Ingram, Practitioners give insights on building and satisfying demand for evaluation in developing countries and on the use of evaluation findings to improve decision making on development policies and programs This volume offers useful insights into methods for evaluating the effectiveness of development and assessing the performance of development aid and aid agencies BOOK

JACKET Local Public Finance and Economics Harry Kitchen, Melville McMillan, Anwar Shah, 2019-09-05 Globalization and the information revolution have highlighted the catalytic role of local governments for improving economic and social outcomes at the local level as well as growing the national economy by enhancing international competitiveness. This comprehensive account of local public finance and economics brings together principles and better practices for improving quality and access of local public services provision. The volume covers assignment of responsibilities, jurisdictional design, local service delivery, local regulation, local self-financing options such as income, sales, property, and environmental taxation, user charges, and fees, infrastructure finance options, and higher order government financing of local governments. The treatment is non-technical and suitable for a wide variety of audiences including scholars, instructors, students, media, policy advisers, and practitioners.

Decentralizing Governance G. Shabbir Cheema, Dennis A. Rondinelli, 2007-08-01 The trend toward greater decentralization of governance activities now accepted as commonplace in the West has become a worldwide movement. This international development, largely a product of globalization and democratization, is clearly one of the key factors reshaping economic, political, and social conditions throughout the world. Rather than the top-down centralized decisionmaking that characterized communist economies and Third World dictatorships in the twentieth century, today's world demands flexibility, adaptability, and the autonomy to bring those qualities to bear. In this thought-provoking book, the first in a new series on Innovations in Governance, experts in government and public management trace the evolution and performance of decentralization concepts from the transfer of authority within government to the sharing of power, authority, and responsibilities among broader governance institutions. This movement is not limited to national government; it also affects subnational governments, NGOs, private corporations, and even civil associations. The contributors assess the emerging concepts of decentralization, e.g., devolution, empowerment, capacity building, and democratic governance. They detail the factors driving the movement, including political changes such as the fall of the Iron Curtain and the ascendance of democracy, economic factors such as globalization and outsourcing, and technological advances, e.g., increased information technology and electronic commerce. Their analysis covers many different contexts and regions. For example, William Ascher of Claremont McKenna College chronicles how decentralization concepts are playing out in natural resources policy, while Kadmeil Wekwete of the United Nations outlines the specific challenges to decentralizing governance in sub-Saharan Africa. In each case, contributors explore the objectives of a decentralizing strategy as well as the benefits and difficulties that will likely result.

Taxation and Latin American Integration Vito Tanzi, Alberto Barreix, Luiz Arruda Villela, 2008 In South and Central America, a movement toward further economic integration has begun. In the hope of expediting the process and to foster a better understanding of the policy actions required, the Inter American Development Bank studied the impact of trade integration on taxes. This book collects twelve of these studies.

Going Local Merilee S. Grindle, 2009-03-09 Many developing countries have a history of highly centralized governments. Since the late 1980s, a large number of these

governments have introduced decentralization to increase democracy and improve services especially in small communities far from capital cities In *Going Local* an unprecedented study of the effects of decentralization on thirty Mexican municipalities Merilee Grindle describes how local governments respond when they are assigned new responsibilities and resources under decentralization policies She explains why decentralization leads to better local governments in some cases and why it fails to in others Combining quantitative and qualitative methods Grindle examines data based on a random sample of Mexican municipalities and ventures into town halls to follow public officials as they seek to manage a variety of tasks amid conflicting pressures and new expectations Decentralization she discovers is a double edged sword While it allows public leaders to make significant reforms quickly institutional weaknesses undermine the durability of change and legacies of the past continue to affect how public problems are addressed Citizens participate but they are more successful at extracting resources from government than in holding local officials and agencies accountable for their actions The benefits of decentralization regularly predicted by economists political scientists and management specialists are not inevitable she argues Rather they are strongly influenced by the quality of local leadership and politics

Complexity Economics and Sustainable Development Omar A. Guerrero, Gonzalo Castañeda, 2024-01-25 The Sustainable Development Goals are global objectives set by the UN They cover fundamental issues in development such as poverty education economic growth and climate Despite growing data across policy dimensions popular statistical approaches offer limited solutions as these datasets are not big or detailed enough to meet their technical requirements Complexity Economics and Sustainable Development provides a novel framework to handle these challenging features suggesting that complexity science agent based modelling and computational social science can overcome these limitations Building on interdisciplinary socioeconomic theory it provides a new framework to quantify the link between public expenditure and development while accounting for complex interdependencies and public governance Accompanied by comprehensive data of worldwide development indicators and open source code it provides a detailed construction of the analytic toolkit familiarising readers with a diverse set of empirical applications and drawing policy implications that are insightful to a diverse readership

Mirror Images in Different Frames? Francis E Hutchinson, 2016-05-13 In the early 1990s Singapore the Malaysian state of Johor and the Riau Islands in Indonesia sought to leverage their proximity differing factor endowments and good logistics connections to market themselves as an integrated unit Beyond national level support in all three countries the initiative had the support of state and provincial leaders in Johor and Riau respectively Now however the situation is markedly different The Malaysian government and its Johorean equivalent have invested considerable resources in encouraging closer integration with Singapore For its part the Indonesian central government has been promoting special economic zones and export oriented activities However the provincial government of the Riau Islands has turned away from export oriented industrialization preferring instead to promote cultural sub nationalism and traditional economic activities such as fishing and small scale

farming This development is counter intuitive Traditional fiscal federalism theory argues that decentralization encourages competition between provinces for investment jobs and growth While Indonesia has undergone one of the world s most far reaching decentralization reforms Malaysia has pursued a consistent centralization campaign at the expense of state governments Thus we would expect the Riau Islands entrepreneurial drive to be unleashed and Johor s to be smothered However Johor s drive for capital is undiminished while the Riau Islands pursuit of investment has dissipated This monograph will explore the reasons for this paradox

Institutions, Partisanship and Credibility in Global Financial Markets

Hye Jee Cho,2017-07-28 Increasingly integrated global financial markets have been shaken by a series of severe shocks in recent decades from Mexico s Tequila crisis to the upheavals in the Eurozone These crises have demonstrated that signs of uncertain local economic and political conditions can result in market fluctuations which in turn cause economic social and political instability Such instability is particularly severe for developing countries that rely heavily on international financial markets for their financial needs Building credibility in these markets is therefore important for national governments who wish to prevent market panic and capital flight and ultimately to achieve stable economic growth Earlier studies have argued that institutional arrangements that constrain governments and commit them to protecting private property rights and market friendly policies can send a strong positive signal to the markets about a given country s sovereign credibility This book argues however that the market perception of such credibility building institutions is significantly contingent on which party governs the country Formal institutions confer significant credibility building effects on left wing governments whereas less or no significant effects are enjoyed by right wing governments And beyond that any significant changes in a country s institutional landscape such as a breakdown of democracy or joining an international organization that can influence domestic politics have particularly strong impact on the credibility of left wing governments This argument is supported by a quantitative analysis of sovereign credit ratings data collected from around 90 developing countries from 1980 to 2007 by case studies from South Asia Eastern Europe and Latin America and by face to face interviews with 24 financial market experts based in Hong Kong Seoul and Paris
