educator What's Wrong with Our Schools Michael C. Zwaagstra, Rodney A. Clifton, John C. Long, 2010-07-16 What's Wrong with Our Schools and How We Can Fix Them examines the status of public education in North America and exposes many of the absurd instructional practices found in all too many schools. Written by three experienced educators, this book provides readers with a direct window into public education. The language is straightforward, the case studies based on real events, and the research evidence clearly presented. With chapter titles like *Subject Matter Matters*, *A Pass Should be Earned*, and *There is Too Much Edu Babble*, the authors systematically demolish the ridiculous fads that have taken hold of public education. As unashamed apologists for the importance of knowledge and content in school curricula, the authors clearly show why the views of romantic progressives like those of popular author Alfie Kohn fail to stand up to rigorous scrutiny. A consistent focus on common sense permeates this book and provides parents, teachers, and administrators with practical ways in which they can help improve public education. Anyone interested in the future of public education will benefit from reading this book. For more information, visit [www.fixingourschools.com](http://www.fixingourschools.com).

**The Wrong Direction** Richard S. Hancock, 2005 Is our public education system headed in the wrong direction? Richard Hancock asks us not only to scrutinize education but to consider crucial pragmatic revisions. He looks hard at some of the negative trends which have become entrenched, including grade inflation and social promotion, and a variety of biases which undermine the integrity of the system. He suggests workable solutions. The book addresses a wide audience: students, parents, educators, and administrators in the public system and realms of higher learning; government members, professionals, service, and business people. Hancock also refers to others who are striving to bring the plight of the system to the attention of the public and the educational policy makers. We cannot continue to stifle the brilliant, condescend to special interest groups, and ignore the average students cheating them all of pride in honest achievement. Perhaps it is time to encourage and honour excellence. This is at once a warning and a voice encouraging us to act on behalf of our children and our nation.

**Critical Issues in Education** Jack L. Nelson, Stuart B. Palonsky, Mary Rose McCarthy, 2017-07-27 Few subjects engender more strongly held beliefs and contrary views than education. The outcomes of debates over education and educational reform impact all citizens. Media coverage of these controversies is sometimes shallow and one-sided, fostering the need to develop critical thinking skills. These skills, in turn, open opportunities for personal growth, joining the public debate, and helping others participate in critical discussions. The authors of *Critical Issues in Education* present two opposing positions for each of sixteen different hot-button issues, including multiculturalism, school finance, charter schools, teacher evaluation, cyberbullying, and gender equity. Prospective teachers will find the authors' approach eye-opening and stimulating. Ideally, they will teach these valuable skills to their students, who will prosper academically and personally from understanding and considering diverse viewpoints.

*Ethical Leadership and Decision Making in Education* Joan Poliner Shapiro, Jacqueline A. Stefkovich, 2010-07-02 The third edition of the best-selling text *Ethical Leadership and Decision Making in Education* continues to address the increasing interest in ethics and assists

educational leaders with the complex dilemmas in today's challenging and diverse society. Through discussion and analysis of real-life moral dilemmas that educational leaders face in their schools and communities, authors Shapiro and Stefkovich demonstrate the application of their four ethical paradigms: the ethics of justice, care, critique, and profession. After an illustration of how the Multiple Ethical Paradigm approach may be applied to real dilemmas, the authors present a series of cases written by students and academics in the field representing the dilemmas faced by practicing educational leaders in urban, suburban, and rural settings in an era full of complexities and contradictions. Following each case are questions that call for thoughtful, complex thinking and help readers come to grips with their own ethical codes and apply them to practical situations. New in the Third Edition: An entire new chapter on privacy versus safety including ethical issues such as strip searches, gang membership, cyberbullying, and sexting. New cases infused into chapters on early childhood education, diverse student populations, and technology. Updates throughout to reflect contemporary issues and recent scholarship in the field of ethical leadership. Including teaching notes for the instructor stressing the importance of self-reflection, this text is easily adaptable for a variety of uses with a wide range of audiences. *Ethical Leadership and Decision Making in Education* is a valuable book for both aspiring and practicing administrators, teacher leaders, and educational policy makers.

*The Neuroscience of Adult Learning* Sandra Johnson, Kathleen Taylor, 2011-10-13. This timely volume examines links between the emerging neurobiological research on adult learning and the adult educators' practice. Now that it is possible to trace the pathways of the brain involved in various learning tasks, we can also explore which learning environments are likely to be most effective. Topics explored in *The Neuroscience of Adult Learning* include basic brain architecture and executive functions of the brain; how learning can repair the effects of psychological trauma on the brain; effects of stress and emotions on learning; the centrality of experience to learning and construction of knowledge; the mentor-learner relationship; intersections between best practices in adult learning and current neurobiological discoveries. Volume contributors include neurobiologists, educators, and clinical psychologists who have illuminated connections between how the brain functions and how to enhance learning. Although the immediate goal of this volume is to expand the discourse on adult teaching and learning practices, the overarching goal is to encourage adult learners toward more complex ways of knowing. This is the 110th volume of *New Directions for Adult and Continuing Education*, a quarterly publication published by Jossey-Bass.

*The Rise of Common-Sense Conservatism* Antti Lepistö, 2021-04-20 In the years following the election of Donald Trump a victory that hinged on the votes of white Midwesterners who were both geographically and culturally distant from the media s coastal concentrations there has been a flurry of investigation into the politics of the so called common man The notion that the salt of the earth purity implied by this appellation is best understood by conservative politicians is no recent development though As Antti Lepistö shows in his timely and erudite book the intellectual wellsprings of conservative common sense discourse are both older and more transnational than has been thought In considering the luminaries of American neoconservative thought among them Irving Kristol Gertrude Himmelfarb James Q Wilson and Francis Fukuyama Lepistö argues that the centrality of their conception of the common man accounts for the enduring power and influence of their thought Intriguingly Lepistö locates the roots of this conception in the eighteenth century Scottish Enlightenment revealing how leading neoconservatives weaponized the ideas of Adam Smith Thomas Reid

and David Hume to denounce postwar liberal elites educational authorities and social reformers Their reconfiguration of Scottish Enlightenment ideas ultimately gave rise to a defining force in modern conservative politics the common sense of the common man Whether twenty first century politicians who invoke the grievances of the people are conscious of this unusual lineage or not Lepist explains both the persistence of the trope and the complicity of some conservative thinkers with the Trump regime     *Teaching and Understanding Pneumatology & Spiritual Gifts* Elijah E.
