Self-Deception's Puzzles and Processes Jason Kido Lopez, 2016-08-16 The contemporary literature on self deception was born out of Jean Paul Sartre s work on bad faith lying to oneself As time has progressed the conception of self deception has moved further and further away from Sartre s conception of bad faith In *Self Deception s Puzzles and Processes A Return to a Sartrean View* Jason Kido Lopez argues that this departure is a mistake and that we should return to thinking about self deception in a Sartrean fashion in which we are self deceived when we intentionally use the strategies and methods of interpersonal deception on ourselves Since literally tricking ourselves cannot work we will always see through our own self deception after all self deception merely consists of the attempt to trick ourselves in this way Other scholars have rejected this notion of self deception historically dismissing it as paradoxical Lopez argues first that it isn t paradoxical and he further suggests that moving away from this notion of self deception has caused the contemporary literature on the topic to be littered with disparate and conflicting theories Indeed there are a great many ways to avoid the allegedly paradoxical Sartrean notion of self deception and the resulting plethora of accounts lead to a fragmented picture of self deception If however the Sartrean view isn t paradoxical then there was no need for the host of contradictory theories and most researchers on self deception have missed what was originally so intriguing about self deception that it like bad faith is the process of literally trying to trick oneself into believing what is false

or unwarranted Self Deception s Puzzles and Processes will be of great interest to students and scholars of epistemology philosophy of mind psychology and continental philosophy and to anyone else interested in the problems of self deception
