the 1933 RKORadio Pictures production *Flying Down to Rio* to examine the interplay of technology and popular culture that shaped a distinctive twentiethcentury sensibility The musical comedy connected airplanes movies and tourism ending spectacularly with chorus girls dancing on the wings of airplanes high above Rio de Janeiro Brazil The Hollywood fantasy capped three decades during which airplanes and movies engendered new expectations and redefined peoples sense of wellbeing their personal satisfactions and their interpersonal relations Wilbur and Orville Wright flew their airplane in 1903 at the same time that filmmakers began to project edited filmed stories onto large screens Spectators found entertainment value in both airplane competitions and motion pictures and movie producers brought the thrill of aviators antics to a rapidly expanding audience Meanwhile air shows and competitions attracted large crowds of tourists Mass tourism grew as a leisuretime activity stimulated in part by travelogues and feature films By 1930 the businessmen who envisioned transporting tourists to their destinations by airplane struggled to overcome the movieexaggerated association of flight with danger Schwartz weaves these threads into a story of human daring and persistence political intrigue and international competition From Wilbur and Orville to Fred and Ginger Schwartzs narrative follows the fortunes of aviation and movie pioneers and the foundations and growth of Pan American Airways and RKORadio Pictures the two companies that came together in *Flying Down to Rio* By the end of the twentieth century aviation movies and mass tourism had become powerful global industries contributing to an internationally connected entertainmentoriented culture What was once unthinkable had now become expected

STEM for All Ages Seán G.Dwyer,2014-02 The brothers who invented the first successful aircraft were not Orville and Wilbur They were preceded by the Montgolfier brothers 120 years earlier in a type of aircraft still in wide use today 150 years before them the Celebi brothers made the first survivable rocket and intercontinental flights With the goal of providing an interesting learning experience the book s focus is not just on STEM Science Technology Engineering Math Also included is analysis of Cause Effect and a lot of surprising history So it is not just about HOW things work it is also about WHY they happened that way and the consequences Roughly every 500 years new technology completely disrupts society changing borders laws and the way people live and work It happened again with the emergence of the Digital Age Because aviation involves many fields of science it is a particularly interesting way to show how STEM is a continuum of mutually supporting elements Applications of chemistry physics astronomy navigation programming and paradigm paralysis are presented in a hands on understandable way
