Magra, 2009-04-06 This book examines why and how colonial fishermen and fish merchants mobilized for the American Revolution underscoring the pivotal maritime efforts that secured American independence *Fish on Friday (EasyRead Large Bold Edition)* Brian M. Fagan, 2007 In this book the author tells a new story of the discovery of America In his view that discovery is the product of the long sweep of history the spread of Christianity and the radical cultural changes it brought to Europe the interaction of economic necessity with a changing climate and generations of unknown fishermen who explored the North Atlantic in the centuries before Columbus The Church's tradition of not eating meats on holy days created a vast market for fish that could not be fully satisfied by fish farms better boats or new preservation techniques Then when climate change in the thirteenth and fourteenth centuries diminished fish stocks off Norway and Iceland fishermen were forced to range ever farther to the west eventually discovering incredibly rich shoals within sight of Newfoundland Dust jacket **Food in China** Frederick J. transportation costs limited domestic market integration while at the same time the Castilian capital city of Madrid drew resources from surrounding Spanish regions as it pursued its quest for centralization According to this view powerful Madrid thwarted trade over large geographic distances by destroying an integrated network of manufacturing towns in the Spanish interior Challenging this long held view Regina Grafe argues that decentralization not a strong and powerful Madrid is to blame for Spain s slow march to modernity Through a groundbreaking analysis of the market for bacalao dried and salted codfish that was a transatlantic commodity and staple food during this period Grafe shows how peripheral historic territories and powerful interior towns obstructed Spain s economic development through jurisdictional obstacles to trade which exacerbated already high transport costs She reveals how the early phases of globalization made these regions much more externally focused and how coastal elites that were engaged in trade outside Spain sought to sustain their positions of power in relation to Madrid Distant Tyranny offers a needed reassessment of the haphazard and regionally diverse process of state formation and market integration in early modern Spain showing how local and regional agency paradoxically led to legitimate governance but economic backwardness
