Fish Oil Deborah T. Hanfman, 1991 *Omega 3 Oils* Donald O. Rudin, 1996 It's true Specific fats play a crucial role in protecting us from many serious diseases from heart disease to cancer to manic depressive illness Certain fats also have an impact on such everyday complaints as dry skin intestinal troubles and achy joints The problem for most of us is that we hear only about one or two of these good fats and figure that by including some healthy oils in our diets we're covered What we don't realize is that by not understanding what makes a good fat good we unknowingly create imbalances in our systems that may lead to these terrible disorders despite our best intentions In *The Omega 3 Oils* pioneering researcher and physician Dr Donald Rudin tells us how we can improve our physical and mental health by correcting these imbalances Dr Rudin shows how different fats act within our body and how modern food processing techniques have stripped a vital family of oils the Omega 3 fatty acids out of our food He discusses his groundbreaking Omega 3 study in which people suffering from a variety of chronic ailments showed remarkable improvement after taking oil rich in Omega 3 in combination with other healthful supplements He then shows the connection between Omega intake and a variety of modern day health concerns including heart disease skin problems reproductive difficulties in both men and women pregnancy and breastfeeding mental health and the problems we experience as we age Finally Dr Rudin presents the Omega Program to help bring our diet and our health back into balance Fish Oil Update Richard A. Passwater, 1999-02 Fish Oil Matthias Van Dijk, Jürgen Vitek, 2012-02-01

Howes, 2014-06-28 Misinformation and misconceptions dominate the nutritional supplement landscape concerning the scientifically proven benefits omega 3 fish oils Many books claim fish oil supplements to be miracles or wonder pills But such is far from the scientific reality of failed and disappointing studies conducted on so called fish oil products even though many such products actually come from plants All studies presented in my book are well referenced and discussion articles are duly credited This book is the leader in presenting scientifically accurate data and serves to debunk the sea of lies facing the general public regarding an ocean of so called fish oil products Basically there is no truth in advertising and anything goes because none of these products are government regulated for quality or accuracy of contents and dosage Sadly marketers and profiteers will Tell you anything to sell you anything Profit is the muddy waters upon which the fish oil industry bobbles about There is a serious down side to these potentially harmful fish oil products especially if taken in excessive amounts Our most reliable scientific studies have found that fish oil does not reduce risk or prevent cardiovascular diseases strokes dementia diabetes macular degeneration or schizophrenia Alarmingly these studies show a significant increased risk of developing prostate cancer The truth must be told Dr Howes was the first in the history of Tulane School of Medicine to receive double doctorate degrees in medicine and biochemistry simultaneously He was the first to complete board eligibility in both general and plastic surgery at The Johns Hopkins Hospital all in a six year period Dr Howes invented the triple lumen venous catheter which has been credited with helping save the lives of over 20 million critically ill patients worldwide His catheter became the number one venous catheter in the world and his name is well recognized in over 100 countries He received the Harper Award from the American College for Advancement in Medicine and served as their keynote speaker and in 2013 he was the first to be awarded the Charles Farr award for excellence in oxidative medicine Dr Howes is one of the few physicians and medical scientists that will tell the raw truth concerning the failure of many dietary supplements and point out their potential harm In 2012 Americans spent 11 billion on omega 3 fish oil or on products containing omega 3 fish oil Yet books abound spouting lies of the miraculous benefits of these products The public has a right to know the truth
