Give And Take Of Everyday Life:

The Give and Take of Everyday Life Bambi B. Schieffelin, 1990-06-29 In this study of language socialization among the Kaluli people of Papua New Guinea Bambi B Schieffelin examines the everyday speech activities between children and members of their families linking them to other social practices and symbolic forms such as exchange systems gender roles sibling relationships rituals and myths In Kaluli society as in many others in Papua New Guinea reciprocity plays a primary role in social life In families social relationships are constituted through giving and sharing food Children however are also socialized through language to refuse to share creating a tension in daily interactions Issues of authority autonomy and interdependence are negotiated through these verbal exchanges Schieffelin demonstrates how language plays a fundamental role in the production meaning and interpretation of these activities as it is the medium of social practice Through the micro analysis of social interactions Schieffelin shows how values regarding reciprocity gender relations and language itself are indexed and socialized in everyday talk to children and how children s own ways of speaking express fundamental cultural concerns about their social relationships

Social Ontology of Whoness Michael Eldred, 2018-10-26 How are core social phenomena to be understood as modes of being This book offers an alternative approach to social ontology Recent interest in social ontology on the part of mainstream philosophy and the social sciences presupposes from the outset that the human being can be cast as a conscious subject whose intentionality can be collective By contrast the present study insistently poses the crucial question of who the human being is and how they sociate as whos Such whoness is a clean cut departure from the venerable tradition of questioning whatness quidditas essence in philosophical thinking Casting human being hermeneutically as whoness opens up new insights into how human beings sociate in interplays of mutual estimation that are simultaneously social power plays Hitherto the ontology of social power in all its various guises has only ever been implicit This book makes it explicit The kind of social power prevalent in capitalist societies is that of the reified value embodied in commodities money capital co Reified value itself is constituted through an interplay of mutual estimation among things that reflects back on the power interplay among whos In this way a new critique of capitalism becomes possible
