Global Brain Speculations On The Evolutionary Leap To Planetary Consciousness:

The Global Brain Peter Russell, 1983-01-01 Drawing on the views of scientists and philosophers including Lovelock Sheldrake and Aurobindo a psychologist argues that the mounting complexity of today's world may lead to the convergence of society into a single global consciousness **The Phenomenon of Teilhard** David H. Lane, 1996 New Age writer of the popular Aquarian Conspiracy Marilyn Ferguson observed that many of the leading lights of the New Age movement claim Teilhard as one of the most influential persons in their lives Other influences acknowledged include C G Jung Aldous Huxley Swami Muktananda Thomas Merton Werner Erhard and Maharishi Yogi Indeed of the 185 New Age leaders surveyed Teilhard was the most frequently mentioned of any person who had most influenced their thinking If this is the case then if we are to understand the New Age movement properly it behooves us to take a careful and critical look at Teilhard de Chardin David Lane has done precisely this in a clear well documented and penetrating way In this crucial book David Lane lays bare the philosophical theological and scientific failures of Teilhard's New Age enterprise In a highly documented and insightful scrutiny of Teilhard's cosmic evolution Lane unveils the apostate Christian roots of one of the most important forerunners of the New Age movement This is one of the most significant and serious treatments of the modern roots of the New Age in print **The Mystic Heart** Wayne Teasdale, 2010-10-06 Drawing on experience as an interreligious monk Brother Wayne Teasdale reveals the power of spirituality and its practical elements He combines a profound Christian faith with an intimate understanding of ancient religious traditions **The Routledge Handbook of Collective Intelligence for Democracy and Governance** Stephen Boucher, Carina Antonia Hallin, Lex Paulson, 2023-06-19 The Routledge Handbook of Collective Intelligence for Democracy and Governance explores the concepts methodologies and implications of collective intelligence for democratic governance in the first comprehensive survey of this field Illustrated by a collection of inspiring case studies and edited by three pioneers in collective intelligence this handbook serves as a unique primer on the science of collective intelligence applied to public challenges and will inspire public actors academics students and activists across the world to apply collective intelligence in policymaking and administration to explore its potential both to foster policy innovations and reinvent democracy The Routledge Handbook of Collective Intelligence for Democracy and Governance is essential reading and an authoritative reference for scholars students researchers and practitioners of public policy public administration governance public management information technology and systems innovation and democracy as well as more broadly for political science psychology management studies public organizations and individual policy practitioners public authorities civil society activists and service providers Visit the handbook's dedicated website Smarter Together for complementary material **The One Mind** Matthew A. Fike, 2013-10-08 The One Mind C G Jung and the Future of Literary Criticism explores the implications of C G Jung's unus mundus by applying his writings on the metaphysical the paranormal and the quantum to literature As Jung knew everything is connected because of its participation in universal consciousness

which encompasses all that is including the collective unconscious Matthew A Fike argues that this principle of unity enables an approach in which psychic functioning is both a subject and a means of discovery psi phenomena evoke the connections among the physical world the psyche and the spiritual realm Applying the tools of Jungian literary criticism in new ways by expanding their scope and methodology Fike discusses the works of Hawthorne Milton Shakespeare Wordsworth and lesser known writers in terms of issues from psychology parapsychology and physics Topics include the case for monism over materialism altered states of consciousness types of psychic functioning UFOs synchronicity and space time relativity The One Mind examines Goodman Brown s dream Adam s vision in Paradise Lost the dream sequence in The Wanderer the role of metaphor in Robert A Monroe s metaphysical trilogy Orfeo Angelucci s work on UFOs and the stolen boat episode in Wordsworth s The Prelude The book concludes with case studies on Robert Jordan and William Blake Considered together these readings bring us a significant step closer to a unity of psychology science and spirituality The One Mind illustrates how Jung s writings contain the seeds of the future of literary criticism Reaching beyond archetypal criticism and postmodern theoretical approaches to Jung Fike proposes a new school of Jungian literary criticism based on the unitary world that underpins the collective unconscious This book will appeal to scholars of C G Jung as well as students and readers with an interest in psychoanalysis literature literary theory and the history of ideas Unsafty Shigeo Atsui,2016-11-15 This is the first book to examine the linkages among natural and organizational accidents and disasters in the modern era and clarifies the mechanisms involved and the significance of emerging problems from the aging of vital infrastructure for the supply of water gas oil and electricity to the breakdown of pensions healthcare and other social systems The book demonstrates how we might check the underlying civilizational collapse and then explore translational systems approaches toward resilient management and policy for sustainability In Unsafty the author focuses on the kinds of unnatural disasters and organizational accidents that arise as repercussions of natural hazards Japan serves as an example where earthquakes tsunamis and typhoons are common with the Fukushima nuclear disaster as an outstanding case of this link between natural disasters and organizational accidents Natural and human made disasters happen worldwide and cause misery through loss of life destruction of livelihoods as in agriculture fisheries and the manufacturing industry and interruption of urban life Unsafty from a disaster in one place increases uncertainty elsewhere presenting urgent issues in all nations for individuals organizations regions and the state The author explains that one factor in the Fukushima catastrophe which followed in the wake of the earthquake and tsunami in 2011 was the latent deterioration and aging of systems at all levels from the physical to the social leading through a chain reaction to unsought and unforeseen consequences Here the aging of the nuclear reactor system the breakdown of safety management and inappropriate instructions from the regulatory authorities combined to create the three fold disaster in which technological organizational and governmental dysfunction have been diagnosed as reflecting a systems pathology infecting all levels Gaming the Metaverse Benjamin Beil,Gundolf S.

Freyermuth, Isabelle Hamm, Vanessa Ossa, 2025-01-14 Neal Stephenson's 1992 novel *Snow Crash* conceived of the Metaverse as an escapist medium within a dystopian future. By the early 2000s his vision had evolved into a blueprint for pioneering virtual worlds notably *Second Life*. In the 2010s technology companies from Meta to Epic Games recast the Metaverse as the next frontier of digital experience and revenue generation. Now in the 2020s the still speculative concept encompasses a convergence of extended reality technologies alongside blockchain systems and artificial intelligence. This volume brings together leading scholars and industry professionals to examine past imaginations and recent achievements in the pursuit of the Metaverse. Contributors trace its development through literary media and cultural history while exploring current applications and their technical, social, cultural and economic implications.

The Fourth Wave Herman Maynard, Susan E. Mehrtens, 1996-08-31 Applying the concept of historical waves originally propounded by Alvin Toffler in *The Third Wave* Herman Maynard and Susan Mehrtens look toward the next century and foresee a fourth wave, an era of integration and responsibility far beyond Toffler's revolutionary description of third wave postindustrial society. Whether we attain this stage of global well-being however will depend on how well our business institutions adapt and change. *The Fourth Wave* examines the ways business has changed in the second and third waves and must continue to change in the fourth. The changes concern the basics: how an institution is organized; how it defines wealth; how it relates to surrounding communities; how it responds to environmental needs; and how it takes part in the political process. Maynard and Mehrtens foresee a radically different future in which business principles concern for the environment, personal integrity and spiritual values are integrated. The authors also demonstrate the need for a new kind of leadership: managers and CEOs who embrace an attitude of global stewardship; who define their assets as ideas, information, creativity and vision; and who strive for seamless boundaries between work and private lives for all employees.

Sustainable Development in the Anthropocene Luis-Alberto Padilla, 2021-09-16 In the Anthropocene sustainable development responds to socio-economic, environmental and political crises provoked by humankind due to global warming and the great acceleration of human intervention in ecosystems. This book introduces readers to current debates on sustainable development and to a holistic and multidisciplinary approach. Regional integration and supranational institutions are fundamental for sustainable development. The democratisation of the international system requires a new multilateralism. Global problems of demography, economic ideology of unlimited growth, the prevailing technocratic paradigm, consumerism, problems of waste, fossil fuels, industrial food production, use of fertilisers, water management and climate change are discussed and the importance of multilateral agreements for security, sustainable peace and development is explored. This planetary crisis may be solved by international cooperation based on the UN sustainable development goals. This book provides a concise synthesis of the main subjects of sustainable development studies, links development studies to multilateral diplomacy as practised by UN bodies and organisations, gives a new holistic and multidisciplinary approach to environmental and social sciences in the Anthropocene epoch.

this misunderstood period bringing us a new look at the wild side of the 1970s Belgrad shows us how ideas from systems theory were taken up by the counterculture and the environmental movement eventually influencing a wide range of beliefs and behaviors particularly related to the question of what is and is not intelligence He tells the story of a generation of Americans who were struck by a newfound interest in and respect for plants animals indigenous populations and the very sounds around them threading his tapestry with cogent insights on environmentalism feminism systems theory and psychedelics The Culture of Feedback repaints the familiar image of the 70s as a time of Me Generation malaise to reveal an era of revolutionary and hopeful social currents driven by desires to radically improve and feed back into the systems that had come before A New Science Worldview Dorn Swerdlin,2012-11 Most don't realize that the Western World shares a worldview based on the science from about three centuries ago Newtonian science This worldview and the science behind it have become both outdated and incomplete The good news is that more recent science provides us with an alternative worldview If enough of us accept the new science worldview and change our beliefs and thinking based on the new view we can create a peaceful and thriving world no violence no wars no terrorism no fear and respect and compassion for all A New Science Worldview provides specific steps to help us transform our thinking and beliefs in accordance with the new worldview **Wild Earth, Wild Soul (2nd Edition)** Sky Otter,2025-04-29 Imagine a nature based culture so alive and so connected spreading like wildfire This book is the match Breaking Free of the Co-Dependency Trap Janae B. Weinhold,Barry K. Weinhold=,2010-09-24 This bestselling book now in a revised edition radically challenges the prevailing medical definition of co dependency as a permanent progressive and incurable addiction Rather the authors identify it as the result of developmental traumas that interfered with the infant parent bonding relationship during the first year of life Drawing on decades of clinical experience Barry and Janae Weinhold correlate the developmental causes of co dependency with relationship problems later in life such as establishing and maintaining boundaries clinging and dependent behaviors people pleasing and difficulty achieving success in the world Then they focus on healing co dependency providing compelling case histories and practical activities to help readers heal early trauma and transform themselves and their primary relationships **Wild Earth, Wild Soul** Bill Pfeiffer,2013-06-28 Humankind has the capacity and know how to create Earth honoring cultures in a new way for new times Through tapping into ancestral memories taking what's best from the human potential movement and collaborating with present day indigenous peoples we can find our way home Practicing the key ingredients of a lasting culture is an ecstatic way to live This book shows you how *Living Your Divine Life* Orest Bedrij,2009-11-19 Living Your Divine Life takes you beyond the monumental peak experience beyond priceless enlightenment and beyond human thought to effortless living nonstop miracles God conscious Christ in us reality and ceaseless joy as your natural state Before we learned to walk or feed ourselves with a spoon we have to acquire these now second nature information processing skills that originate beyond the conscious mind Equally if we want to realize the highest state of our

Closing the Gap Allerd Stikker,2002 Today s patriarchal societies have their roots in antiquity a time when matrilineal societies gradually gave way to ancient civilizations in which men were granted more and more importance and power and women were made not only subordinate but also gradually separated from realms of the male In Closing the Gap Allerd Stikker argues that the male female duality we still perceive has resulted in a loss of coherence and integrity for all people and that only the unity and interdependence of the sexes can preserve a sustainable human society on our planet
