*Fisheries Development, Fisheries Management, and Externalities* Richard Stanley Johnston,1992 **The Ecosystem Approach to Fisheries** Gabriella Bianchi,Hein Rune Skjoldal,2008-01-01 Sustainable use of aquatic ecosystems is high on regional national and international agendas and central to the implementation of international agreements on biological diversity fisheries and fish stock management This book covers theoretical and applied aspects of sustainable management with emphasis on addressing implementation issues Managing Transboundary Stocks of Small Pelagic Fish Max Agüero,Exequiel Gonzalez,1996-01-01 This booklet examines the efforts of Bangladesh Malawi and Pakistan to increase the number of girls in school These three countries have severe problems of access to education ranking in the bottom third of developing countries on UNESCO s Basic Education Index The document addresses several issues including how governments grapple with the deep seated cultural institutional and political factors that underlie the gender disparity in access to school how parents and communities feel about these attempts and what impact the reform efforts have on the people involved in managing and running the school system It also follows the lives of some of the girls who have benefited from the reforms Development of Rural Financial Markets to Sub-Saharan Africa Sabapathy Thillairajah,1994 World Bank Environment Paper 6 Here is a holistic approach to analyzing the environmental impact of various power systems Unlike standard impact studies that begin at the project level this method calls for environmental assessments that start at the planning stage of a national framework for energy policymaking The framework would take into account the energy needs of Sri Lanka s total economy It also would make it easier to incorporate environmental goals into power sector decisionmaking at the critical investment stage Sri Lanka s development options for the power sector are reviewed in detail Topics include alternative ways to assess the economic value of a power plant s impact on biodiversity human health and air and water pollution The study also assesses which energy planning options work best and recommends ways in which the Ceylon Electricity Board can improve its environmental policies Restructuring Large Industrial Firms in Central and Eastern Europe Gerhard Pohl,Simeon Djankov,Robert Edward Anderson,1996-01-01 This report addresses the most important challenges facing the Latin America and Caribbean region as it attempts to replace its traditional economic and social structures including populist institutions with a modern efficient administrative state The analysis focuses on the political economy of pending reforms and their ramifications The report discusses 1 recent economic and political developments 2 systemic issues such as high real interest and unemployment rates and declining export growth 3 social policies and the need to consolidate macroeconomic stability and 4 how to define and build the new Latin American state An appendix provides detailed information on selected country performance **Living Marine Resources** Edwin S. Iversen,2012-12-06 Living Marine Resources provides a thorough up to date introduction to all aspects of fisheries science This clearly written text offers insight into a topic of increasing importance the wise utilization and management of sea fisheries to maximize

production without exceeding their carrying capacity Adoption of the approaches presented will improve the conservation and management of the many world fisheries that are suffering from years of inefficient practices The book is divided into five sections beginning with an introduction to the ocean environment and the various resource species Part two examines fisheries biology including age growth fecundity and mortality enabling readers to appreciate yield models designed to give estimates of maximum sustainable yield and maximum economic yield The third part covers gear methods and landings and includes material on the handling and processing of seafood as well as aquaculture In part four yield models are presented to introduce students to theories on population dynamics stock assessment and management The book concludes with coverage of recreational fisheries including socioeconomic importance catch and effort research management techniques and their interface with commercial fisheries *Living Marine Resources* is an invaluable introduction to the subject for advanced undergraduate and graduate students of fisheries science In addition the material presented will be valuable to fishery and social scientists fishery officers and administrators and students in biology engineering economics and law *From Farmers to Fishers* Barry A. Costa-Pierce, 1997-01-01 With external financial help and advice Poland has made great strides toward sustainable growth The country's currency is stable its international creditworthiness has been restored and its private sector now accounts for two thirds of GDP This review evaluates the overall relevance efficacy and efficiency of World Bank assistance to Poland and finds that the Bank's technical advice and intellectual support were pivotal in facilitating the work of Polish reformers The book explores various stages in the evolution of the Bank's assistance to Poland systemic and institutional transformation and social improvement private sector and infrastructure development implementation and supervision and results and recommendations Boxes figures and tables illustrate the Bank's assistance strategy including information on the distribution of Bank resources among Central Eastern and European countries total Bank commitments to Poland by fiscal year and a summary of the strengths and weaknesses of Bank assistance to Poland *Guide to Fisheries Sector Studies* Andrew Palfreman, David Insull, 1994-01-01 In this document the fisheries sector is viewed primarily but not exclusively from an economic perspective It suggests that a sector study should assess the material benefits society gains from the fisheries sector and compare these with the human and financial resources employed in the sector It then suggests a sector study should recommend ways in which the balance of advantage to society can be improved The Guide emphasises that a sector study should be a relatively short and readable document It suggests that the key to a satisfactory study lies in the criteria governing the selection of material It provides advice on this issue The role of a sector study in the sector planning process is described Whilst the Guide views the fisheries sector primarily as an economic sector it is recognized that governments may view the sector as supplying other public benefits apart from a contribution to economic wellbeing The Guide emphasises that a sector study should consider unpriced environmental effects originating outside the sector and impacting upon it and those generated within the sector which have effects within the sector or elsewhere The Guide

provides advice to the sponsors of sector studies notably with regard to the selection of consultants and the preparation of terms of reference The document also contains advice on the management of sector studies and on the content and presentation of the final report **Issues for Infrastructure Management in the 1990s** Arturo Israel,1992-01-01

Proceedings of a Conference on Currency Substitution and Currency Boards Nissan Liviatan,1993-01-01 Eighteen well known policymakers and economists discuss the rising use of currency substitution in Latin America They examine the effects of currency boards on substitute currencies and on national stabilization programs Latin American countries including Argentina Bolivia Peru and Uruguay increasingly use dollars as a substitute for domestic currency The experts debate whether the region should encourage or resist this trend Topics include the effects of substitution on inflation liquidity and exchange rates The discussions on Argentina Peru and Brazil focus on the ways in which currency boards have affected stabilization in these countries They consider whether such boards can strengthen fiscal discipline and speed economic adjustment A currency board issues money that is converted into a foreign reserve currency at a fixed exchange rate This independent institution takes over the central bank s role as the sole issuer of base money It also manages the exchange rate to keep the currency stable and convertible The Reform of Public Expenditures for Agriculture Bonni J. Van Blarcom,Odin

Knudsen,John Nash,1993-01-01 *The Transition in the Contribution of Living Aquatic Resources to Food Security* Meryl Williams,1996 The fishing industry s aggressive and expanding search for fish from the sea reached a turning point in 1990 After many years of increasing production the global marine and inland catch from natural stocks declined from the 1989 peak of about 89 million tons to 85 million tons in 1993 Aquaculture production did not increase enough to meet the shortfall and total production also fell in 1990 and 199 Present indications are that production from natural stocks will be below the current level in the year 2020 at best it will maintain its present level The author addresses five major issues 1 maximizing the use of aquatic resources 2 resource management 3 intensification of fisheries exploitation 4 integration of fisheries and aquaculture and 5 the difficult problem of balancing national versus international interests *Developing Effective*

*Employment Services* David Fretwell,Susan Goldberg,1993-01-01 Employment services promote the efficient allocation of labor by among other things promoting labor mobility and improving productivity This paper assesses the cost effectiveness of services designed to expedite the exchange of labor between job seekers and employers The authors find that the benefits of employment services are not uniform Benefits may be reduced in small countries with a large informal sector or when the economy is stagnant and the demand for labor is depressed even though the need for the services may be greater under such conditions The authors advocate a balance between public and private sector delivery of employment services They favor opening the private market for what they term support services which increase productivity and include income support and retraining Such support services are distinct from what the authors call core services provision of which they believe is properly left to the public sector Core services to assist job seekers include job placement services relocation assistance

counseling and skills assessment The authors find that core services are cost effective and that public sector providers can ensure that such services are delivered to unemployed low skilled or semiskilled workers whose needs may not be met by the private sector The paper reviews the justification for and development of employment services over time and compares various approaches to the provision of such services It reviews the various types of employment services and examines the differences between public and private sector delivery

**Borrower Ownership of Adjustment Programs and the Political Economy of Reform** John H. Johnson, Sulaiman S. Wasty, 1993-01-01 China has done much to reform its price system achieve macroeconomic stability and restore growth Nevertheless price distortions remain in three key areas This study suggests further price reforms for the energy grain and transport sectors It explains why energy price adjustments should have only a modest effect on consumer prices but a highly positive effect on the economy It discusses why China may have to reduce consumer subsidies to achieve the necessary reforms for grain prices The study describes what the government must do to strengthen commodity markets generate competition and make allowances for seasonal price variations China s transport sector has been a critical development bottleneck The paper reviews tariff adjustments and other reforms that would modernize the transport system and help it meet growing demand These reforms also would encourage energy conservation and help integrate the national economy

**Exporting High-value Food Commodities** Steven Jaffee, Peter Gordon, 1993-01-01 The economic integration of the European Community EC and its implications for Sub Saharan Africa are examined in this anthology

*The Maritime Transport Crisis* Hans Jürgen Peters, 1993-01-01 Effective planning and management of urban infrastructure is essential to improving the standard of living in rapidly developing urban areas Deterioration or cessation of services can create health risks limit economic productivity damage public and private property and lead to congestion in transport and communications But effective infrastructure services are impossible without adequate records and maps of municipal facilities particularly those underground The authors review recent developments in the recording and mapping of urban infrastructure The paper identifies the institutional organizational and technological issues involved and explores some strategic options for addressing these pressing issues The options discussed include how best to determine the proper institutional structure develop human resources and make the best use of technology The authors perceive an urgent need for development of legal frameworks to make recordkeeping more comprehensive and compatible among various utilities localities and governmental bodies They advise that immediate attention be given to a particular organizational issue in many utilities no one department is responsible for collecting and processing data and even when such responsibility is designated the methods to be used are unclear or the resources are inadequate The paper offers case studies and concludes that improvements in utility mapping and recordkeeping are cost effective enhance the efficiency of the utility and improve the overall quality of urban life

**The Contributions of Infrastructure to Economic Development** Christine Kessides, 1993-01-01 This paper reviews the linkages between infrastructure and economic

development based on both formal empirical research and informal case studies The main thesis is that economic benefits result from investments in infrastructure only to the extent that they generate a sustainable flow of services valued by consumers Thus an analysis of infrastructures contributions to growth must look at the impacts of services as actually perceived not at indirect indicators that measure only aggregate provision of infrastructure capital The paper notes that macro and industry level research although having its limitations suggest a positive and statistically significant relationship between infrastructure and economic output However the conclusions derived from this research most of which derives from developed countries provide little specific guidance for policy To gain more practical insights about how infrastructure contributes to economic growth and to improved quality of life and to understand the welfare costs of inadequate or unreliable infrastructure it is necessary to look at microeconomic evidence Particularly interesting illustrations of these relationships are to be found in developing countries where there is wide variance in the availability and quality of infrastructure
