the work forensic experts do at mass graves shifting the discussion from an exclusive focus on the rights of the living to a rigorous analysis of the care of the dead Rosenblatt tackles these heady hard

topics in order to extend human rights scholarship into the realm of the dead and the limited but powerful forms of repair available for victims of atrocity **Medical Humanities Review** ,1998 **The American Biology Teacher** ,2000

FLYING FRENCH FRIES Rowena Shaw, PhD,2012-08-01 Dr Rowena Shaw was born in the picturesque Philippine Islands As a young child of ten she contracted polio Overnight she was flung into the bleak world of paralysis and the subsequent painful and arduous rehabilitation process to regain mobility In her early twenties a two month leisure trip to the U S to visit family members was unexpectedly transformed to permanent residency as a result of a chance meeting with her future husband at her aunt s home Graduate degrees in School Psychology and Educational Administration from the state university enriched over a thirty year career as counselor and school psychologist at an elementary and middle school in the United States Decades of professional relationships afforded Dr Shaw a plethora of experiences and stories about colleagues students and parents an amalgamation of woeful and amusing tales Recollections and musings on family life aging travel friendships marriage and raising children entertain readers with LOL detours *Body of Knowledge* Steven Giegerich,2001-09-09 A fascinating exploration of the medical student s most decisive course gross anatomy and of the intellectual emotional and spiritual transformation that turns young men and women into doctors Medical Gross and Developmental Anatomy is a course every medical student dreads As one future physician told the author Steve Giegerich passing the notoriously difficult course is paying your dues for medicine It s the bridge you have to cross if you want to become a doctor More students leave medical school during this course than any other Now Body of Knowledge puts readers in the classroom as potential doctors come face to face with their first human cadaver and dissects the factors that determine whether they succeed or fail In January 1999 181 students at the University of Medicine and Dentistry Newark began a course in gross anatomy Among them were Sherry Ikalowych a former nurse and mother of four Jennifer Hannum an ultracompetitive jock Udele Tagoe a determined Duke graduate of Ghanian descent and Ivan Gonzalez a Nicaraguan refugee and unlikely medical student For these four lab partners Tom Lewis the cadaver lying on the stainless steel table remains anonymous during dissection but for the reader Lewis springs to life As the students grapple with love hate power and awe Giegerich explores Lewis s life and his generous decision to donate his body to science Ultimately as the students gain reverence for medicine they too develop gratitude for Lewis s thoughtful gift Addis Ababa Steve Kasper,2013-06-14 Isaac Porter M D lost his wife on 9 11 Struggling to move on after so many years he joins the State Department as a Regional Medical Officer RMO to get away and start over in a foreign land His journey to Addis Ababa the capital of Ethiopia is rocked from the beginning by tragedy and death Who is behind the plot Vengeful Terrorists Russian Spies Ethiopians Someone at the Embassy Dr Porter must solve the case before he is recalled to Washington or becomes the next victim Love truth hate fiction revenge order redemption and chaos stalk him as he tries to find out what happened **The Vanishing Surgeons** Graham Lister,2005-11-21 The Vanishing Surgeons takes the reader into Glasgow Royal Infirmary in Scotland during the

nineteen fifties The Royal is two hundred years old with a proud history including the first use of antiseptic surgery and the establishment of the first school of nursing the discipline of which is still apparent But all is not well in this proud and disciplined hospital A surgeon disappears without trace and then another When they are finally found it is in the least likely of locations How did it happen Was it an accident Or was a young and ambitious surgical intern responsible [Chain Gang](#)
