Our Success By Adam M. Grant Shortcut Edition, 2021-06-04 Our summary is short simple and pragmatic It allows you to have the essential ideas of a big book in less than 30 minutes As you read this summary you will learn how some styles of reciprocity are detrimental to professional relationships and conversely how others promote them You will understand why donors are generally better able to develop their careers You will also discover that there are three types of reciprocity give exchange take success involves a significant factor one's attitude and the way one interacts with others those who succeed best professionally but also those who succeed the least are donors There are two types of donors the donor's style of reciprocity often pays off in the long run because he or she gains confidence over time takers can be unmasked having interpersonal skills facilitates the building of a useful network It is common to attribute professional success to a career minded individual who strongly dominates his or her colleagues However manipulation and violence are not necessary to be promoted to an interesting position On the contrary individuals often function as exchangers and do not appreciate being exploited for the exclusive benefit of someone other than themselves Taking the needs of others into consideration makes it possible to move forward while remaining productive Acting with generosity is even likely to increase one's potential for success Buy now the summary of this book for the modest price of a cup of coffee **Give and Take** Adam

Brannen, Gail Wilson, 2023-08-09 Originally published in 1987 now with a new preface the focus of this book is the distribution of material resources notably money work care and food within and between households Hitherto social policy research had tended to roll households and families into one and consider them as private spheres which only connected with society via the male head of household the breadwinner Examination of resource distribution had stopped short at the door of the household The contributors to Give and Take in Families open up the Black Box of the family and explore the assumption that resources are equitably distributed between household members A dominant concern is with gender relations Each study attempts to make women as resources in caring for other people as providers of income as transformers of income into goods and services visible in the household unit Findings from nine empirical studies are presented examining resource distribution in relation to the composition of households and the life cycles and life experiences of household members A wide variety of household types is considered and attention is given to households undergoing changes such as divorce and unemployment that are likely to have major implications for household structure and resources The implications of these innovative and thought provoking studies for social policy are considerable with relevance to the fields of inequality and income support the provision of care for children and the elderly the labour market and divorce law This book will still appeal to practising researchers and students in the social sciences particularly women s studies

**Community Building in the Online Classroom** Dominique Moyse Steinberg, 2021-06-15 This book offers theories principles and strategies for developing the online classroom as a deep and full learning community that students feel is truly about by and for them To be immediately useful it offers practical ideas for helping students to actively contribute to shaping classroom affairs toward relevance and meaning However in order to elevate the discussion beyond the primer level the book anchors those ideas in social and educational principles and theories As social learning theories posit deep and full learning occurs when our full cognitive emotional and social selves are engaged This book mitigates the challenges to such engagement in the virtual classroom arguing that a strong sense of community ownership will enhance students ability to successfully master content Although not all strategies are group based the use of groups both large and small is a primary way of helping online students to become active on their own behalf in building a learning community that meets their needs Strategies outlined here focus primarily on promoting shared

authority visibility and voice and on encouraging student disclosure of needs and peer connection

Growing Up Suburban Edward A. Wynne, 2014-09-10 The prosperous comfortable and homogeneous American suburb is a relatively recent institution in American history Edward Wynne was one of the first to take a serious look at the quality of suburban childhood where he contends we have ignored the developments affecting the largest pool of children and parents in America This provocative volume argues that the total environment of the suburban youth the school the community the family and the workplace is in need of drastic reform Wynne advances a forthright argument for the preservation of traditional moral values and criticizes excessive individualism in fragmented modern society Focusing on the schools and extending his discussion to the larger community he pleads for more attention to such goals as honesty persistence patriotism and loyalty Post industrial suburban environments Wynne argues do not provide the diversity of experience children must have to become successful adults Strong community ties to the schools are basic to Wynne's thesis Within the schools he recommends changes in grading systems student responsibilities and assignments selection and training of teachers and administrators structuring and evaluation of programs and the socioeconomic and age mix of pupils A feeling of cooperation and unity within the school itself is a major goal Wynne also suggests steps for moving toward more heterogeneous close knit communities where citizens have greater local control For example community members could restrict movement into the community and should aim for a mix of blue and white collar residents Wynne's arguments clearly run counter to fashion and are sure to provoke a high level of debate among educators of differing philosophic persuasions Civil libertarians feminists civil rights advocates and others are bound to make spirited replies to many of Wynne's contentions *Growing Up Suburban* will be of interest to

educators public school administrators parents and suburban dwellers      *The Giving and Taking of Life* James Tunstead Burtchaell,1989 A discussion of the development of the central tenets of liberal Catholic Christian ethics The author contends that moral wisdom does not derive from either moral law or ecclesiastical authority but emerges from active reflection on the experience of those living out of the traditions of a community of believers In particular he develops the insight that it is in giving and sustaining life that we come to life As many outside the tradition from which he writes share this insight and because he appeals to considerations shared by non Catholic even humanistic traditions Burtchaell s book will be of interest to anyone concerned about the controversial positions he takes on leading moral issues of the day such as contraception abortion research on aborted foetal tissue liberation theology terrorism and the relationship between law and morality
