Ready Elizabeth Gregory, 2012-08-07 Over the past three decades skyrocketing numbers of women have chosen to start their families in their late thirties and early forties In 2005 ten times as many women had their first child between the ages of 35 and 39 as in 1975 and thirteen times as many had their first between 40 and 44 Women now have the option to define for themselves when they're ready for family rather than sticking to a schedule set by social convention As a society however we have yet to come to terms with the phenomenon of later motherhood and women who decide it makes sense for them to delay pregnancy often find themselves confronted with alarmist warnings about the dangers of waiting too long In Ready Elizabeth Gregory tracks the burgeoning trend of new later motherhood and demonstrates that for many women today waiting for family works best She provides compelling evidence of the benefits of having children later by birth or by adoption Gregory reveals that large numbers of women

succeed in having children between 35 and 44 by the usual means one in seven kids born today has a mom in that age range and that many of those who don't succeed nonetheless find alternate routes to happy families via egg donation or adoption And they're glad they waited Without ignoring the complexities that older women may face in their quest to have children Gregory reveals the many advantages of waiting Stronger family focus Having achieved many of their personal and career goals new later moms feel ready to focus on family rather than trying to juggle priorities More financial power New later moms have established careers and make higher salaries Greater self confidence New later moms have more career experience and their management skills translate directly into managing a household and advocating for their children More stable single parenting New later moms who are single have more resources High marriage rate On average 85 percent of new later moms are married lending stability to the family structure Longer lives Evidence indicates that new later moms actually live longer than moms who start their families earlier Based on in depth interviews with more than 100 new later moms and extensive collateral research Ready shatters the myths surrounding later motherhood Drawing on both the statistical evidence and the voices of the new later mothers themselves Gregory delivers surprising and welcome news that will revolutionize the way we think about motherhood

three major independently managed systems the Air Force uses to determine manpower strength currently tend to function in isolation Because the current organizational structure lacks broad coordinating and control mechanisms actions taken to control one system often adversely affect another The authors lay the foundation for a discussion of policy changes that would better synchronize these systems They propose a methodology that would marginally modify grade authorizations within skill levels to make it possible to better achieve manpower targets Each specialty would retain the same number of authorizations within each skill level and the aggregate solution would maintain the same total number of enlisted authorizations by grade This would help the manpower community follow the policy of equal selection opportunity while also taking personnel management system capabilities into account *Where to Nest* Kristen Van Nest,2024-04-02 A Simon Schuster eBook Simon Schuster has a great book for every reader **Seeing Things** Gerry Eugene,2023-01-16 *Seeing Things* is collection of lyrical narratives that focus on joy grief courage fear love The twenty three visions in this collection wrestle with the universal verities of our lives Each chapter of the volume is a stand alone vision yet the chapters work together to create a single voice building and spotlighting the strength we all must find as we move through our lives The book focuses on the drawing in of family friends and nature in those moments that shape us in the crucible *Odds in Templeton* Sai,2021-08-13 Benjamin Kishan Thomson is a socially anxious boy He has a hard time talking with people that he doesn t know or has just met When odd things started to happen in Templeton the secrets are finally being revealed about his mom Aditi who loves her kid to death the Zachary s Asuras and more importantly the Keys What would happen when he gets to find them all Would he still refuse to come out of his comfort zone and stay away from troubles Or fight against his own odds to help save his loved ones Whatever he chooses to do everything will be fine until he has a ring with his name on it Forest and Stream ,1906 Industrial Depressions United States.
