**(Classic Reprint)** Albert von Haller, 2015-08-05 Excerpt from First Lines of Physiology The correction of this volume for the press was undertaken at the desire of the Publishers Having already undergone three editions the present Editor believed that a careful perusal of the proof sheets and attention to the typographical accuracy of the work would chiefly constitute his share in the publication On collating however the last edition with the original of Haller it appeared that few sentences and scarcely one paragraph conveyed the true meaning of the Author In many places the sense was totally mistaken sometimes perverted and the omissions and interpolations were both so numerous and so prejudicial to the work that those who have formed their opinion of the value of Haller's First Lines must have formed an opinion of them highly detrimental to the well deserved reputation of the Author In the present Edition with much labour the Editor has endeavoured to correct these mistakes to supply what was omitted and to expunge the interpolations in short to give Haller's First Lines in English About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Lienhard, 2006-07-14 In *How Invention Begins* Lienhard reconciles the ends of invention with the individual leaps upon which they are built illuminating the vast web of individual inspirations that lie behind whole technologies He traces for instance the way in which thousands of people applied their combined inventive genius to airplanes railroad engines and automobiles As he does so it becomes clear that a collective desire an upwelling of fascination a spirit of the times a Zeitgeist laid its hold upon inventors The thing they all sought to create was speed itself Likewise Lienhard shows that when we trace the astonishingly complex technology of printing books we come at last to that which we desire from books the knowledge the learning that they provide Can we speak of speed or education as inventions To do so he concludes is certainly no greater a stretch than it is to call radio or the telephone an invention Throughout this marvelous volume Lienhard illuminates these webs of insight or inspiration by weaving a fabric of anecdote history and technical detail all of which come together to provide a full and satisfying portrait of the true nature of invention      Index-catalogue of the Library of the Surgeon-General's Office, United States Army National Library of Medicine (U.S.), 1882      *4 bookseller's catalogues* Lackington, Hughes, Harding, Mavor and Jones, 1811      Brain, Mind and Medicine: Harry Whitaker, C.U.M.
