First Abolish The Customer 202 Arguments Against Economic Rationalism:

First Abolish the Customer Bob Ellis, 1998-01-01 Economic rationalism at its heart is a refusal to spend money on the unnecessary But what is unnecessary and who decides With eloquence passion wit and humour Bob Ellis explodes the myths of economic rationalism In this incendiary life affirming book he reveals it to be at best little more than an empty fantasy which as a guiding principle has more flaws than a factory second And at worst a self serving and destructive strategy of greed Along the way he demonstrates why the economy of unemployment simply doesn't work why it is better to spend than save why a level playing field won't help and why economic rationalists never practise what they preach With all this and much more *First Abolish the Customer* is a sweeping swashbuckling account of why economic rationalism is not the answer for Australia

Economic Globalisation as Religious War Michael McKinley, 2007-06-28 Using a critical theory approach to analyze the globalization of the world economy this provocative and topical new book presents economic globalization not as a recent development but rather as a familiar process that has occurred throughout history Michael McKinley argues that it is ultimately a self serving arbitrary and destructive imperial project that should be viewed as a religious war

The Memory of Genocide in Tasmania, 1803-2013 Jesse Shipway, 2016-11-02 This book presents a philosophical history of Tasmania's past and present with a particular focus on the double stories of genocide and modernity On the one hand proponents of modernisation have sought to close the past off from the present concealing the demographic disaster behind less demanding historical narratives and politicised preoccupations such as convictism and environmentalism The second story meanwhile is told by anyone aboriginal or European who has gone to the archive and found the genocidal horrors hidden there This volume blends both stories It describes the dual logics of genocide and modernity in Tasmania and suggests that Tasmanians will not become more realistic about the future until they can admit a full recognition of the colonial genocide that destroyed an entire civilisation not much more than 200 years ago

Capturing Globalization James H Mittelman, Norani Othman, 2003-09-02 What are the moral codes and normative principles inscribed in globalization How do diverse communities optimize their positions and try to capture these processes What are the foremost cultural and political attempts to govern the market What are the social and ethical limits to a framework based on deregulation privatization and liberalization These related themes reveal how issues such as religion private capital flows poverty the state and democracy transnational class structures disruptions in culture and new patterns in the use of language are part of the globalization process Empirically the research derives from data from fieldwork within and outside Southeast Asia with a common reference point based on research in Malaysia Following the trauma of the late 1990s with environmental abuses in Southeast Asia transnational turmoil in currency trading and the meltdown of stock markets this book seeks to understand how and to what extent communities can reclaim political and social control over the dynamics of globalization This highly original contribution to the globalization debate will be invaluable to researchers in a number of disciplines including political science anthropology history economics Asian Studies and sociology
