Mooney, 1995 Excerpts from and citations to reviews of more than 8 000 books each year from 109 publications Electronic version with expanded coverage and retrospective version available see p 5 and p 31 Pricing Service Basis Books      *Bats* Peter Aleshire, 2011 Describes the origin characteristics behaviors and habitats of bats explains the human threat to bats and profiles various species of these creatures      *Restless Creatures* Matt Wilkinson, 2016-02-23 From flying pterodactyls to walking primates the story of life as told through the evolution of locomotion Most of us never think about how we get from one place to another For most people putting one foot in front of the other requires no thought at all Yet the fact that we and other species are able to do so is one of the great triumphs of evolution To truly understand how life evolved on Earth it is crucial to understand movement Restless Creatures makes the bold new argument that the true story of evolution is the story of locomotion from the first stirrings of bacteria to the amazing feats of Olympic athletes By retracing the four billion year history of locomotion evolutionary biologist Matt Wilkinson shows how the physical challenges of moving from place to place when coupled with the implacable logic of natural selection offer a uniquely powerful means of illuminating the living world Whales and dolphins look like fish because they have been molded by the constraints of underwater locomotion The unbending physical needs of

flight have brought bats birds and pterodactyls to strikingly similar anatomies Movement explains why we have opposable thumbs why moving can make us feel good how fish fins became limbs and even why classic fiction notwithstanding there are no flying monkeys nor animals with wheels Even plants aren't immune from locomotion's long reach their seeds pollen and very form are all determined by their aptitude to disperse From sprinting cheetah to spinning maple fruit soaring albatross to burrowing worm crawling amoeba to running human all are the way they are because of how they move There is a famous saying nothing in biology makes sense unless in the light of evolution As Wilkinson makes clear little makes sense unless in the light of locomotion A powerful yet accessible work of evolutionary biology *Restless Creatures* is the essential guide for understanding how life on Earth was shaped by the simple need to move from point A to point B *Nature At Your Doorstep* Gloria A. Tveten, 2008 With John and Gloria Tveten as your guides even a walk across an empty lot can turn into a memorable lesson in the abundance of life For more than two decades the Tvetens weekly Nature Trails column in the Houston Chronicle introduced readers to the miracles of nature that surround them every day Nature at Your Doorstep gathers in one volume some of the best of these columns revealing the bounty of plants and animals available within the familiar surroundings of home and region With updated commentaries and original drawings the Tvetens open our eyes to the plants and animals thriving in the backyard the park the campground or the family's vacation spot In addition to neighborhood flowers mammals reptiles and amphibians they also take this opportunity to focus on a particular love of John Tveten's insects From butterflies and beetles to mosquitoes and moths the six legged horde receives admiring treatment revealing the huge number and variety of bugs that occupy our space With the Tvetens intimate and knowledgeable descriptions you are sure to begin viewing the nature at your doorstep in a whole new way *1000 Wonders of Nature*, 2002 Delve below the Earth soar beyond the heavens and scour every corner of the planet to discover wonders far greater in number than the world's Big Seven and just as astounding A riveting read for weird science buffs of all ages and an ideal way for parents and kids to share the thrills of learning 1000 Wonders of Nature spotlights incredible animals formidable forces of weather and mysterious occurrences and clearly explains the facts of science behind them all Filled with 1 300 up close and astounding full color photos of the most intriguing living creatures and impressive natural spectacles Chapters highlight Nature's Great Events from the self healing secrets of Peruvian parrots to the underwater fireworks sparked by spawning corals Amazing Animals from lizards that walk on water to fish that spend the night in slimy sleeping bags to birds that feast on blood Microscopic Marvels from destructive plant viruses that hitch rides with insects to friendly fungi that supply trees with essential minerals Heavenly Amazements from diamond showers that fall from the sun to comets quasars and blue moons Forces of Nature from the world's tallest waterfall to horrific hurricanes terrifying tornadoes and volatile volcanoes **Major Patterns in Vertebrate Evolution** Max Hecht, 2013-11-11 This volume is the result of a NATO Advanced Study Institute held in England at Kingswood Hall of Residence Royal Holloway College London University Surrey during the last two weeks of July 1976 The

ASI was organized within the guide lines laid down by the Scientific Affairs Division of the North Atlantic Treaty Organization During the past two decades significant advances have been made in our understanding of vertebrate evolution The purpose of the Institute was to present the current status of our know ledge of vertebrate evolution above the species level Since the subject matter was obviously too broad to be covered adequately in the limited time available selected topics problems and areas which are applicable to vertebrate zoology as a whole were reviewed The program was divided into three areas 1 the theory and methodology of phyletic inference and approaches to the an alysis of macroevolutionary trends as applied to vertebrates 2 the application of these methodological principles and an alytical processes to different groups and structures particular ly in anatomy and paleontology 3 the application of these re sults to classification The basic principles considered in the first area were outlined in lectures covering the problems of character analysis functional morphology karyological evidence biochemical evidence morphogenesis and biogeography

**The Pine Tar Game** Filip Bondy, 2016-08-02 On July 24 1983 during the finale of a heated four game series between the dynastic New York Yankees and small town Kansas City Royals umpires nullified a go ahead home run based on an obscure rule when Yankees manager Billy Martin pointed out an illegal amount of pine tar the sticky substance used for a better grip on Royals third baseman George Brett s bat Brett wildly charged out of the dugout and chaos ensued The call temporarily cost the Royals the game but the decision was eventually overturned resulting in a resumption of the game several weeks later that created its own hysteria The Pine Tar Game chronicles this watershed moment marking a pivot in the sport when benign cheating tactics like spitballs Superball bats and a couple extra inches of tar on an ash bat gave way to era of soaring salaries labor struggles and rampant use of performance enhancing drugs Filip Bondy paints a portrait of the Yankees and Royals of that era featuring two diametrically opposed owners in George Steinbrenner and Ewing Kauffman a host of bad actors and phenomenal athletes and lots of yelling Players and club officials like Brett Goose Gossage Willie Randolph Ron Guidry Sparky Lyle David Cone and John Schuerholz offer fresh commentary on the events along with their take on a rivalry that culminated in one of the most iconic baseball tantrums of all time Rush Limbaugh employed by the Royals at the time as a promotions director offers his own insider s perspective Through this one fateful game the ensuing protest and ultimate fallout The Pine Tar Game examines a more innocent time in professional sports as well as the shifting tide that gave us today s modern iteration of baseball

**Ecology of Sumatra** Tony Whitten, Sengli J. Damanik, 2012-06-26 The Ecology of Sumatra distills for the first time the information found in nearly 1 500 scholarly works relevant to an understanding of the full range of natural and man made ecosystems on the island many of them available only in Dutch German or Indonesian It was originally prepared by a team working at the Centre for Resource and Environmental Studies CRES at the University of North Sumatra to supplement existing documents This new version is aimed at general readers and includes a section on

recent development on Sumatra as well as an additional bibliography of recent publications It contains hundreds of line drawings tables maps and photographs It is hoped that The Ecology of Sumatra will prove useful to resource managers ecologists environmental scientists and local government personnel and be enlightening to Sumatra s inhabitants and visitors It should also be of great interest to anyone wanting to learn about Southeast Asian biology Functional and Evolutionary Ecology of Bats Akbar Zubaid, Gary F. McCracken, Thomas Kunz, 2006-01-05 Every three years a major international conference on bats draws the leading workers in the field to a carefully orchestrated presentation of the research and advances and current state of understanding of bat biology Bats are the second most populous group of mammalia species after rodents and they are probably the most intensively studied group of mammals Virtually all mammalogists and a large proportion of organismic biologists are interested in bats The earlier two edited books deriving from previous bat research conferences as well as this one have been rigorously edited by Tom Kunz and others with all chapters subjected to peer review The resulting volumes published first by Academic Press and most recently by Smithsonian have sold widely as the definitive synthetic treatments of current scientific understanding of bats **The Museum of Natural History, Etc** Sir John RICHARDSON, 1868 **Under a Tropical Sky: a Journal of First Impressions of the West Indies** John AMPHLETT (Barrister-at-Law.), 1873 **Journal of the Field Naturalists' Club** , 1894 **The Sacred Land** H.
