Hawting, 1986-01 in Historical Perspective Alexander Knysh, 2016-10-26 Islam in Historical Perspective provides readers with an introduction to Islam Islamic history and societies with carefully selected historical and scriptural evidence that enables them to form a comprehensive and balanced vision of Islam's rise and evolution across the centuries and up to the present day Combining historical and chronological approaches the book examines intellectual dialogues and socio political struggles within the extraordinary rich Islamic tradition Treating Islam as a social and political force the book also addresses Muslim devotional practices artistic creativity and the structures of everyday existence Islam in Historical Perspective is designed to help readers to develop personal empathy for the subject by relating it to their own experiences and burning issues of today It contains a wealth of historical anecdotes and quotations from original sources that are intended to emphasize its principal points in a memorable way This new edition features a thoroughly revised and updated text new illustrations expanded study questions and chapter summaries The Oral and the Written in Early Islam, Power, Patronage, and Memory in Early <u>Islam</u> Alain George, Andrew Marsham, 2018 When the Umayyads the first Islamic dynasty rose to power shortly after the death of the Prophet Muhammad d 632 the polity of which they assumed control had only recently expanded out of Arabia into the Roman eastern Mediterranean Iraq and Iran A century later by the time of their downfall in 750 the last Umayyad caliphs governed the largest empire that the world had seen stretching from Spain in the West to the Indus valley and Central Asia in the East By then their dynasty and the ruling circles around it had articulated with increasing clarity the public face of the new monotheistic religion of Islam created major masterpieces of world art and architecture some of which still stand today and built a state apparatus that was crucial to ensuring the continuity of the Islamic polity Within the vast lands under their control the Umayyads and their allies ruled over a mosaic of peoples languages and faiths first among them Christianity Judaism and the Ancient religion of Iran Zoroastrianism The Umayyad period is profoundly different from ours yet it also resonates with modern concerns from the origins of Islam to dynamics of cultural exchange Editors Alain George and Andrew Marsham bring together a collection of essays that shed new light on this crucial period Power Patronage and Memory in Early Islam elucidates the ways in which Umayyad lites fashioned and projected their self image and how these articulations in turn mirrored their own times The authors combining perspectives from different disciplines present new material evidence introduce fresh perspectives about key themes and monuments and revisit the nature of the historical writing that shaped our knowledge of this period God's Crucible: Islam and the Making of Europe, 570-1215 David

Levering Lewis,2009-01-12 From the two time Pulitzer Prize winning author God's Crucible brings to life a furiously complex age New York Times Book Review Resonating as profoundly today as when it was first published to widespread critical acclaim a decade ago God's Crucible is a bold portrait of Islamic Spain and the birth of modern Europe from one of our greatest historians David Levering Lewis's narrative filled with accounts of some of the most epic battles in world history reveals how cosmopolitan Muslim al Andalus flourished a beacon of cooperation and tolerance while proto Europe floundered in opposition to Islam making virtues out of hereditary aristocracy religious intolerance perpetual war and slavery This masterful history begins with the fall of the Persian and Roman empires followed by the rise of the prophet Muhammad and five centuries of engagement between the Muslim imperium and an emerging Europe Essential and urgent God's Crucible underscores the importance of these early world altering events whose influence remains as current as today's headlines

**Arabs in the Early Islamic Empire** Brian Ulrich, 2019-05-09 Examining a single broad tribal identity al Azd from the immediate pre Islamic period into the early Abbasid era this book notes the ways it was continually refashioned over that time It explores the ways in which the rise of the early Islamic empire influenced the peoples of the Arabian Peninsula who became a core part of it and examines the connections between the kinship societies and the developing state of the early caliphate This helps us to understand how what are often called tribal forms of social organisation identity conditioned its growth and helped shape what became its common elite culture Studying the relationship between tribe and state during the first two centuries of the caliphate author Brian Ulrich's focus is on understanding the survival and transformation of tribal identity until it became part of the literate high culture of the Abbasid caliphate and a component of a larger Arab ethnic identity He argues that from pre Islamic Arabia to the caliphate greater continuity existed between tribal identity and social practice than is generally portrayed The Rise of the Fatimids Brett, 2021-10-01 The book traces the rise of the Fatimid dynasty in the 4th century AH 10th century CE from its origins in Islamic messianism to power in North Africa and Egypt and a central position of influence throughout the Muslim world The first part deals with the problem of Fatimid origins the second with the establishment of the dynasty and its religious and political programme in North Africa the third with the success of that programme in Egypt Using the history of the Fatimids and their doctrine to survey the world of the Mediterranean and the Middle East in the 4th 10th century the book offers a new interpretation of the role of the dynasty in the history of Islam down to the period of the Crusades From Byzantine to Islamic Egypt Maged S. A. Mikhail, 2014-08-25 The conquest of Egypt by Islamic armies under the command of Amr ibn al As in the seventh century transformed medieval Egyptian society Seeking to uncover the broader cultural changes of the period by drawing on a wide array of literary and documentary sources Maged Mikhail stresses the cultural and institutional developments that punctuated the histories of Christians and Muslims in the province under early Islamic rule From Byzantine to Islamic Egypt traces how the largely agrarian Egyptian society responded to the influx of Arabic and Islam the means by which the Coptic Church constructed its

sectarian identity the Islamisation of the administrative classes and how these factors converged to create a new medieval society The result is a fascinating and essential study for scholars of Byzantine and early Islamic Egypt Barnabas Calder, 2021-07-01 A groundbreaking history of architecture told through the relationship between buildings and energy The story of architecture is the story of humanity The buildings we live in from the humblest pre historic huts to today s skyscrapers reveal our priorities and ambitions our family structures and power structures And to an extent that hasn t been explored until now architecture has been shaped in every era by our access to energy from fire to farming to fossil fuels In this ground breaking history of world architecture Barnabas Calder takes us on a dazzling tour of some of the most astonishing buildings of the past fifteen thousand years from Uruk via Ancient Rome and Victorian Liverpool to China s booming megacities He reveals how every building from the Parthenon to the Great Mosque of Damascus to a typical Georgian house was influenced by the energy available to its architects and why this matters Today architecture consumes so much energy that 40% of the world's greenhouse gas emissions come from the construction and running of buildings If we are to avoid catastrophic climate change then now more than ever we need beautiful but also intelligent buildings and to retrofit not demolish those that remain Both a celebration of human ingenuity and a passionate call for greater sustainability this is a history of architecture for our times A History of Islamic Societies Ira M. Lapidus, 2014-10-13 This new edition of one of the most widely used course books on Islamic civilizations around the world has been substantially revised to incorporate the new scholarship and insights of the last twenty five years Ira Lapidus history explores the beginnings and transformations of Islamic civilizations in the Middle East and details Islam's worldwide diffusion The history is divided into four parts Part I is a comprehensive account of pre Islamic late antiquity the beginnings of Islam the early Islamic empires and Islamic religious artistic legal and intellectual cultures Part II deals with the construction in the Middle East of Islamic religious communities and states to the fifteenth century Part III includes the history to the nineteenth century of Islamic North Africa and Spain the Ottoman Safavid and Mughal empires and other Islamic societies in Asia and Africa Part IV accounts for the impact of European commercial and imperial domination on Islamic societies and traces the development of the modern national state system and the simultaneous Islamic revival from the early nineteenth century to the present
