Glass Houses Men At Work:

The Man in the Glass House Mark Lamster, 2018-11-06 A smoothly written and fair minded Wall Street Journal biography of architect Philip Johnson a finalist for the National Book Critics Circle Award When Philip Johnson died in 2005 at the age of 98 he was still one of the most recognizable and influential figures on the American cultural landscape The first recipient of the Pritzker Prize and MoMA's founding architectural curator Johnson made his mark as one of America's leading architects with his famous Glass House in New Caanan CT and his controversial AT T Building in NYC among many others in nearly every city in the country but his most natural role was as a consummate power broker and shaper of public opinion Johnson introduced European modernism the sleek glass and steel architecture that now dominates our cities to America and mentored generations of architects designers and artists to follow He defined the era of starchitecture with its flamboyant buildings and celebrity designers who esteemed aesthetics and style above all other concerns But Johnson was also a man of deep paradoxes he was a Nazi sympathizer a designer of synagogues an enfant terrible into his old age a populist and a snob His clients ranged from the Rockefellers to televangelists to Donald Trump Award winning architectural critic and biographer Mark Lamster's *The Man in the Glass House* lifts the veil on Johnson's controversial and endlessly contradictory life to tell the story of a charming yet deeply flawed man A rollercoaster tale of the perils of wealth privilege and ambition this book probes the dynamics of American culture that made him so powerful and tells the story of the built environment in modern America

Men in Glass Houses Francis W. Carpenter, 1951 *Reports from Committees* Great Britain. Parliament. House of Commons, 1865 [Glasshouses and Glass Manufacturers of the Pittsburgh Region](#) Jay W. Hawkins, 2009-04 The Pittsburgh region while well known for steelmaking was likewise an important glass manufacturing center in this country's history This book provides detailed accounts of the region's glassmakers from the first factory dating to 1795 through 1910 Glassmaking started out modestly with small glasshouses in Pittsburgh and up the Monongahela River in New Geneva during the final few years of the 18th century By the close of the 19th century the Pittsburgh region was producing more than half of all domestic window glass and the lion's share of most other forms of glass in the United States The original purpose of this manuscript was to assemble and record as accurately as possible the history of all of the glassworks and the glass manufacturers that operated them in Pittsburgh and the immediate surrounding region This book was designed to be a reference guide for anyone who is interested in the history of glass in western Pennsylvania The years companies were operating where the glassworks were located what types of glass and specific glass items did they make and what marks did they use is just some of the information that can be found in this book There are hundreds of individual companies and name changes listed in this volume It contains as much information about each company that could practically be included Even the most minor name or address change was recorded exactly as noted by contemporary sources As much as possible contemporary reference sources such as city directories early newspapers maps and journals were used

to provide accurate and complete histories of the glasshouses Generally the better known companies will have much more of their history available However every known glassmaker and glasshouse was included regardless of how little information about them could be found This book is intended to aid researchers in the determination of the age and the origin of marked pieces as well as narrowing down potential manufacturers of unmarked objects The liberal reproduction of original advertisements and maps as well as the photographs of glass marks were included to complement and augment the narrative The format of this book was established to facilitate its use as a reference guide Glass House Chris Wiltz,2014-07-01

From the national bestselling author A powerful heartbreaking tale of racial tensions and tragic violence in New Orleans based on true events Publishers Weekly Thea Tamborella returns to New Orleans after a ten year absence to find the city of her birth changed still a place of deep contradictions a sensuous blend of religion tradition bonhomie and decadence but now caught in a web of fear caused by bad economic times crime and racial unrest Burgess Monroe is the drug kingpin of the Convent Street Housing Project He has always known he would die young and now he wants to use his wealth to do something for the poor people of the project where he grew up Delzora Monroe Burgess s mother works as a housekeeper in the mansion on Convent Street that Thea inherits from her aunt Zora loves her son but she knows that he has used his life to do evil and she mistrusts his motives She fears the repercussions when an attraction develops between Thea and Burgess The violence that results from the death of the lone cop has the city in the grips of fear On both sides of Convent Street the rich and the poor that violence is about to be played out The Painter and Decorator ,1918 **Iron in the Pines** Arthur Dudley Pierce,1957 Deep in the heart of southern New Jersey lies an area of some 96 000 acres of sprawling wilderness It is the famous Wharton Tract which the state of New Jersey purchased in 1954 for a watershed game preserve and park Many people know and love these wooded acres Each year people by the thousands visit Batsto Village once the center of the iron industry that thrived on the tract more than a century ago With warmth and accuracy Arthur D Pierce tells the story of the years when iron was king and around it rose a rustic feudal economy There were glass factories paper mills cotton mills and brickmaking establishments Here too were men who made those years exciting Benedict Arnold and his first step toward treason Charles Read who dreamed of an empire and died in exile Revolutionary heroes and heroines privateers and rogues The author s vivid pictures of day to day life in the old iron communities are based upon careful research This book proves that the human drama of documented history belies any notion that fiction is stranger than truth **Women and the Trades** Elizabeth Beardsley Butler,2010-11-23 Women and the Trades has long been regarded as a masterwork in the field of social investigation Originally published in 1909 it was one of six volumes of the path breaking Pittsburgh Survey the first attempt in the United States to study systematically and comprehensively life and labor in one industrial city No other book documents so precisely the many technological and organizational changes that transformed women s wage work in the early 1900s Despite Pittsburgh s image as a male oriented steel town many women also worked for a living rolling cigars canning

pickles or clerking in stores The combination of manufacturing distribution and communication services made the city of national economic developments What Butler found in her visits to countless workplaces did not flatter the city its employers or its wage earners With few exceptions labor unions served the interests of skilled males Women s jobs were rigidly segregated low paying usually seasonal and always insecure Ethnic distinctions erected powerful barriers between different groups of women as did status hierarchies based on job function Professor Maurine Weiner Greenwald s introduction provides biographical sketches of Butler and photographer Lewis Hine and examines the validity of Butler s assumptions and findings especially with regard to protective legislation women worker s passivity and working class family strategies The Pittsburgh Survey: Women and the trades, Pittsburgh, 1907-1908 Paul Underwood Kellogg,1909 **The Glass House Boys of Pittsburgh** James L. Flannery,2009-10-11 At the end of the nineteenth century Pittsburgh was leading the nation in glass production and glass bottle plants in particular relied heavily on adolescent and younger males for their manufacturing process These glass house boys worked both day and night as plants ran around the clock to meet production demands and remain price competitive with their newly automated rivals Boys performed menial tasks received low wages and had little to say on their own behalf By the turn of the century most states had enacted laws banning children from working at night and coupled with compulsory education requirements had greatly reduced the use of children in industry In western Pennsylvania however child labor was deeply entrenched and Pennsylvania lawmakers lagged far behind the rest of the nation In *The Glass House Boys of Pittsburgh* James L Flannery presents an original and compelling examination of legislative clashes over the singular issue of the glass house boys He reveals the many societal economic and political factors at work that allowed for the perpetuation of child labor in this industry and region Through extensive research in Pennsylvania state legislature archives National Child Labor Committee reports and union and industry journals Flannery uncovers a complex web of collusion between union representatives industrialists and legislators that kept child labor reform at bay Despite national pressure a concerted effort by reformers and changes to education laws the slow defeat of the glass house exception in 1915 came about primarily because of technological advances in the glass bottle industry that limited the need for child labor
