Mookherjee,2020-04-11 This book argues that close and disciplined scrutiny of the Asian megacity regions is of critical importance to understanding Asian urbanization However any approach to studying these regions must adopt a multi dimensional and trans urban perspective otherwise we Without such an approach we cannot truly make meaningful decisions about growth management and sustainable development for such regions Amidst the sweeping demographic and structural shifts produced by global urbanization Asian urbanization has a fascinating and prominent role Asian urbanization is heterogeneous and more accurately constitutes phenomena than a phenomenon However despite this diversity there are certain common features that we can identify One of them is the Asian megacity region the administrative and or delineated territory of mixed urban rural landscape surrounding a giant metropolis The purpose of this book is to Understand the main features of 21st century urbanization Note the limitations of current approaches e g disparate scales city centric views inadequate data sets Articulate a pragmatically framed three pronged approach scale based trans urban multi dimensional Demonstrate the application of such an approach with a case study of one of the most important megacity regions in South Asia the Delhi National Capital Region underscoring the methodological requirements of such an approach Discuss the next steps for the field as a whole questions to be raised and directions to be explored for further study This timely conceptual and empirical book will appeal to students of urbanization architects involved in urban policy and planning and researchers alike
