State Balfour Stewart, 2009-01-01 The present age is one of very rapid progress in almost all branches of knowledge Like a
wave swelling as it advances shoreward this progress has violently transformed whole regions of thought while it has
repeatedly invaded others not heretofore deemed accessible to such catastrophes Presuming upon a soil of great natural
richness the inhabitants of these latter regions had for a long series of years given themselves up to a species of husbandry
which was beginning at length to be detrimental in its effects It thus came to pass that while the immediate result of each
inundation was a sudden alarm and consequent confusion yet nevertheless a fertilising residuum was always left behind
together with a very plain intimation that no region of thought can permanently flourish if it be entirely cut off from any of
the intellectual influences around it Suchlike we take it have been the results of the recent great floods of intellectual energy
much of them seemingly subversive which have repeatedly invaded the region occupied by the followers of Christianity At
present there is no book more read than the Bible no life more deeply studied and discussed than the life of Christ There is
probably a greater amount of earnest attention devoted to these subjects than to any other branch of human inquiry
Nevertheless there is great confusion and an almost despairing outcry from many of the inhabitants of the Christian region It
is imagined that fences and landmarks have disappeared and that at length the rising tide is about to attack as it has long
threatened the very lives and holdings of the community It will be our endeavour to reassure these somewhat over timid
people Being students of physical science we will try to gauge the strength of the tide and more especially of the forces
which give it motion and endeavour to convince those who are sufficiently calm to receive conviction that there neither is nor
can be any real danger to their lives and holdings from the violence of the waters but that on the contrary they will ultimately
receive a blessing from that which will remain behind after the present confusion has disappeared Skin for skin said a certain
evil one yea all that a man hath will he give for his life and the proverb is true with a modification as regards the life of the
soul no less than as regards that of the body Take away all hope of a future state appear to demonstrate if not with absolute
certainty yet with an approach to it that such a condition of things is antagonistic to well understood scientific principles and
we feel certain that the effect upon humanity would be simply disastrous At any rate those who propound an argument of this
kind must reasonably expect determined opposition from the followers of religion Let us here before proceeding further take
the opportunity of stating that we discuss only the physical aspects of the argument regarding a future state Being neither
metaphysicians nor moral philosophers we leave to others more competent than we can be the argument which may be based

upon the universal craving among the intelligent races of mankind for a life beyond the grave In the fourth and following editions of our work while we have not materially altered our argument we have recast to some extent the shape in which it was first put before the reader and this recasting has taken a more definite form in our present edition The large amount of friendly criticism which our work has called forth has convinced us that we did not at first sufficiently separate between certain conclusions which inevitably flowed from our argument and certain others which while deriving their strength from a totally different quarter were yet not inconsistent with the former but even it might be supported by them The consequence has been that we have found ourselves credited with attempts which were very far from our thoughts such for instance as the endeavour to deduce Christian theological doctrine from mere physical considerations
