Cognitive Linguistics: Basic Readings Dirk Geeraerts, 2008-08-22 Over the past decade Cognitive Linguistics has grown to be one of the most broadly appealing and dynamic frameworks for the study of natural language. Essentially this new school of linguistics focuses on the meaning side of language linguistic form is analysed as an expression of meaning. And meaning itself is not something that exists in isolation but it is integrated with the full spectrum of human experience the fact that we are embodied beings just as much as the fact that we are cultural beings. Cognitive Linguistics Basic Readings brings together twelve foundational articles each of which introduces one of the basic concepts of Cognitive Linguistics like conceptual metaphor image schemas mental spaces construction grammar prototypicality and radial sets. The collection features the founding fathers of Cognitive Linguistics George Lakoff Ron Langacker Len Talmy Gilles Fauconnier and Charles Fillmore together with some of the most influential younger scholars. By its choice of seminal papers and leading authors Basic Readings is specifically suited for an introductory course in Cognitive Linguistics. This is further supported by a general introduction to the theory and specifically the practice of Cognitive Linguistics and by trajectories for further reading that start out from the individual chapters.

Usage-Based Approaches to Language Acquisition and Language Teaching Jacqueline Evers-Vermeul, Elena Tribushinina, 2017-03-06 Although usage based approaches have been successfully applied to the study of both first and second language acquisition to monolingual and bilingual development and to naturalistic and instructed settings it is not common to consider these different kinds of acquisition in tandem. The present volume takes an integrative approach and shows that usage based theories provide a much needed unified framework for the study of first second and foreign language acquisition in monolingual and bilingual contexts. The contributions target the acquisition of a

wide range of linguistic phenomena and critically assess the applicability and explanatory power of the usage based paradigm The book also systematically examines a range of cognitive and linguistic factors involved in the process of language development and relates relevant findings to language teaching Finally this volume contributes to the assessment and refinement of empirical methods currently employed in usage based acquisition research This book is of interest to scholars of language acquisition language pedagogy developmental psychology as well as Cognitive Linguistics and Construction Grammar

Pragmatic Development Anat Ninio, 2018-02-12 The pragmatic system consists of the rules for appropriate and communicatively effective language use This book provides an integrated view of the acquisition of the various pragmatic subsystems including expression of communicative intents participation in conversation and production of extended discourse The three components of the pragmatic system are presented in a way that makes clear how they relate to each other and why they all fall under the rubric of pragmatics The authors combine their own extensive work in these three domains with an overview of the field of pragmatic development describing how linguistic pragmatics relates to other aspects of language development to social development and to becoming a member of one's culture

Lev Vygotsky Peter Lloyd, Charles Fernyhough, 1999

The Evolution of Language Out of Pre-language Talmy Givón, Bertram F. Malle, 2002-01-01 The contributors to this volume are linguists psychologists neuroscientists primatologists and anthropologists who share the assumption that language just as mind and brain are products of biological evolution The rise of human language is not viewed as a serendipitous mutation that gave birth to a unique linguistic organ but as a gradual adaptive extension of pre-existing mental capacities and brain structures The contributors carefully study brain mechanisms diachronic change language acquisition and the parallels between cognitive and linguistic structures to weave a web of hypotheses and suggestive empirical findings on the origins of language and the connections of language to other human capacities The chapters discuss brain pathways that support linguistic processing origins of specific linguistic features in temporal and hierarchical structures of the mind the possible co-evolution of language and the reasoning about mental states and the aspects of language learning that may serve as models of evolutionary change

Young Children's Thinking about Biological World Giyoo Hatano, Kayoko Inagaki, 2013-04-15 Presents research on the topic of young children's naive biology examining such theoretical issues as processes conditions and mechanisms in conceptual development using the development of biological understanding as the target case

Becoming a Word Learner Roberta M. Golinkoff, 2000 True to the Counterpoints format each contributor puts forth in the strongest possible terms his or her own theory of language acquisition In the final commentary chapter a lively exchange between competing colleagues develops the debate

Routes to Language, Lexical Polycategoriality Valentina Vapnarsky, Edy Veneziano, 2017-10-15 This book presents a collection of chapters on the nature flexibility and acquisition of lexical categories These long debated issues are looked at anew by exploring the hypothesis of lexical polycategoriality according to which lexical forms are not fully or univocally specified for

lexical category in a wide number of unrelated languages and within different theoretical and methodological perspectives. Twenty languages are thoroughly analyzed. Apart from French, Arabic and Hebrew, the volume includes mostly understudied languages spoken in New Guinea, Australia, New Caledonia, Amazonia, Meso and North America. Resulting from a long standing collaboration between leading international experts, this book brings under one cover new data, analyses and results on word categories from the linguistic and acquisitional point of view. It will be of the utmost interest to researchers, teachers and graduate students in different fields of linguistics: morpho-syntax, semantics, typology, language acquisition as well as psycholinguistics, cognition and anthropology.

Language, Music and Computing Polina Eismont, Olga Mitrenina, Asya Pereltsvaig, 2018-12-30. This book constitutes the proceedings of the First International Workshop on Language, Music and Computing (LMAC 2017) held in St. Petersburg, Russia, in April 2017. The 18 papers presented in this volume were carefully reviewed and selected from 52 submissions. They were organized in topical sections on: the universal grammar of music; the surface of music and singing; language as music; music computing; formalization of the informality.
