**Words on Cassette, 2002** R R Bowker Publishing, 2002      Books Out Loud, 2007      *Navigating International Academia* Jill Brown, 2014-07-11 These narratives recount what it means to be a research student at an Australian university. They unpack the complex pathways that have led the authors to this place, the early imaginings, the attempts to achieve the dream and the challenges that come with that achievement. These students bring a range of life skills and experiences to their studies and need to balance competing financial, family and employment related demands on their time and attention. For the international students whose voices dominate this text, there are also barriers of culture, language and physical and emotional dislocation. Students from Vietnam, Indonesia, Bangladesh, Iraq and Romania recount the personal and academic challenges they have faced and the ways in which they have struggled to find a way of being in academia which both accommodates their sense of self and allows them to be recognised as researchers in the international arena. An Australian student adds her voice to the collection. Their stories all combine the intensely personal with the academic. There is the joy of finding libraries full of books, of making friends with strangers, of managing to be student, partner and parent. There is pride in the achievement of children, coping with school and gratitude for the support of family and fellow students. There is also developing confidence in their ability to contribute to research in the international arena and increasing authority in the ownership of their research. As a collection, these narratives offer insight into both the student travellers and the academic and personal journeys being taken. Cover photo: International Academia by Erika Akerlund, Hobart, Australia      Perspectives William F Brown, 2016-03-06 From the first seconds following the Big Bang to our best guesses for the fate of the universe, and humanity's science provides stunning new perspectives about the place of humanity in the cosmos. Humans may live on one planet in one small corner of the Milky Way itself, one of billions of other galaxies, but Earth may be unique in one respect: Earth is teeming with life, one species of which, through chance and natural selection, developed an extraordinary brain, gifted with imagination, curiosity and a compulsion to understand ourselves and the universe. *Perspectives* is a journey through deep time from the creation of the universe to the beginnings of life, our human origins and later the rise of culture and religion. It explores what it means to be human and where our technology could take us in the years and centuries to come.
