**Global AIDS Policy** Douglas A. Feldman, 1994-10-30 An estimated 17 million people are infected with HIV today and it is estimated that in Africa alone there will be at least 70 million people infected in the next 25 years This global pandemic has already had a profound impact economically and socially in terms of expensive research care centers and immeasurable loss of many of the world's most talented people Sexual relations health care of non infected individuals family relations and other social institutions have been significantly marked by this elusive and to date life threatening phenomenon Topics range from breastfeeding to condom use from apathetic governments to immigration policy Dr Feldman and his contributors evaluate various policies that have been proposed or adopted on four continents and provide a needed perspective on planetary problems

*The Politics of Global AIDS* Hakan Seckinelgin, 2016-10-05 This timely book looks critically at the policy response to AIDS and its institutionalization over time It raises important questions about who benefits who decides and in whose interests decisions are made Taking the early international response to the epidemic as its starting point and focusing on the work of agencies such as UNAIDS it identifies two logics underpinning strategy to date First the idea of HIV as a global emergency which calls for an extraordinary response Second the claim that medicine offers the best way of dealing with it The book also identified the rise of something more dominant namely Global AIDS or the logic and system that seeks to displace all others Promulgated by UNAIDS and its partner agencies Global AIDS claims to speak the truth on behalf of affected persons and communities everywhere Founded on solidarity claims concerning the international HIV movement and distinctive knowledge practices which determine what needs to be done Alternative views about the nature of the epidemic or the best response are rejected as irrelevant for falling outside the master framing of the epidemic that Global AIDS provides But to what extent is this biomedical and emergency framing of the epidemic sustainable and to what extent does it speak to the sustainability of lives as affected people wish them to be lived Does scientific and biomedical advance provide all the answers or do important social and political issues need to be addressed This book provides an innovative framework with which to think about these and other sustainability challenges for the future

*Global AIDS* Alexander C. Irwin, Joyce V. Millen, Dorothy Fallows, 2003 AIDS is the most devastating communicable disease in history and poor countries have been most severely impacted by the pandemic Since the mid 1990s the use of antiretroviral drug therapies has dramatically extended life expectancy and improved life quality for those with HIV AIDS who can afford the costly treatments Yet even as it raises new hope this medical advance has intensified ethical and political questions about AIDS Antiretroviral use by those with money and access throws the contrasting outcomes among AIDS sufferers throughout the world into high relief It has also revealed what many people with AIDS have known all along the disease is not only propagated by the virus but by racism entrenched poverty structural inequality and the legacy of colonial domination and exploitation *Global AIDS Myths and Facts* aims to present the facts about HIV AIDS and empower people for informed active participation in the global struggle against

this plague To mobilize the energy commitment and resources required for the fight Irwin and Millen tackle 10 destructive myths that hamper implementation of effective and equitable anti HIV AIDS programs World leaders like Kofi Annan have announced treatment and prevention initiatives that are opening new possibilities But the authors argue that only sustained political pressure from the grassroots \_\_forging links across national boundaries professional and social categories and racial ethnic and religious identities \_\_will halt the pandemic \_\_s spread

*Handbook of HIV Prevention* John L. Peterson,Ralph J. DiClemente,2012-12-06 In the nearly two decades since the HIV pandemic began the rapid expansion of behavioral research on HIV prevention has prompted a crucial need for a sourcebook more advanced than an introductory textbook and broader and more readily accessible than a review periodical The Handbook of HIV Prevention is intended as the first attempt to meet this need The current state of affairs led us to edit a book that would represent the major areas of HIV behavioral research at a level appropriate for graduate students and experienced researchers in public health medicine nursing education and the social and behavioral sciences In addition we expect that the handbook will be useful in advanced undergraduate courses and as a reference book for health care professionals Our plans to assemble the Handbook began in the fall of 1996 when we prepared a tentative outline of chapters and invited a large number of distinguished researchers in the field to be the authors of various chapters We received an overwhelmingly favorable response from potential authors to our letters of invitation After considerable effort by both the contributors and the editors the volume was completed in 1999 when all chapters went to press

Gostin,2014-03-31 Despite global progress staggering health inequalities between rich and poor raise basic questions of social justice Defining the field of global health law Lawrence Gostin drives home the need for effective governance and offers a blueprint for reform based on the principle that the opportunity to live a healthy life is a basic human right      **Achieving Access** Joseph Harris,2017-09-15 At a time when the world s wealthiest nations struggle to make health care and medicine available to everyone why do resource constrained countries make costly commitments to universal health coverage and AIDS treatment after transitioning to democracy Joseph Harris explores the dynamics that made landmark policies possible in Thailand and Brazil but which have led to prolonged struggle and contestation in South Africa Drawing on firsthand accounts of the people wrestling with these issues *Achieving Access* documents efforts to institutionalize universal healthcare and expand access to life saving medicines in three major industrializing countries In comparing two separate but related policy areas Harris finds that democratization empowers elite professionals such as doctors and lawyers to advocate for universal health care and treatment for AIDS Harris s analysis is situated at the intersection of sociology political science and public health and will

speak to scholars with interests in health policy comparative politics social policy and democracy in the developing world In light of the growing interest in health insurance generated by implementation of the Affordable Care Act as well as the coming changes poised to be made to it Achieving Access will also be useful to policymakers in developing countries and officials working on health policy in the United States *Modernizing Sexuality* Anne W. Esacove, 2016 Stepping outside the established boundaries of HIV scholarship *Modernizing Sexuality* illustrates the ways in which Western idealizations of normative sexuality and the power of modernity come together in U S prevention policy and how they actually exacerbate HIV risk particularly for women Building on everyday understandings of HIV this book provides a new narrative that reimagines risk and offers an alternative path for organizing important policy efforts *Rethinking MSM, Trans\* and other Categories in HIV Prevention* Amaya G. Perez-Brumer, Richard Parker, Peter Aggleton, 2018-12-07 As the HIV epidemic moves into its fourth decade it is clear that the global response has failed to adequately address the needs of a wide range of vulnerable populations and groups Chief among these are gay bisexual and other men who have sex with men and transgender persons who globally face the disproportional burden of HIV infection This volume rethinks HIV prevention and health promotion for sexual and gender minorities in both the industrialised societies of the West as well as in the developing nations of the Global South The chapters it contains offer a critical analysis of past and present HIV research employing categories to designate gay and other men who have sex with men transgender persons and or other persons and communities with diverse gender and sexual identities Contributors question the politics of many of the existing classifications and categories in HIV research and argue for a more sophisticated analysis of gender and sexual diversity in order to tackle the social and political barriers that impede the design of successful HIV prevention and health promotion approaches This book was originally published as a special issue of *Global Public Health*
