lines provides a compelling model for other groups to successfully influence change Patricia Zavella experienced firsthand the trials and judgments imposed on a working professional mother of color her own commitment to academia was questioned during her pregnancy as she was shamed for having children too young And when she finally achieved her professorship she felt out of place as one of the few female faculty members with children These experiences sparked Zavella's interest in the movement for reproductive justice In this book she draws on five years of ethnographic research to explore collaborations among women of color engaged in reproductive justice activism While there are numerous organizations focused on reproductive justice most are racially specific such as the National Asian Pacific American Women's Forum and Black Women for Wellness Yet Zavella reveals that many of these organizations have built coalitions among themselves sharing resources and supporting each other through different campaigns and struggles While the coalitions are often regional or even national the organizations themselves remain racially or ethnically specific presenting unique challenges and opportunities for the women involved Zavella argues that these organizations provide a compelling model for negotiating across differences within constituencies In the context of the war on women's reproductive rights and its disproportionate effect on women of color and increased legal violence toward immigrants and now incorporating an updated preface addressing the Dobbs decision which struck down Roe v Wade The Movement for Reproductive Justice demonstrates that a truly intersectional movement built on grassroots organizing culture shift work and policy advocating can offer visions of strength resiliency and dignity for all

*Empowerment as Ceremony* William Epstein, 2017-07-28 Many people in the United States are poor lead marginal lives and need jobs as well as basic services such as education medical care and housing Multitudes in other parts of the world in addition to being poor are jailed tortured and killed for being members of the wrong ethnic group or expressing political opinions Those who argue for empowerment claim it is a magic bullet It can liberate the oppressed largely through self organization self motivation self invention and even self clarity William M Epstein sees contemporary empowerment practice in the United States as a civic church of national values one better in performing its ceremonial role than god based houses of worship By itself empowerment is not worth the effort of commentary since it achieves none of its goals and has not even generated a respectable critical literature But Epstein argues that empowerment practice and American social welfare both embody prescriptive cultural preferences Like art and music empowerment opens windows into deeper social meaning The social sciences have carved out roles for themselves by looking for simple remedies ones that are inexpensive and compatible with contemporary social arrangements Epstein shows that those in social work practices have not only deluded themselves into thinking that these services have real instrumental value but really operate at cross purposes This accessible work will attract critical attention among these professional groups It bases its carefully documented insights upon informed sociological and anthropological theory

Racism, Sexism, and the Media Clint C Wilson II,Felix Gutierrez,Lena Chao,2012-10-03 The Fourth Edition of *Racism Sexism and the Media* examines how different race ethnic and

gender groups fit into the fabric of America how the media influence and shape everyone's perception of how they fit and how the media and advertisers are continuously adapting their communications to effectively reach these groups The authors explore how the rise of class group focused communication resulting from the convergence of new media technologies and continued demographic segmentation of audiences has led media outlets and advertisers to see women and people of color as influential key audiences and target markets as well as a source of stereotypes which may lead to media insensitivity and may help perpetuate social inequity The Fourth Edition includes updated content on topics covered in the previous editions and new material on women of color including an integrated assessment of their media experiences new material on Muslim Arab and Asian groups new technologies and social media use and their impact [More Than Medicine](#) Jennifer

Nelson,2015-03-06 In 1948 the Constitution of the World Health Organization declared Health is a state of complete physical mental and social well being and not merely the absence of disease or infirmity Yet this idea was not predominant in the United States immediately after World War II especially when it came to women's reproductive health Both legal and medical institutions and the male legislators and physicians who populated those institutions reinforced women's second class social status and restricted their ability to make their own choices about reproductive health care In [More Than Medicine](#) Jennifer Nelson reveals how feminists of the 60s and 70s applied the lessons of the new left and civil rights movements to generate a women's health movement The new movement shifted from the struggle to revolutionize health care to the focus of ending sex discrimination and gender stereotypes perpetuated in mainstream medical contexts Moving from the campaign for legal abortion to the creation of community clinics and feminist health centers Nelson illustrates how these activists revolutionized health care by associating it with the changing social landscape in which women had power to control their own life choices [More Than Medicine](#) poignantly reveals how social justice activists in the United States gradually transformed the meaning of health care pairing traditional notions of medicine with less conventional ideas of healthy social and political environments
