Martin, 2015-05-22 A provocative call for delegitimizing fossil fuels rather than accommodating them accompanied by case studies from Ecuador to Appalachia and from Germany to Norway Not so long ago people North and South had little reason to believe that wealth from oil gas and coal brought anything but great prosperity But the presumption of net benefits from fossil fuels is eroding as widening circles of people rich and poor experience the downside A positive transition to a post fossil fuel era cannot wait for global agreement a swap in of renewables a miracle technology a carbon market or lifestyle change This book shows that it is now possible to take the first step toward the post fossil fuel era by resisting the slow violence of extreme extraction and combustion exiting the industry and imagining a good life after fossil fuels It shows how an environmental politics of transition might occur arguing for going to the source rather than managing byproducts for delegitimizing fossil fuels rather than accommodating them for engaging a politics of deliberately choosing a post fossil fuel world Six case studies reveal how individuals groups communities and an entire country have taken first steps out of the fossil fuel era with experiments that

Markets William A. Jackson, 2019-04-18 Defining markets has never been an easy task Despite their importance for economic theory and practice they are hard to pin down as a concept and economists have tended to adopt simplified axiomatic models or rely on piecemeal case studies This book argues that an extended range of theory social as well as economic can provide a better foundation for the portrayal of markets The book first looks at the definition of markets their inadequate treatment in orthodox economic theory and their historical background in the pre capitalist and capitalist eras It then assesses various alternatives to orthodox theory categorised as social cultural structural functional and ethical approaches Among the alternatives considered are institutionalist accounts Marxian views network models performativity arguments field theories Austrian views and ethical notions of fair trade A key finding of the book is that these diverse approaches valuable as they are could present a more effective challenge to orthodoxy if they were less disparate Possibilities are investigated for a more unified theoretical alternative to orthodoxy Unlike most studies of markets this book adopts a fully interdisciplinary viewpoint expressed in accessible non technical language Ideas are brought together from

heterodox economics social theory critical realism as well as other social sciences such as sociology anthropology and geography Anybody seeking a broad critical survey of the theoretical analysis of markets will find this book useful and it will be of great interest to economists social scientists students and policy makers

Unexpected Power Shareen Hertel, 2018-07-05 U S human rights advocacy has long focused on civil and political rights issues such as torture censorship and lack of democratic freedoms abroad In the 1990s a series of high profile anti sweatshop and fair trade campaigns shifted the spotlight to labor issues But as human rights activists in the United States and elsewhere take up the cause of economic exploitation they don't always agree on the nature of the problem or on what should be done to address it What is more they do not necessarily have the final say in many cases the focus of a campaign will shift when local activists make their voices heard or when the imported aims of nongovernmental organizations conflict with the goals of the people they intend to help Shareen Hertel explores the dramatic negotiations within cross border human rights campaigns Activists on the receiving end of such campaigns do much more than seek the help of powerful allies beyond their borders They often also challenge outsiders' understandings of basic

human rights in some cases directly by blocking campaigns intended to help them and in other cases indirectly by employing backdoor moves aimed at more subtly introducing new human rights norms Hertel looks closely at struggles for human rights in two contexts Bangladesh where activists challenged the understanding of human rights central to an international campaign to prevent child labor in that country and Mexico where activists sought to broaden the scope of efforts to prevent discrimination against pregnant workers in their country Hertel connects these unexpected challenges to a new wave of international advocacy and thereby illuminates democratic struggles in the new global economy **Politics and Foreign**

Direct Investment Nathan Jensen, Glen Biglaiser, Quan Li, Edmund Malesky, Pablo Pinto, Santiago Pinto, Joseph Staats, 2012-09-18 For decades free trade was advocated as the vehicle for peace prosperity and democracy in an increasingly globalized market More recently the proliferation of foreign direct investment has raised questions about its impact upon local economies and politics Here seven scholars bring together their wide ranging expertise to investigate the factors that determine the attractiveness of a locale to investors and the extent of their political power Multinational corporations prefer to invest where legal and political institutions support the rule of law protections for property rights and democratic processes Corporate influence on local institutions in turn depends upon the relative power of other players and the types of policies at issue
