**The Place of Enchantment** Alex Owen, 2006-12-15 By the end of the nineteenth century Victorians were seeking rational explanations for the world in which they lived The radical ideas of Charles Darwin had shaken traditional religious beliefs Sigmund Freud was developing his innovative models of the conscious and unconscious mind And anthropologist James George Frazer was subjecting magic myth and ritual to systematic inquiry Why then in this quintessentially modern moment did late Victorian and Edwardian men and women become absorbed by metaphysical quests heterodox spiritual encounters and occult experimentation In answering this question for the first time The Place of Enchantment breaks new ground in its consideration of the role of occultism in British culture prior to World War I Rescuing occultism from its status as an irrational indulgence and situating it at the center of British intellectual life Owen argues that an involvement with the occult

was a leitmotif of the intellectual avant garde Carefully placing a serious engagement with esotericism squarely alongside revolutionary understandings of rationality and consciousness Owen demonstrates how a newly psychologized magic operated in conjunction with the developing patterns of modern life She details such fascinating examples of occult practice as the sex magic of Aleister Crowley the pharmacological experimentation of W B Yeats and complex forms of astral clairvoyance as taught in secret and hierarchical magical societies like the Hermetic Order of the Golden Dawn Through a remarkable blend of theoretical discussion and intellectual history Owen has produced a work that moves far beyond a consideration of occultists and their world Bearing directly on our understanding of modernity her conclusions will force us to rethink the place of the irrational in modern culture An intelligent well argued and richly detailed work of cultural history that offers a substantial contribution to our understanding of Britain Nick Freeman Washington Times

**Gandhi** Kathryn Tidrick,2013-07-02 Throughout his long and turbulent career as a political leader first in South Africa and then in India Gandhi sought to fulfil his religious aspirations through politics and to reconcile politics with personal religious conviction But Gandhi s religion was wildly divergent from anything to have taken root in his native India Foremost among his private tenets was the belief that he was a world saviour long prophesied and potentially divine Penetrating and provocative Kathryn Tidrick s book draws on neglected material to explore the paradoxes within Gandhi s life and personality She reveals a man whose spiritual ideas originated not in India but in the drawing rooms of late Victorian England and which included some very eccentric and damaging notions about sex The resulting portrait is complex convincing and to anyone interested in the legacy of colonialism more enlightening than any previously published The Gandhi revealed here is not the secular saint of popular renown but a difficult and self obsessed man driven by a messianic sense of personal destiny

*The Problem of Disenchantment* Egil Asprem,2018-05-31 Challenges the conventional view of a disenchanted and secular modernity and recovers the complex relation that exists between science religion and esotericism in the modern world Max Weber famously characterized the ongoing process of intellectualization and rationalization that

separates the natural world from the divine by excluding magic and value from the realm of science and reason and fact from the realm of religion as the disenchantment of the world Egil Asprem argues for a conceptual shift in how we view this key narrative of modernity Instead of a sociohistorical process of disenchantment that produces increasingly rational minds Asprem maintains that the continued presence of magic and enchantment in people s everyday experience of the world created an intellectual problem for those few who were socialized to believe that nature should contain no such incalculable mysteries Drawing on a wide range of early twentieth century primary sources from theoretical physics occultism embryology radioactivity psychical research and other fields Asprem casts the intellectual life of high modernity as a synchronic struggle across conspicuously different fields that shared surprisingly similar intellectual problems about value meaning and the limits of knowledge The Problem of Disenchantment is in its entirety extraordinarily well researched argued and written representing at once the most complete and nuanced treatment of the notion of disenchantment within this network of scientific religious philosophical and esoteric discourses and currents Nova Religio

**Madame Blavatsky** Marion Meade, 2014-04-01 The life and times of Helena Blavatsky the controversial religious guru who cofounded the Theosophical Society and kick started the New Age movement Recklessly brilliant Helena Petrovna Blavatsky scandalized her 19th century world with a controversial new religion that tried to synthesize Eastern and Western philosophies If her contemporaries saw her as a freak a charlatan and a snake oil salesman she viewed herself as a special person born for great things She firmly believed that it was her destiny to enlighten the world Rebelliously breaking conventions she was the antithesis of a pious religious leader She cursed smoked overate and needed to airbrush out certain inconvenient facts like husbands lovers and a child Marion Meade digs deep into Madame Blavatsky's life from her birth in Russia among the aristocracy to a penniless exile in Europe across the Atlantic to New York where she became the first Russian woman naturalized as an American citizen and finally moving on to India

where she established the international headquarters of the Theosophical Society in 1882 As she chafed from continent to continent she left in her aftermath a trail of enthralled followers and the ideas of Theosophy that endure to this day While dismissed as a female messiah her efforts laid the groundwork for the New Age movement which sought to reconcile Eastern traditions with Western occultism Her teachings entered the mainstream by creating new respect for the cultures and religions of the East for Buddhism and Hinduism and interest in meditation yoga gurus and reincarnation Madame Blavatsky was one of a kind Here is her richly bizarre story told with compassion insight and an attempt to plumb the truth behind those astonishing accomplishments **Rudolf Steiner, Life and Work Volume 3 (1900-1914)** Peter Selg, 2015-08-01

This third volume of Peter Selg's comprehensive presentation of Rudolf Steiner's life and work begins with Steiner's invitation to lecture in the Theosophical Society during the summer of 1900 From the outset of his theosophical involvement Steiner was resolved to serve and develop the Western path to the spirit traversed in full conscious clarity of thought He was therefore critical of the tendency to avoid the modern standards of a sound knowledge process in matters of spirituality and esotericism and instead emphasized the importance of idealist philosophy as groundwork for understanding spiritual cognition Whoever speaks of the coldness of the world of ideas can only think ideas not experience them Those who live the true life in the world of ideas feel in themselves the being of the world working in warmth that cannot be compared to anything else Rudolf Steiner Goethe's World View Although his approach did not always harmonize with theosophical pursuits Rudolf Steiner recognized the sincere striving at the basis of this movement and agreed to take on increasingly greater responsibility for the German Section Marie von Sivers who would later become his wife was his most supportive colleague during this time At a decisive juncture Steiner broke from the Theosophical Society to found the Anthroposophical Society through which he would continue the development of modern spiritual science more freely in accord with his original intentions This volume covers the period during which Steiner wrote some of his foundational works Christianity as Mystical Fact Theosophy Knowledge of the Higher Worlds and An Outline of Esoteric Science Peter Selg also describes the building of the first Goetheanum in Dornach as an artistic embodiment of esoteric wisdom giving rise to an international working community as well as the performance of the mystery dramas and Rudolf Steiner's profound Christological lectures known as the Fifth Gospel Between Ethnography and Fiction Tanka Bahadur Subba, Sujit Som, 2005 Between Ethnography and Fiction brings together essays by sixteen scholars of various disciplines to re-examine the work of Verrier Elwin in the fields of tribal literature tribe and non-tribe relationship tribal development policies missionaries and conversion myths and legends art and craft etc Elwin is undoubtedly one of the most controversial as well as influential anthropologists of the twentieth century The essays included here are therefore both appreciative and critical
