First Steps Toward Economic Independence New States Of The Postcommunist World:

Hungary on the Road to the European Union László Andor, 2000-04-30 In November 1997 Hungarians voted in favor of membership in NATO primarily as a step toward membership in the European Union and integration into Western society Andor examines the changes in Hungarian social political and economic life after the collapse of communism in Central Europe He analyzes the difficulties both internal and external to making that transition In the early 1990s public discourse was dominated by the enthusiastic slogans proclaiming Hungary's return to Europe Things can only get better was the prevailing feeling surrounding the dismantling of the state socialist system and the construction of the new parliamentary democracy From the very early years of transition however Hungarians faced large scale and unexpected hardships in their changing lives which made them the most disappointed nation in Eastern Europe by 1993 In the second half of the 1990s the policies of the Socialist Liberal coalition and particularly the positive developments in the enlargement process of NATO and the EU restored the belief in a rapid and successful accession to the major Western economic and security organizations But as Andor indicates the beginnings of negotiations about entry into NATO and EU will be merely the starting point of difficulties arising in both economics and politics A thoughtful and cautious look at a changing Hungary that will be of interest to scholars researchers and policymakers involved with Central Europe and contemporary European politics and economics

Pathways After Empire Andrei P. Tsygankov, 2001 In a revision of his doctoral dissertation for the University of Southern California Tsygankov international relations and political science San Francisco State U analyzes the foreign economic policies of successor states of the Soviet Union besides Russia He finds that some have looked toward Russia and others away and that the determining factor is the strength of the national identity of the new states Annotation copyrighted by Book News Inc Portland OR

War and Ethnicity David Turton, 2002 Includes statistics **Global Finance, Local Control** Igor O. Logvinenko, 2021-10-15 Exploring Russia's reentry into global capital markets at the dawn of the twenty first century Global Finance Local Control shows how economic integration became deeply entangled with a bare knuckled struggle for control over the vestiges of the Soviet empire Igor Logvinenko reveals how the post communist Russian economy became a full fledged participant in the international financial sector without significantly improving the local rule of law By the end of Vladimir Putin's second presidential term Russia was more integrated into the global financial system than at any point in the past However the country's longstanding deficiencies including widespread corruption administration of justice and an increasingly overbearing state continued unabated Scrutinizing stock market restrictions on foreign ownership during the first fifteen years of Russia's economic transition Logvinenko concludes that financial internationalization allowed local elites to raise capital from foreign investors while maintaining control over local assets They legitimized their wealth using Western institutions but they did so on their terms Global Finance Local Control delivers a somber lesson about the integration of emerging markets without strong domestic rule of law protections financial internationalization entrenches

oligarchic capitalism and strengthens authoritarian regimes

Problems of Economic and Political Transformation in the Balkans Ian Jeffries, 1996 Provides an assessment of the problems of transformation in the Balkan countries covering topics on both politics and economics The book gives an overview of the problems of transition and also country specific coverage including Albania Bulgaria Romania and the former Yugoslavia

National Integration and Violent Conflict in Post-Soviet Societies Pål Kolstø, 2002 The theory presented in this work s predecessor Nation Building and Ethnic Integration in Post Soviet Societies An Investigation of Latvia and Kazakhstan 1999 fails to explain why the Dniester war of 1992 broke out in Moldova while Estonia remained free of large scale violence Kolsto Russian and East European area studies U of Oslo Norway presents six contributions that revisit the question of when ethnic strife is likely to break out after the removal of authoritarian government After reviewing candidates for explanatory theories four country studies explore the evidence and one contribution discusses the international setting The final chapter compares theory to evidence and concludes that theories of resources and opportunities available to various groups are better predictors of violence than theories of grievances and relative discriminations Annotation copyrighted by Book News Inc Portland OR

National Purpose in the World Economy Rawi Abdelal, 2018-08-06 How do national identities affect the world economy Building on the insight that nationalisms and national identities endow economic policy with social purpose Rawi Abdelal proposes a novel theoretical framework a distinctively Nationalist perspective on international political economy to answer this question Using this framework and drawing on field research in Lithuania Ukraine and Belarus he provides an in depth look at the link between national identity and the economic policies of the new states formed by the breakup of the Soviet Union All these states from the Baltic coast to central Asia were economically dependent on Russia during the 1990s However they reacted very differently to that dependence and their reactions can be traced Abdelal contends to their individual societies Some such as Belarus found dependence inevitable and sought economic reintegration with Russia Others like Lithuania interpreted dependence as a large scale security threat and reoriented their economies away from Russia A third group typified by Ukraine demonstrated no coherent economic policy at all regarding dependence Abdelal distinguishes the Nationalist tradition in international political economy from the Realist tradition and shows that economic nationalism is different than mercantilism He demonstrates the ways that national identity affects economic policy and explains why some governments seek economic autonomy while others prefer regional reintegration He then applies his approach to other cases of economic reorganization after the end of empire eastern Europe in the 1920s after the Habsburgs 1950s Indonesia and French West Africa in the 1960s

BOOK JACKET The Bulgarian Economy Derek C Jones, Jeffrey Miller, 2019-01-22 First published in 1997 this volume examines how Bulgaria has been an early starter but a slow and often erratic mover in the path of stabilization and systemic transition This book provides a most useful account of the development to date and of the costs associated with Bulgarian strategy or lack of empirical analysis and theoretical reflections especially in comparison with other transition economies It will be of great interest to any scholar official or businessman involved not only with Bulgaria but more generally with post communist countries **From Ethnic Conflict to Stillborn Reform** Shale Asher Horowitz, 2005 Author Shale Horowitz employs both statistical evidence and historical case studies of the eight new nations to determine that ethnic conflict entangles distracts and destabilizes reformist democratic governments while making it easier for authoritarian leaders to seize and consolidate power As expected economic backwardness worsens these tendencies but Horowitz finds that powerful reform minded nationalist ideologies can function as antidotes The comprehensiveness of the treatment use of both qualitative and quantitative analysis and focus on standard concepts from comparative politics make this book an excellent tool for classroom use as well as a ground breaking analysis for scholars BOOK JACKET **Hot Coal, Cold Steel** Stephen Crowley, 2010-06-04 Well after the disintegration of the Communist Party and the Soviet state and through several years of economic collapse industrial workers in almost every sector of the former Soviet Union have remained quiescent and the same ineffective and unpopular trade unions still hold a virtual monopoly on worker s representation Why While many argue that labor is a central variable in the development of economic and political systems little is known about workers in the states of the former Soviet Union since the fall of Communism In a comparative study of two groups of industrial workers the coal miners and steelworkers at the end of the Soviet era Stephen Crowley sheds light on where these workers have been and where they are going Coal miners in the final years of the Soviet Union effectively organized and led strikes which supported the end of Communism even though their heavy subsidies would be threatened by capitalism Steel workers in contrast did not effectively organize and strike This pattern has continued under the new governments with the coal miners effectively organized and seeking protection from the worst consequences of marketization while the steel workers remain weakly organized despite deteriorating economic conditions Based on extensive on site research including interviews with miners and steelworkers labor leaders and plant managers Crowley develops a detailed picture of the conditions under which workers organize His findings have application beyond the conditions of post Communist Russia and Ukraine to other societies undergoing fundamental change This book will be of interest to sociologists and political scientists interested in the role of labor in transitional societies the patterns of organization of labor as well as area specialists Stephen Crowley is Associate Professor of Political Science Oberlin College Bulgaria In Transition John D. Bell, 2019-05-20 Since the forced resignation of Todor Zhivkov in November of 1989 Bulgaria s transition to democracy has been marked by good beginnings ending in frustration or disappointment It has avoided the violent ethnic confrontations that have characterized much of the

post Communist Balkans but has also seen the development of an influential criminal
 Nations Library (Geneva, Switzerland),1997 **Monthly Bibliography** United Nations Library (Geneva, Switzerland),1997 *Monetary Orders* Jonathan Kirshner,2018-08-06 Wherever there is money there is money politics a subject demanding ever greater attention at a time when monetary policies lead and the real economy follows A principal defining characteristic of the contemporary global economy Jonathan Kirshner contends is the rise and preeminence of monetary phenomena international financial crises Central Bank Independence and inflation fighting the creation of the euro and monetary reform in emerging economies to name only a few Moreover unlike most debates in political economy such as those regarding trade policy which are generally recognized as political monetary phenomena and macroeconomic policies are typically represented as expressly apolitical In *Monetary Orders* a distinguished group of scholars explores the inescapable political origins of choices about money The essays in *Monetary Orders* each address a specific issue or puzzle relating to money and its management Their authors focus on markedly disparate cases but share a common observation for most policy choices about money market forces and economic logic can rule out certain options but are indeterminate in explaining why one policy rather than another will be chosen Ultimately political factors are essential to explain fundamental and consequential choices about money **Post-Soviet Geography and Economics** ,1999

Forthcoming Books Rose Arny,1996-06 *Canadian Slavonic Papers* ,1997 **Structural Origins of Post-Yugoslav Regimes** Valentina Petrović,2024-09-16 This analysis of the Yugoslav democratisation process explains the variation of regime outcomes within a structuralist framework Focusing on the post socialist world it goes beyond ethnicity and elite agency to bring the role of class and the state into discussions of third wave democracies Offering an in depth study of four post Yugoslav cases and relying on extensive field work it examines how civil society state structures and elite agency influence the trajectories of Croatia North Macedonia Serbia and Slovenia after the end of socialism The analysis also considers the impact of the European Union on domestic conditions The author argues that no single factor explains the occurrence of democracy It is instead the result of the combination of an autonomous civil society a non captured state and ruling elites willing to implement democratic reforms Concomitant with this the analysis provides evidence that the only sufficient condition for the occurrence of democracy is non captured state structures State capacity therefore plays a central role in democratisation This book will be of interest to scholars and students of Eastern Europe Southeastern Europe the EU and democratisation as well as to policymakers and nongovernmental organisations **The Journal of Developing Areas** ,1995 *The Oxford Handbook of Local and Regional Democracy in Europe* John Loughlin, Frank Hendriks, Anders Lidström,2012-11-08 *The Oxford Handbook of Local and Regional Democracy in Europe* analyses the state of play of democracy at the subnational level in the 27 member states of the EU plus Norway and Switzerland It places subnational democracy in the context of the distinctive Anglo the French the German and Scandinavian state traditions in Europe asking to what extent these are still relevant today The Handbook adapts Lijphart s theory of democracy and applies it to the

subnational levels in all the country chapters A key theoretical issue is whether subnational regional and local democracy is derived from national democracy or whether it is legitimate in its own right Besides these theoretical concerns it focuses on the practice of democracy the roles of political parties and interest groups and also how subnational political institutions relate to the ordinary citizen This can take the form of local referendums or other mechanisms of participation The Handbook reveals a wide variety of practices across Europe in this regard Local financial systems also reveal a great variety Finally each chapter examines the challenges facing subnational democracy but also the opportunities available to them to enhance their democratic systems Among the challenges identified are Europeanization globalization but also citizens disaffection and switch off from politics Some countries have confronted these challenges more successfully than others but all countries face them An important aspect of the Handbook is the inclusion of all the countries of East and Central Europe plus Cyprus and Malta who joined the EU in 2004 and 2007 This is the first time they have been examined alongside the countries of Western Europe from the angle of subnational democracy
