Sortition and Democracy Liliane Lopez-Rabatel, Yves Sintomer, 2020-02-10 After two centuries during which it had nearly disappeared in Western countries sortition is used again as a method of selecting people who could speak for and in certain cases decide for all the citizenry What is the meaning of this comeback To answer this question this book offers a historical analysis It brings together a number of the best specialists on political sortition from antiquity to contemporary experiments in Europe but also in the Ancient Middle East and in imperial China With a transdisciplinary perspective this volume demonstrates that sortition has been a crucial device in political history that the instruments and places where sortition was practised matter for the understanding of the social and political logics at stake and that these logics have been quite different random selection being sometimes an instrument of radical democracy and in other contexts a tool for solving conflicts among elites Will sortition in politics helps to democratize democracy in the twenty first century

The Evolution of Social Institutions Dmitri M. Bondarenko, Stephen A. Kowalewski, David B. Small, 2020-09-12 This book presents a novel and innovative approach to the study of social evolution using case studies from the Old and the New World from prehistory to the present This approach is based on examining social evolution through the evolution of social institutions Evolution is defined as the process of structural change Within this framework the society or culture is seen as a system composed of a vast number of social institutions that are constantly interacting and changing As a result the structure of society as a whole is also evolving and changing The authors posit that the combination of evolving social institutions explains the non linear character of social evolution and that every society develops along its own pathway and pace Within this framework society should be seen as the result of the compound effect of the interactions of social institutions specific to it Further the transformation of social institutions and relations between them is taking place not only within individual societies but also globally as institutions may be trans societal and even institutions that operate in one society can arise as a

reaction to trans societal trends and demands The book argues that it may be more productive to look at institutions even within a given society as being parts of trans societal systems of institutions since despite their interconnectedness societies still have boundaries which their members usually know and respect Accordingly the book is a must read for researchers and scholars in various disciplines who are interested in a better understanding of the origins history successes and failures of social institutions

The 3 most evil, savage and deceptive inventions in history: God, the Bible and organized religions
Maximilien De Lafayette, 2016-05-22 Published by Times Square Press New York www.timessquarepress.com This book will change forever your perception of and belief in God the Bible and organized religions The arguments findings and conclusions are solely based upon the Old Testament Jewish Bible and what God Yahweh said about himself in the Bible word for word and what he did to children to the elderly to women and innocent helpless people and nations according to the Bible Old Testament and the Torah and how God Yahweh negatively influenced the nature structure and logic of the Holy Scriptures the Torah the Talmud and the Mishnah arguments and findings we are presenting to you without personal interpretation and free from biased and subjective analyses What you are about to read in this book is directly taken from the Bible Old Testament and word for word

Encoding Metalinguistic Awareness E. Cancik-Kirschbaum, J. C. Johnson, 2019-12-31 The Ancient Near East provides a particularly striking example for the dynamics of knowledge transfer throughout space and time The civilizations that emerged here at the dawn of history attest to continuous processes of exchange adaption and negotiation to the emergence of content and its reconfiguration to diffusion disappearance and resurgence of themes concepts topics and ideas In the late fourth millennium the creation and implementation of supraregional notational systems in southern Mesopotamia triggers a cognitive revolution within a few centuries the use of writing becomes a dominant cultural technique and over the subsequent millennia the technique of wedge writing spreads throughout southwest Asia Numerous indigenous cuneiform subcultures came into being in a wide variety of times and places but these distinct instantiations were held together and preserved the possibility of common legibility through shared practices of teaching and learning a common core of textual materials and not least a systematic instrumentarium for representing speech and notation This repertoire is part of each of these streams of tradition which characterise the cuneiform cultures as a whole In light of the centuries of tradition the great effort that has gone into its construction and maintenance as well as the preservation of original linguistic materials and their translation into more familiar languages the validity of this scientific tradition broadly conceived cannot be disputed Still even if the historical processes of transmission within the cuneiform world and the difficulties of translating cuneiform sources into non cuneiform traditions prevented a general and far reaching mobilisation of the cuneiform sources as vehicles for scientific reflection these same factors also ensured its continued survival in Mesopotamia and Syria for not centuries but rather millennia One of the most important components of this process was the awareness of practitioners about language its role for and its impact on the generation of

knowledge and specifically about linguistic patterns Among the literally innumerable textual artefacts from the ancient Near East there are some that both explicitly and implicitly encode traces of this distinctively linguistic awareness It was in pursuit of these traces of meta linguistic awareness that the participants in this volume came together
