*Education, Democracy and Development* Clive Harber, Vusi Mncube, 2012-05-14 Education is often seen as the key agency in international development and poverty reduction Frequently the emphasis is on the economic and social role of education in development This book on the other hand is unusual in explicitly examining the political role of education in development In particular it sets out the theories evidence and arguments concerning the potential and actual relationships between education and democracy and critically explores the contradictory role of formal education in both supporting and hindering democratic political development A key theme of the book is the importance of considering the type and nature of the education actually provided and experienced what goes on inside the black box of education Currently in developing countries and elsewhere this is often at odds with democratic principles but the book also provides many examples of successful democratic practice in schools in developing countries as well as discussing a detailed case study of South Africa where democratic change in education is a key aspect of the policy agenda

**World Bank Financing of Education** Phillip W. Jones, 2007-02-12 Based on detailed analysis of thousands of confidential World Bank

documents this book demonstrates that the World Bank lies at the centre of the major changes in global education of our time. It outlines the evolution of World Bank lending policies in education and assesses the policy impact of the Bank's educational projects looking at how it has shaped the economic and social policies of many governments including policies that affect education. It has been an influential proponent of the rapid expansion of formal education systems around the world financing much of that expansion. It has been instrumental in forging those policies that see education as a precursor to modernisation served as a major purveyor of Western ideas about how education and the economy are or should be related. Following on from the success of the first edition this revised edition covers topical issues of globalisation and looks into the political debate concerning aid to developing countries. It will be of enormous value to those studying or working in educational policy in developing countries, international organisations and financial institutions and aid agencies.

*Politics of Educational Innovations in Developing Countries* Nelly P. Stromquist, Michael L. Basile, 2003-08-29 In the educational arena new ideas often compete as solutions to recurrent problems making the concept of innovations a widespread discursive term. While expectations are substantial for each innovation, implementation of ideas has shown them to be more modest in practice. This book examines innovations in several developing countries presenting case studies of technological, curricular and organizational innovations selected for their magnitude in financial investment, scope and duration. The case studies explore the social and political contexts that shaped the features of these innovations and what they accomplished over time in terms of teacher cost reduction, status, mobility, access to education and national unity. The experience of countries such as Brazil, Lesotho, the Philippines and Namibia and the influence of international agencies such as the World Bank are described and analyzed against theories of social and organizational change. The case studies themselves also serve as subjects for reflection on the prevailing positivist approaches to research and knowledge. The *Politics of Educational Innovations* should be of considerable interest to students of educational change whether in the academic world or in the fields of government and international cooperation.

**Education and Society in Hong Kong: Toward One Country and Two Systems** Gerard A. Postiglione, Julian Leung Yat Ming, 2017-09-29 This title was first published in 1992. *Education in Southern Africa* Clive Harber, 2013-09-12 *Education in Southern Africa* is a comprehensive critical reference guide to education in the region. With chapters written by an international team of leading regional education experts, the book explores the education systems of each country in the region. With chapters covering Botswana, Lesotho, Madagascar, Mozambique, Namibia, South Africa, Swaziland and Zimbabwe, the book critically examines the development of education provision in each country as well as local and global contexts.
