## **Glacial Marine Sedimentation Paleoclimatic Significance Special Paper No 261:**

**Glacial Marine Sedimentation** John B. Anderson, Gail Mowry Ashley, 1991-01-01 The papers in this collection are based on a symposium held at the 1988 annual meeting of the Geological Society of America with the objective of identifying sedimentary criteria and facies models that can be used to characterize the glacial climate setting of ancient sedimentary sequences Includes papers on Antarctica Alaska and Ellesmere Island and a brief literature review *U.S. Geological Survey Professional Paper*, 1984 **Glaciers of North America** Richard S. Williams (Jr.), Jane G. Ferrigno, 2002 *U.S. Geological Survey Professional Paper* Richard S. Williams, Jane G. Ferrigno, 2002 Modern and Past Glacial Environments John Menzies, 2002-01-16 In combining and revising the two titles Past Glacial Environments and Modern Glacial Environments Dr Menzies provides a current and comprehensive survey of both the glaciology geomorphology and sedimentology of glaciers **Late Paleozoic Glacial Events and Postglacial Transgressions in Gondwana** Oscar R. López-Gamundí, Luis A. Buatois, 2010 **Earth's Glacial Record** M. Deynoux, J. M. G. Miller, E. W. Domack, 1994 This book discusses glacial or glacially controlled sequences as markers of the Earth's geodynamic and climatic history *Seafloor Geomorphology as Benthic Habitat* Peter Harris, Elaine Baker, 2011-11-21 The conservation of marine benthic biodiversity is a recognised goal of a number of national and international programs such as the United Nations Convention on Biodiversity CBD In order to attain this goal information is needed about the distribution of life in the ocean so that spatial conservation measures such as marine protected areas MPAs can be designed to maximise protection within boundaries of acceptable dimensions Ideally a map would be produced that showed the distribution of benthic biodiversity to enable the efficient design of MPAs The dilemma is that such maps do not exist for most areas and it is not possible at present to predict the spatial distribution of all marine life using the sparse biological information currently available Knowledge of the geomorphology and biogeography of the seafloor has improved markedly over the past 10 years Using multibeam sonar the benthic ecology of submarine features such as fjords sand banks coral reefs seamounts canyons mud volcanoes and spreading ridges has been revealed in unprecedented detail This book provides a synthesis of seabed geomorphology and benthic habitats based on the most recent up to date information Introductory chapters explain the drivers that underpin the need for benthic habitat maps including threats to ocean health the habitat mapping approach based on principles of biogeography and benthic ecology and seabed geomorphic classification schemes Case studies from around the world are then presented They represent a range of seabed features where detailed bathymetric maps have been combined with seabed video and sampling to yield an integrated picture of the benthic communities that are associated with different types of benthic habitat The final chapter examines critical knowledge gaps and future directions for benthic habitat mapping research Reviews and compares the different methodologies currently being used Includes global case studies Provides geological expertise into what has traditionally been a biological discipline **Bibliography on Cold Regions Science and**

**Technology**, 1992      **Deglacial History and Relative Sea-level Changes, Northern New England and Adjacent Canada** Thomas K. Weddle, Michael J. Retelle, 2000 The 13 papers in this collection examine the coastal regions the Gulf of Maine and the continental shelf off of Atlantic Canada in context with new radiocarbon age analyses providing a detailed history of climate changes marine transgression emergence and relative sea level history Specific topics include deglaciation of the Gulf of Maine Late Quaternary morphogenesis of a marine limit delta plain in southwest Maine morainal banks and the deglaciation of coastal Maine and glacial dynamics deglaciation and marine invasion in southern Quebec Material originated at a March 1998 symposium held in Maine at the 33rd Annual Meeting of the Northeastern Section of the Geological Society of America Weddle is affiliated with the Maine Geological Survey Retelle teaches geology at Bates College Annotation copyrighted by Book News Inc Portland OR      Antarctic Climate Evolution Fabio Florindo, Martin Siebert, 2008-10-10 Antarctic Climate Evolution is the first book dedicated to furthering knowledge on the evolution of the world's largest ice sheet over its 34 million year history This volume provides the latest information on subjects ranging from terrestrial and marine geology to sedimentology and glacier geophysics An overview of Antarctic climate change analyzing historical present day and future developments Contributions from leading experts and scholars from around the world Informs and updates climate change scientists and experts in related areas of study      *Proceedings of the Third Glacier Bay Science Symposium*, 1993 Daniel R. Engstrom, 1995      **Canadian Journal of Earth Sciences**, 1998      **Formation, evolution, and stability of coastal cliffs : status and trends**, 2004      **The Geological Record of Neoproterozoic Glaciations** Emmanuelle Arnaud, Galen P. Halverson, Graham Shields-Zhou, 2011 In recent years interest in Neoproterozoic glaciations has grown as their pivotal role in Earth system evolution has become increasingly clear One of the main goals of the IGCP Project number 512 was to produce a synthesis of newly available information on Neoproterozoic successions worldwide This Memoir consists of a series of overview chapters followed by site specific chapters The overviews cover key topics including the history of research on Neoproterozoic glaciations identification of glacial deposits chemostratigraphic techniques and datasets palaeomagnetism biostratigraphy geochronology and climate modelling The site specific chapters include reviews of the history of research on these rocks and up to date syntheses of the structural framework tectonic setting palaeomagnetic geochronological constraints physical biological and chemical stratigraphy and descriptions of the glaciogenic and associated strata including economic deposits      **Guidebook for Geological Field Trips in New England** Geological Society of America. Annual Meeting, 2001      **The Geologic Time Scale 2012** F M Gradstein, 2012-08-14 The Geologic Time Scale 2012 winner of a 2012 PROSE Award Honorable Mention for Best Multi volume Reference in Science from the Association of American Publishers is the framework for deciphering the history of our planet Earth The authors have been at the forefront of chronostratigraphic research and initiatives to create an international geologic time scale for many years and the charts in this book present the most up to date international standard as ratified by the International Commission on Stratigraphy and

the International Union of Geological Sciences This 2012 geologic time scale is an enhanced improved and expanded version of the GTS2004 including chapters on planetary scales the Cryogenian Ediacaran periods systems a prehistory scale of human development a survey of sequence stratigraphy and an extensive compilation of stable isotope chemostratigraphy This book is an essential reference for all geoscientists including researchers students and petroleum and mining professionals The presentation is non technical and illustrated with numerous colour charts maps and photographs The book also includes a detachable wall chart of the complete time scale for use as a handy reference in the office laboratory or field The most detailed international geologic time scale available that contextualizes information in one single reference for quick desktop access Gives insights in the construction strengths and limitations of the geological time scale that greatly enhances its function and its utility Aids understanding by combining with the mathematical and statistical methods to scaled composites of global succession of events Meets the needs of a range of users at various points in the workflow researchers extracting linear time from rock records students recognizing the geologic stage by their content **Field Trip Guidebook for the Northeastern United States, 1993 Boston GSA** New England Intercollegiate Geological Conference.
