Burke, 2006-07-25 Terrorism is no longer something that only happens to other countries Attacks on US soil in the 1990 s brought the reality of terrorism home and the Sept 11th tragedy let us know that the United States is a high priority target The goal of today s terrorist is body count and while traditional bombings have served them in the past the allure of killing thousands of people with a very small amount of biological or chemical agent will prove irresistible Our only defense on the front line is a well prepared emergency response team The key to an effective terrorist response is to understand and contain the hazardous materials involved *Counter Terrorism for Emergency Responders* Second Edition meticulously details the characteristics actions identification containment and emergency treatment of all types of agents Drastically updated from the 1999 edition chapter after chapter is packed with new information on chemical agents biological agents and explosive nuclear and incendiary devices Using his 26 years of experience in emergency services and his skills as a hazardous materials consultant in more than 15 states the author prepares the first responder to handle everything from re establishing control and on scene triage to investigating the crime Including information on pre incident and avoidance tactics the author provides new monitoring and detection techniques protective equipment and decontamination and an extensive list of resource organizations and training
