Porter, 2017-09-04 A growing cooperation between the public and private sectors indicates that the tasks of redevelopment are too large and complex for either sector to accomplish alone Some people maintain that government can do few things right others are equally distrustful of the private sector As used here the private sector is considered to be all that is not government Each of the success stories illustrated is in part a road to recovery although none appear to have been influenced by a purpose that broad Paul R Porter and David C Sweet present stories of progress in self reliance that concern neighborhood and downtown recoveries school improvement job generation a regained fiscal solvency novel financing techniques helping tenants to become homeowners and a successful venture in self help and tenant management in crime infested neighborhoods The successes stem from the diverse community roles of Yale University a medical center the world's largest research organization the Clorox Company a gas company an insurance company a newspaper neighborhood and downtown

American Capitalism Sven Beckert, Christine Desan, 2018-02-06 The United States has long epitomized capitalism From its enterprising shopkeepers wildcat banks violent slave plantations huge industrial working class and raucous commodities trade to its world spanning multinationals its massive factories and the centripetal power of New York in the world of finance America has come to symbolize capitalism for two centuries and more But an understanding of the history of American capitalism is as elusive as it is urgent What does it mean to make capitalism a subject of historical inquiry What is its potential across multiple disciplines alongside different methodologies and in a range of geographic and chronological settings And how does a focus on capitalism change our understanding of American history American Capitalism presents a sampling of cutting edge research from prominent scholars These broad minded and rigorous essays venture new angles on finance debt and credit women's rights slavery and political economy the racialization of capitalism labor beyond industrial wage workers and the production of knowledge including the idea of the economy among other topics Together the essays suggest emerging themes in the field a fascination with capitalism as it is made by political authority how it is claimed and contested by participants how it spreads across the globe and how it can be reconceptualized without being universalized A major statement for a wide open field this book demonstrates the breadth and scope of the work that the history of capitalism can provoke
