## **Global Brain Awakens Our Next Evolutionary Leap:**

**The Global Brain Awakens** Peter Russell, 2000 Not too many philosophers have taken a serious crack at explaining what the advent of the Internet means to the future of human society While technology takes a back seat to spirituality in *The Global Brain Awakens* author Peter Russell takes all the recent hype about global interconnectivity to a fascinating extreme The Internet as the central nervous system to a newly evolved global organism Russell draws parallels between the development of the central nervous system in living organisms and creation of Web communications here on Earth which he argues is the biggest living organism of them all Unfortunately this intriguing line of thought is undermined by the book's conclusion which collapses into a mire of hokey higher consciousness that lacks the same critical reasoning [getAbstract](#) recommends this book to anyone interested in an alternative vision of a Web enhanced future provided you are not turned off by its new age clichés [The Biosphere and Noosphere Reader](#) David Pitt, Paul R. Samson, 2012-10-02 Foreword written by Mikhail S Gorbachev Reproduction of work previously unpublished in English Combines new writing with traditional classics alongside *New Consciousness for a New World* Kingsley L. Dennis, 2011-08-16 A call for a paradigm shift in human thinking in recognition of the interconnectedness of all things a new mind for a new world Explains how the instability of our current time is part of a larger cycle of human evolution that will soon turn toward renewal and regeneration Reveals how to participate in the process of conscious evolution to maintain resilience during these transitional times Examines new findings in quantum physics and quantum biology on the interconnectivity of all life and how to utilize this for conscious evolution For centuries indigenous wisdom traditions have talked of an epochal shift on the horizon of a spiritual renaissance for the earth and her living family Now the timelines are converging and the potential for an energetic upgrade for humanity is here but first we must survive and evolve through the current period of transition Explaining that evolution is not a gradual process but more like a shock to the system radical waves of transformation after a period of dormancy author Kingsley Dennis reveals that we are currently undergoing an evolutionary leap and shows not only how to survive but also thrive in this period of global upheaval and change Examining the nature of evolutionary cycles he explains that the instability we are now experiencing climate change economic meltdowns and increasing political polarization is the convergence of complex systems that have reached a critical state What we need in order to push through to the coming spiritual renaissance is a paradigm shift in human thinking and perception a conscious evolution in recognition of the interconnectedness of all things a new mind for a new world Examining new findings in quantum physics and quantum biology on the interconnectivity of all life as well as opportunities for us to reawaken our slumbering souls this book offers a glimpse of the new global society to come a renewed humanity for the 21st century and how each of us can best participate during the process of planetary transformation [Conscious Evolution](#) Barbara Marx Hubbard, 2010-10-14 Outlining the new worldview of conscious evolution futurist Barbara Marx Hubbard has written a call to action for our current generation to fulfill its creative potential

She defines conscious evolution as the awareness that humans have gained the power to affect our own evolution and she asserts that we must quickly become capable of wise and ethical guidance of evolution itself if life on earth is to survive Only in the last fifty years have we gained the scientific and technological power to destroy or enhance the planet's life support system Our generation has the ability to abuse or conserve these powers to act in a way as co creator Conscious Evolution reveals the path of the co creator born out of these powers and society's new spirituality and discusses the tools and opportunities that each of us has to fully participate in this exciting stage in history *Chaos Point 2012 and Beyond* Ervin Laszlo, 2025-09-12 According to Ervin Laszlo we are at a critical juncture in history a decision window where we face the danger of global collapse or the opportunity for global renewal He presents a concise overview of the current crises we face environmental social economic and institutional persuasively arguing that if something is not done quickly we face disaster We have the opportunity right now to head off trends that could lead to a critical tipping point Laszlo's solution is a global consciousness shift that entails a new universal morality a new ecological awareness and a reverence and caring for the earth Included here are concrete suggestions of what the reader can do to promote this shift in evolutionary consciousness

Law in the Time of Oxymora Rostam J. Neuwirth, 2018-05-16 What do different concepts like true lie bad luck honest thief old news spacetime glocalization symplecity sustainable development constant change soft law substantive due process pure law bureaucratic efficiency and global justice have in common What connections do they share with innumerable paradoxes like the ones of happiness time globalization sex and of free will and fate *Law in the Time of Oxymora* provides answers to these conundrums by critically comparing the apparent rise in recent years of the use of rhetorical figures called essentially oxymoronic concepts i e oxymoron enantiosis and paradoxes in the areas of art science and law Albeit to varying degrees these concepts share the quality of giving expression to apparent contradictions Through this quality they also challenge the scientific paradigm rooted in the dualistic thinking and binary logic that is traditionally used in the West as opposed to the East where a paradoxical mode of thinking and fuzzy logic is said to have been cultivated Following a review of oxymora and paradoxes in art and various scientific writings hundreds of hard cases featuring oxymora and a comprehensive review of the legal literature are discussed revealing evidence suggesting that the present scientific paradigm of dualism alone will no longer be able to tackle the challenges arising from increasing diversity and complexity coupled with an apparent acceleration of change *Law in the Time of Oxymora* reaches the surprising conclusion that essentially oxymoronic concepts may inaugurate a new era of cognition involving the ways the senses interact and how we reason think and make decisions in law and in life **Advanced Computational Methods for Knowledge Engineering** Tien Do, Hoai An Le Thi, Ngoc Thanh Nguyen, 2014-04-11 The proceedings consists of 30 papers which have been selected and invited from the submissions to the 2nd International Conference on Computer Science Applied Mathematics and Applications ICCSAMA 2014 held on 8 9 May 2014 in Budapest Hungary The conference is organized into 7 sessions Advanced Optimization Methods and Their
