shape the agenda for the social and cultural history of early modern England *Industrialisation and Society* Eric Hopkins, 2013-01-11 *Industrialisation and Society* provides an essential introduction to the effects of industrialisation on British society from Queen Victoria's reign to the birth of the welfare state in the 1940s. This book deals with the remarkable social consequences of the industrial revolution as Britain changed into an urban society based on industry. As the first nation to undergo an industrial revolution, Britain was also the first to deal with the unprecedented social problems of rapid urbanisation combined with an unparalleled growth in population. *Industrialisation and Society* looks at contemporary ways in which the government and ordinary people tried to cope with these new pressures and studies their reactions to the unforeseen consequences of the steam revolution. In particular, this indispensable book considers the Victorian inheritance, Edwardian England, and the Liberal reforms, the two world wars, the Welfare State.

Childhood Transformed Eric Hopkins, 1994 *Childhood Transformed* provides a pioneering study of the remarkable shift in the nature of working class childhood in the nineteenth century from lives dominated by work to lives centered around school. The author argues that this change was accompanied by substantial improvements for many in the home environment in health and nutrition and in leisure opportunities. The book breaks new ground in providing a wide-ranging survey of different aspects of childhood in the Victorian period: the early chapters examine life at work in agriculture and industry in the home and elsewhere, while the later chapters discuss the coming of compulsory education together with changes in the home and in leisure activities. A separate section of the book is devoted to the treatment of deprived children: those in and out of the workhouse, on the streets and also in prison, industrial schools and reformatories. Offering a fresh and more focused approach to the history of working class children, this book should be of interest to all lecturers and students of nineteenth-century social history.

Education in Early Modern England Helen Jewell, 1999-01-18 Covering the period c 1530–c 1760, this book analyses the aims, facilities and achievements across all levels of education in England, institutional and informal, acknowledging in context the education situation in the rest of the British Isles, western Europe and North America.

Consumption and the World of Goods John Brewer, Roy Porter, 2013-06-17 The study of past society in terms of what it consumes rather than what it produces is, relatively speaking, a new development. The focus on consumption changes the whole emphasis and structure of historical enquiry. While human beings usually work within a single trade or industry as producers—as, say, farmers or industrial workers—as consumers they are active in many different markets or networks. And while history written from a production viewpoint has by chance or design largely been centred on the work of men, consumption history helps to restore women to the mainstream. The history of consumption demands a wide range of skills. It calls upon the methods and techniques of many other disciplines, including archaeology, sociology, social and economic history, anthropology, and art criticism. But it is not simply a melting pot of techniques and skills brought to bear on a past epoch. Its objectives amount to a new description of a past culture in its totality as perceived through its patterns of consumption in goods and services. *Consumption and the World*

of Goods is the first of three volumes to examine history from this perspective and is a unique collaboration between twenty six leading subject specialists from Europe and North America The outcome is a new interpretation of the seventeenth and eighteenth centuries one that shapes a new historical landscape based on the consumption of goods and services

have been disparaged as narrowly didactic and redundant to the history of ideas Mary Hilton's book serves as a corrective to these biases by culturally contextualising the popular educational writings of leading women moralists and activists including Sarah Fielding Hester Mulso Chapone Catherine Macaulay Mary Wollstonecraft Hannah More Sarah Trimmer Catharine Cappe Priscilla Wakefield Maria Edgeworth Jane Marcet Elizabeth Hamilton Mary Carpenter and Bertha von Marenholtz Bulow Over a hundred year period from the rise of print culture in the mid eighteenth century to the advent of the kindergarten movement in Britain in the mid nineteenth a variety of women intellectuals from strikingly different ideological and theological milieux supported embellished critiqued and challenged contemporary public doctrines by positioning themselves as educators of the nation's young citizens Of particular interest are their varying constructions of childhood expressed in a wide variety of published texts including tales treatises explanatory handbooks and collections of letters By explicitly and consistently connecting the worlds of the schoolroom the family and the local parish to wider social religious scientific and political issues these women's educational texts were far more influential in the public realm than has been previously represented Written deliberately to change the public mind these texts spurred their many readers to action and reform

The Demography of Victorian England and Wales Robert Woods, 2000-10-05 The Demography of Victorian England and Wales uses the full range of nineteenth century civil registration material to describe in detail for the first time the changing population history of England and Wales between 1837 and 1914 Its principal focus is the great demographic revolution which occurred during those years especially the secular decline of fertility and the origins of the modern rise in life expectancy But Robert Woods also considers the variable quality of the Victorian registration system the changing role of what Robert Malthus termed the preventive check variations in occupational mortality and the development of the twentieth century class mortality gradient and the effects of urbanisation associated with the significance of distinctive disease environments The volume also illustrates the fundamental importance of geographical variations between urban and rural areas This invaluable reference tool is lavishly illustrated with numerous tables figures and maps many of which are reproduced in full colour

The Voluntary City David T. Beito, Peter Gordon, Alexander Tabarrok, 2009-10-01 Assembling a rich history and analysis of large scale private and voluntary community based provision of social services urban infrastructure and community governance this book provides suggestions on how to restore the vitality of city life Historically the city was considered a center of commerce knowledge and culture a haven for safety and a place of opportunity Today however cities are widely viewed as centers for crime homelessness poverty unemployment traffic pollution and other social ills In many cities government increasingly dominates life consuming vast resources to cater to special interest groups Decision making has become intensely politicized bureaucratic and largely unaccountable to the populace The Voluntary City provides a rich history and analysis of private locally based provision of social services urban infrastructure and community governance Such systems have offered superior education transportation housing crime control recreation health care and

employment by being more effective innovative and responsive than those provided through special interest politics and bureaucracy The Voluntary City reveals how the process of providing local public goods through the dynamism of freely competitive market based entrepreneurship is unmatched in renewing communities and strengthening the bonds of civil society A refreshing challenge to the orthodoxy that government alone can improve community life The Voluntary City will be an essential reference for anyone interested in the future of cities including scholars and students policy makers civic and business leaders and urban citizens Literacy in American Lives Deborah Brandt,2001-05-28 This book addresses critical questions facing public education at the twenty first century **Bedford's Victorian Pilgrim** Michael Brealey,2014-07-08 A close reading of the life and letters of William Hale White shows that some misunderstandings have arisen in the interpretation of this important figure The book offers such significant issues as doubt loss of faith and crises over vocation and church This work represents a revisionist approach to William Hale White It corrects previous studies at some important points questions existing interpretations and employs new theoretical strategies alongside fresh research in primary sources
