Glaciers Climate Geophysical Geomorp:

Geomorphology of Desert Environments Anthony J. Parsons,A. D. Abrahams,2009-03-20 About one third of the Earth s land surface experiences a desert climate and this area supports approximately 15% of the planet s population This percentage continues to grow and with this growth comes the need to acquire and apply an understanding of desert geomorphology Such an understanding is vital in managing scarce and fragile resources and in mitigating natural hazards This authoritative reference book is comprehensive in its coverage of the geomorphology of desert environments and is arranged thematically It begins with an overview of global deserts proceeds through treatments of weathering hillslopes rivers piedmonts lake basins and aeolian surfaces and concludes with a discussion of the role of climatic change Written by a team of international authors all of whom are active in the field the chapters cover the spectrum of desert geomorphology

Geomorphology Robert S. Anderson,Suzanne P. Anderson,2010-06-17 This textbook provides a modern quantitative and process oriented approach to equip students with the tools to understand geomorphology Insight into the interpretation of landscapes is developed from basic principles and simple models and by stepping through the equations that capture the essence of the mechanics and chemistry of landscapes Boxed worked examples and real world applications bring the subject to life for students allowing them to apply the theory to their own experience The book covers cutting edge topics including the revolutionary cosmogenic nuclide dating methods and modeling highlights links to other Earth sciences through up to date summaries of current research and illustrates the importance of geomorphology in understanding environmental changes Setting up problems as a conservation of mass ice soil or heat this book arms students with tools to fully explore processes understand landscapes and to participate in this rapidly evolving field Arid and Semi-Arid Geomorphology

Climate Change and Society R. K. Ganjoo, M. N. Koul, 2025-01-20 This book provides detailed information on the Northwestern Himalayas in India. The scientific data compiled in the book is based on more than two decades of field and laboratory studies by the authors. The Ladakh region is a well known cold desert with unique geological and climatic setting. The influence of Westerlies in the region has played significant role in the Ladakh region to behave much differently than rest of the Himalaya. The Karakorum Anomaly has been a key factor in negating the effect of global climate change in this region of Himalaya. The scientific discussion of some major glaciers of the region as case study are also discussed in this book. The uniqueness of the region with respect to climate shall be elaborated with the help of case studies.

Geomorphological Hazards and Disaster Prevention Irasema Alcántara, Andrew S. Goudie, 2010-03-04 A state of the art assessment of how geomorphology contributes to the comprehension mapping and modelling of hazardous Earth surface processes.

Climate Variability and Ecosystem Response at Long-Term Ecological Research Sites David Greenland, Douglas G. Goodin, Raymond C. Smith, 2003-10-09 This volume in the Long Term Ecological Research Network Series would present the work that has been done and the understanding and database that have been developed by work on climate change done at all the LTER sites. Global climate change is a central issue facing the world which is being worked on by a very large number of scientists across a wide range of fields. The LTER sites hold some of the best available data measuring long term impacts and changes in the environment and the research done at these sites has not previously been made widely available to the broader climate change research community. This book should appeal reasonably widely outside the ecological community and because it pulls together information from all 20 research sites it should capture the interest of virtually the entire LTER research community.
