Fish For Life Interactive Governance For Fisheries Amsterdam University Preb Mare Publication:

Fish for Life J. Kooiman, 2005 An interdisciplinary survey addressing the problems of overfishing worldwide and the best way forward toward good ecological practice and global cooperative governance **Governability of Fisheries and Aquaculture: Theory and Applications** Maarten Bavinck, Ratana Chuenpagdee, Svein Jentoft, Jan Kooiman, 2013-04-10 Following from Fish for Life Interactive Governance for Fisheries Kooiman et al 2005 which presents an interdisciplinary and intersectoral approach to the governance of capture and aquaculture fisheries this volume pursues what interactive governance theory and the governability perspective contribute to the resolution of key fisheries problems these include overfishing unemployment and poverty food insecurity and social injustice Since these problems are varied and can be felt among governments resource users and communities globally the diagnosis must be holistic and take account of principles institutions and operational conditions The authors argue that wicked problems and institutional limitations are inherent to each setting and must be included in the analysis The volume thereby offers a new lens and a systematic approach for analysing the nature of problems and challenges concerning the governance of fisheries explores where these problems are situated and how potential solutions may be found It now seems clear that the crisis in the world's fisheries is a much larger and more complex problem than many had imagined Yet examining it through the lens of governability may offer the best hope for alleviating it as well as alleviating similar crises in other social systems James R McGoodwin Professor Emeritus University of Colorado **Interactive Governance for Small-Scale Fisheries** Svein Jentoft, Ratana Chuenpagdee, 2015-05-30 Drawing on more than 30 case studies from around the world this book offers a multitude of examples for improving the governance of small scale fisheries Contributors from some 36 countries argue that reform transformation and innovation are vital to achieving sustainable small scale fisheries especially for mitigating the threats and vulnerabilities of global change For this to happen governing systems must be context specific and the governability of small scale fisheries properly assessed The volume corresponds well with the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries adopted in 2014 spearheaded by the United Nations Food and Agriculture Organization FAO These affirm the importance of small scale fisheries for food security nutrition livelihoods rural development and poverty reduction The book arises from the project Too Big To Ignore Global Partnership for Small Scale Fisheries Research TBTI A nuanced diverse vibrant and local specific collection of essays just as the small scale fisheries around the world dealt with by this versatile array of authors Following on the heels of the recently adopted FAO Small Scale Fisheries Guidelines here is an erudite compendium which I heartily recommend to policy makers academics and activists who wish to come to terms with the complex issue of governance of this important field of human activity John Kurien Founding Member of the International Collective in Support of Fishworkers ICSF and Former Professor Centre for Development Studies Trivandrum India Likely to become a classic in its field this book is about small scale fisheries and interactive governance governance which is

negotiated deliberated upon and communicated among stakeholders who often share governing responsibilities The authors show that interactive governance is not just a normative theory but a phenomenon that can be studied empirically here with 34 case studies from as many countries around the world north and south east and west Such force of example enables the editors to put together well developed arguments and sometimes surprising conclusions about the way ahead A must read for managers practitioners stakeholders and students Fikret Berkes University of Manitoba Canada and author of *Coasts for People* *Transdisciplinarity for Small-Scale Fisheries Governance* Ratana Chuenpagdee, Svein Jentoft, 2018-10-15 The importance of small scale fisheries for sustainable livelihoods and communities food security and poverty eradication is indisputable With the endorsement of the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries FAO member states recognize that governments civil society organizations and research communities all have a role to play in helping small scale fisheries achieve these goals This book argues that policies targeting small scale fisheries need to be based on a solid and holistic knowledge foundation and support the building of governance capacity at local national and global levels The book provides rich illustrations from around the world of why such knowledge production needs to be transdisciplinary drawing from multiple disciplinary perspectives and the knowledge that small scale fisheries actors have in order to identify problems and explore innovative solutions *Transdisciplinarity for Small Scale Fisheries Governance Analysis and Practice* edited by Ratana Chuenpagdee and Svein Jentoft successfully demonstrates how small scale fisheries are important and what social and political conditions are conducive to their wellbeing The volume contributes tremendously to building capacity of fisheries communities and policy makers to make the ideals of small scale fisheries a reality It establishes the ecological social and economic sense behind small scale fisheries A milestone reference for all those who believe in small scale fisheries and are keen to defend them with quality evidence Sebastian Mathew Executive Director International Collective in Support of Fishworkers ICSF The Small Scale Fisheries Guidelines guiding principles call for holistic and integrated approaches for their implementation This book will help a new generation of scientists policy makers and small scale fisheries actors make the fundamental connections between different disciplines in science traditional knowledge and policy to guide a collective process towards sustainable small scale fisheries The book contains an inspiring collection of practical cases from around the world complemented by deep dives into dimensions of small scale fisheries like food security stewardship climate change and gender which all call for transdisciplinary approaches Nicole Franz Fisheries and Aquaculture Department Food and Agriculture Organization of the United Nations FAO Rome Italy *Fisheries Governance* Pallas Publications, 2016-12-15

Interactive Fisheries Governance Maarten Bavinck, 2005 **Collaborative Research in Fisheries** Peter Holm, Maria Hadjimichael, Sebastian Linke, Steven Mackinson, 2020-02-24 This book is about the ongoing transition of fisheries governance from top down command and control towards a more transparent and participatory form It focuses on the emergence of research practices and advice frameworks that allow co creation of common knowledge bases for management

Drawing from 8 years of research in GAP a two stage 7th framework EU project the book offers a critical examination of how knowledge practices in fisheries governance are changing The entry point for this research is a series of practical experiments in the uncharted terrain of collaborative research To gain insight into the ongoing transition in European fisheries management GAP initiated and carried out 13 Case Studies in different settings across Europe In each case study a team of fishers and marine scientists worked together to identify plan and implement research projects intended to make a difference The cases vary They take on different management issues and shape the collaborations in different ways The extent to which they succeed in realizing their objectives also differs They are all contributing important insights into the possibilities of co creating knowledge for management purposes The book delves into the individual experiences of each case study as well as the lessons they contribute as a whole The examination concludes that while research partnerships are not always easy to establish they are an important step towards better fisheries governance Without a common knowledge base for fisheries governance co created through collaborative research practices sustainable fisheries will remain out of reach

Participation in Fisheries Governance Tim S. Gray, 2006-06-30 The chapters focus on three main themes first what value does stakeholder participation bring to fisheries governance Its advocates claim that participation improves the quality of decision making resolves conflicts and increases compliance with regulations On the other hand critics argue that participation is often unnecessary ineffective costly time consuming and cosmetic The second theme is the relationship between the participatory mode and the current switch from single species based fisheries management to the ecosystem based approach EBA In what way does widening the extent of public participation contribute to the EBA Third is the vexed question of the relationship between fishers experiential knowledge and fisheries science how far does fishers knowledge improve our understanding of the marine environment The central message of the book is that while stakeholder participation is beneficial it carries with it responsibilities as well as rights all stakeholders have a public duty to act as stewards for the marine environment

Creative Governance Jan Kooiman, Martijn van Vliet, Svein Jentoft, 2019-01-15 Published in 1999 Creative Governance sets out to develop new ideas on the development of Fisheries in Europe The scholarly and political attention for fisheries in general within Europe is predominantly focused on problems of controlling catch In this book it is not the problems of harvesting which are taken as the starting point but opportunities in fisheries as a whole catch processing market and consumption of fish and fish products The discussion is broadened to include the management of fisheries from the perspective of governance rather than management or policy Governance is a new and important concept currently being developed in several areas of social science in this book the governance concept is related to the creation of new opportunities of fisheries in Europe The combination of these two approaches is not only important for fisheries in Europe but also to the governance of natural resources more generally where the shift from a problem to an opportunity and from a management or a governance approach might shed new light and stimulate new actions The book is

the product of close cooperation between scholars from biological geographical political science management studies and anthropological backgrounds

Governance of Marine Fisheries and Biodiversity Conservation Serge M. Garcia, Jake Rice, Anthony Charles, 2014-07-15

Governance of Marine Fisheries and Biodiversity Conservation explores governance of the world's oceans with a focus on the impacts of two inter-connected but historically separate streams of governance one for fisheries the other for biodiversity conservation Chapters most co-authored by leading experts from both streams investigate the interaction of these governance streams from ecological economic social and legal perspectives with emphasis on policies institutions processes and outcomes on scales from the global to the local community and with coverage of a range of themes and regions of the world The book opens with chapters setting the historical context for the two marine governance streams and framing the book's exploration of whether as the streams increasingly interact there will be merger or collision convergence or co-evolution The concluding chapter synthesizes the insights from throughout the book relative to the questions posed in the opening chapters It also draws conclusions about future needs and directions in the governance of marine fisheries and biodiversity vital to the future of the world's oceans With cutting edge chapters written by many leading international experts in fisheries management and biodiversity conservation and edited by three leading figures in this crucially important subject Governance of Marine Fisheries and Biodiversity Conservation is an essential purchase for fisheries scientists economists resource managers and policymakers and all those working in fields of biodiversity conservation marine ecology and coastal livelihoods Libraries in all universities and research establishments where environmental and or marine studies conservation ocean policy and law biological and life sciences and fisheries management are studied and taught should have copies of this most important book
