*Post-industrial Era* Sophie Wolf, Laura Hindelang, Francine Giese, Anne Krauter, 2024-06-06 Glass is one of the most fascinating and versatile building materials in architectural history The new insights into glass in architecture are the result of research at the intersection of glass production construction technology and building culture Coming from a variety of disciplines the contributions bridge the divide between natural sciences humanities and the preservation and restoration of cultural heritage They explore the crucial role of flat glass in shaping architecture particularly since the 18th century and discuss the in situ restoration of historic windows and glass fa ades and the importance of preserving this fragile heritage The topics range from the manufacture of sheet glass in pre industrial times to the possibilities of repair and reusability of insulating glazing With contributions in English German and French A multi disciplinary survey of the history of the production and use of flat glass From the Roman times to the present day New insights on sheet glass as building material and cultural heritage Look inside Journal of the Society of Glass Technology Society of Glass Technology, 1929

**Journal of the Society of Glass Technology** Society of glass technology, Sheffield, Eng, 1929 *Archigram* Simon Sadler, 2005-06-24 The first book length critical and historical account of an ultramodern architectural movement of the 1960s that advocated living equipment instead of buildings In the 1960s the architects of Britain s Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes In drawings inspired by pop art and psychedelia architecture floated away tethered by wires gantries tubes and trucks In Archigram Architecture without Architecture Simon Sadler argues that Archigram s sense of fun takes its place beside the other cultural agitants of the 1960s originating attitudes and techniques that became standard for architects rethinking social space and building technology The Archigram style was assembled from the Apollo missions constructivism biology manufacturing electronics and popular culture inspiring an architectural movement High Tech and influencing the postmodern and deconstructivist trends of the late twentieth century Although most Archigram projects were at the limits of possibility and remained unbuilt the six architects at the center of the movement Warren Chalk Peter Cook Dennis Crompton David Greene Ron Herron and Michael Webb became a focal point for the architectural avant garde because they redefined the purpose of architecture Countering the habitual building practice of setting walls and spaces in place Archigram architects wanted to provide the equipment for amplified living and they welcomed any cultural rearrangements that would ensue Archigram Architecture without Architecture the first full length critical and historical account of the Archigram phenomenon traces Archigram from its rediscovery of early modernist verve through its courting of students to its ascent to

international notoriety for advocating the disappearance of architecture      Through the Healing Glass John Sadar, 2016-02-12 In the mid 1920s a physiologist a glass chemist and a zoo embarked on a project which promised to turn buildings into medical instruments The advanced chemistry of Vita Glass mobilised theories of light and medicine health practices and glassmaking technology to compress an entire epoch's hopes for a healthy life into a glass sheet yet it did so invisibly To communicate its advantage Pilkington Bros spared no expense as they launched the most costly and sophisticated marketing campaign in their history Engineering need for Vita Glass employed leading edge market research evocative photography and vanguard techniques of advertising psychology accompanied by the claim Let in the Health Rays of Daylight Permanently through Vita Glass Windows This is the story of how despite the best efforts of two glass companies the leading marketing firm of the day and the opinions of leading medical minds Vita Glass failed However it epitomised an age of lightness and airiness sleeping porches flat roofs and ribbon windows Moreover through its remarkable print advertising it strove to shape the ideal relationship between our buildings and our bodies      **Walter Benjamin and the Arcades Project** Beatrice Hanssen, 2006-07-27 One of the most significant cultural documents of the Weimar Republic and Nazi era Walter Benjamin's unfinished Arcades Project has had a remarkable impact on present day cultural theory urban studies cultural studies and literary interpretation Originally designed as a panoramic study chronicling the rise and decline of the Parisian shopping arcades Benjamin's work combines imaginative peregrinations through the changing cityscape of nineteenth century Paris with passages that read like a blueprint for a new cultural theory of modernity Walter Benjamin and the Arcades Project provides the first comprehensive introduction to this extraordinary work accessible to English language readers The diverse range of issues explored include the nature of collecting the anatomy of melancholy the flâneur the physiognomy of ruins the dialectical image Benjamin's relation to Baudelaire the practice of history writing and modernity and architecture Contributors include Susan Buck-Morss Stanley Cavell Jonathan Culler Brigid Doherty Barbara Johnson Esther Leslie Gerhard Richter Andrew Benjamin Howard Caygill Beatrice Hanssen Detlef Mertins Elissa Marder Tyrus Miller and Irving Wohlfarth      Translucent Building Skins Scott Murray, 2013-05-07 Exploring the design of innovative building enclosure systems or skins in contemporary architecture and their precedents in earlier twentieth century modern architecture this book examines the tectonics the history and the influence of translucency as a defining characteristic in architecture Highly illustrated throughout with drawings and full colour photographs the book shows that translucency has been and continues to be a fertile ground for architectural experimentation Each chapter presents a comparative analysis of two primary buildings a recent project paired with a historical precedent highlighting how architects in different eras have realized the distinctive effects of translucency The included buildings span a variety of program types ranging from a single family residence to a factory to a synagogue Whether it is Pierre Chareau's glass lens curtain wall at the Maison de Verre Frank Lloyd Wright's wall of stacked glass tubes at the Johnson Wax Research Tower or Peter Zumthor's use of acid etched

glass in a double skin envelope at the Kunsthaus Bregenz the included projects each offer an exemplary case study of innovations in materiality and fabrication techniques Today among many contemporary architects there is an engagement with new technologies new material assemblies and new priorities such as sustainability and energy efficiency A resurgent interest in translucency as a defining quality in buildings has been an important part of this recent dialogue and this book makes essential reading for any architect looking to incorporate aspects of translucency into their buildings

*The Victory of the New Building Style* Walter Curt Behrendt, 2000 This book Behrendt's principle theoretical work in German and the precursor to Modern Building presents a revisionist concept of style that places equal emphasis on form and function Now available in English for the first time this incisive treatise boldly advocates international modernism to the general public

Luxury and Modernism Robin Schuldenfrei, 2018-06-05 While modernism was publicized as a fusion of technology new materials and rational aesthetics to improve the lives of ordinary people it was often out of reach to the very masses it purportedly served *Luxury and Modernism* shows how luxury was present in bold literal forms in modern designs from lavish materials and costly technologies to deluxe buildings and household objects and in subtler ways as well such as social milieus and modes of living In a period of social unrest and extreme wealth disparity between the common worker and those at the helm of capitalist enterprises generating immense profits architects envisioned modern designs providing solutions for a more equitable future Robin Schuldenfrei exposes the disconnect between modernism's utopian discourse and its luxury objects and elite architectural commissions Despite the movement's egalitarian rhetoric many modern designs addressed the desires of the privileged individual Yet as Schuldenfrei demonstrates luxury was integral not only to how modern buildings and objects were designed manufactured and sold but has contributed to modernism's appeal to this day This beautifully illustrated book provides a new interpretation of modern architecture and design in Germany during the heyday of the Bauhaus and the Werkbund tracing modernism's lasting allure to its many manifestations of luxury Schuldenfrei casts the work of legendary figures such as Peter Behrens Walter Gropius and Ludwig Mies van der Rohe in an entirely different light revealing the complexities and contradictions inherent to modernism's promotion and consumption

**A Dictionary of Architecture and Landscape Architecture**, **The Printed and the Built** Mari Hvattum, Anne Hultzsch, 2018-06-28 *The Printed and the Built* explores the intricate relationship between architecture and printed media in the fast changing nineteenth century Publication history is a rapidly expanding scholarly field which has profoundly influenced architectural history in recent years Yet while groundbreaking work has been done on architecture and printing in the Renaissance the Enlightenment and the twentieth century the nineteenth century has received little attention This is the

omission that *The Printed and the Built* seeks to address thus filling a significant gap in the understanding of architecture's cultural history. Lavishly illustrated with colourful and eclectic visual material from panoramas to printed ephemera, adverts, penny magazines, early photography and even crime reportage, *The Printed and the Built* consists of five in-depth thematic essays accompanied by 25 short pieces each examining a particular printed form. Altogether they illustrate how new genres communicated architecture to a mass audience, setting the stage for the modern architectural era. **Irene Rice Pereira**

Karen A. Bearor, 2011-07-06. Artist Irene Rice Pereira was a significant figure in the New York art world of the 1930s and 1940s who shared an interest in Jungianism with the better-known Abstract Expressionists and with various women artists and writers seeking archetypal imagery. Yet her artistic philosophy and innovative imagery elude easy classification with her artistic contemporaries. In consequence, her work is rarely included in studies of the period and is almost unknown to the general public. This first intellectual history of the artist and her work seeks to change that. Karen A. Bearor thoroughly re-creates the artistic and philosophical milieu that nourished Pereira's work. She examines the options available to Pereira as a woman artist in the first half of the twentieth century and explores how she used those options to contribute to the development of modernism in the United States. Bearor traces Pereira's interest in the ideas of major thinkers of the period among them Spengler, Jung, Einstein, Cassirer and Dewey and shows how Pereira incorporated their ideas into her art. And she demonstrates how Pereira's quest to understand something of the nature of ultimate reality led her from an early utopianism to a later interest in spiritualism and the occult. This lively intellectual history amplifies our knowledge of a time of creative ferment in American art and society. It will appeal to a wide range of readers interested in the modernist period. **Theory**

**and Design in the First Machine Age** Reyner Banham, 1980. First published in 1960, *Theory and Design in the First Machine Age* has become required reading in numerous courses on the history of modern architecture and is widely regarded as one of the definitive books on the modern movement. It has influenced a generation of students and critics interested in the formation of attitudes, themes and forms which were characteristic of artists and architects working primarily in Europe between 1900 and 1930 under the compulsion of new technological developments in the first machine age. **The Break with the Past** Deborah Ascher Barnstone, 2017-08-15. Between 1918 and 1933 the German interwar avant-garde was a primary force driving European cultural innovation and modernism. These innovations continue to influence artistic practice, theory and arts education today, thus making a comprehensive study of the relationship between individual war experience and the immediate response of avant-garde architects after the war all the more important. *The Break with the Past* pursues several important interrelated questions: What were the disparate war experiences of German architects and did they have different effects on Weimar cultural production? Did political orientation play a part in support for the war? In aesthetic choices? What changes occurred in avant-garde architectural practice after 1918? How do they compare with pre-war positions and practices and expectations for post-war outcomes? In order to address these questions, the book uses individual

case studies of four leading architects Bruno Taut Walter Gropius Erich Mendelsohn and Hans Scharoun This is a valuable resource for academics and students in the areas of Art and Architecture History German history and Cultural Studies European Culture and Modernism
