studies experts searching for local meanings in small scale village communities There will be a confluence of social and human sciences or what C P Snow the English literary critic called the two cultures of the scientific revolution the sciences and humanities Praise for *The Cultural Psyche* This edited collection by Dinesh Sharma of his mentor Robert LeVine s papers is uniquely positioned between psychology anthropology and human development As one surveys its wide ranging and fascinating papers one not only comes to understand the principal lines of work carried out over a half century by a remarkable scholar At the same time one gains a sense of the history of these lines of work by a person who has lived through it reflected on it and contributed significantly to its advances This exceptionally valuable volume not only surveys child and human development in depth and across cultures it also points out ways in which these lines of work ought to be pursued in the years to come Howard E Gardner Hobbs Professor of Cognition and Human Development Harvard University Cambridge MA This book offers an overview of the wide ranging contributions of one of the giants of thinking about human development parenting and culture of the last 50 years By bringing together a large body of Bob s writings some of them entirely new this volume represents only one important dimension of LeVine s enormous influence on the thinking of today s scholars but in addition it should be noted how much his scholarship has shaped the work and the thinking of his many students and collaborators in ways that will persist through several academic generations Catherine E Snow Patricia Albjerg Graham Professor of Education Harvard University Cambridge MA *Between Teaching and Caring in the Preschool* John C. Pruitt, 2020-07-06 In *Between Teaching and Caring in the Preschool* John C Pruitt argues that preschool teaching is more than a set of roles and duties tied to institutional expectations Drawing on two years of ethnographic fieldwork twenty three interviews and countless conversations with preschool teachers and analysis of preschool documents Pruitt opens the black box of the preschool to show the complexity of the preschool teacher identity as it unfolds in everyday practices of teaching and caring His analysis of preschool teachers talk and interaction addresses pertinent sociological and early childhood education themes including classroom management social control emotions and identity construction He demonstrates there is more going on in the preschool than teaching young children and caring for them Through practices of classroom management and teaching language preschool teachers socialize children into education contexts and exert social control in and through teaching practices By managing emotions preschool teachers also manage impressions of themselves and the preschool He also shows how preschool teachers use resources like Montessori pedagogy and their lived experience to construct authenticity Pruitt concludes that institutions such as ECE shape identities within and away from the institution

**Strange Situation** Bethany Saltman, Daniel J. Siegel, 2020 A full scale investigation of the controversial and often misunderstood science of attachment theory inspired by the author s own experience as a parent and daughter When professional researcher and writer Bethany Saltman gave birth to her daughter Azalea she loved her deeply but felt as if something was missing Looking back at her lonely childhood dangerous teenage years and love addicted early adulthood

Saltman thought maybe she was broken Then she discovered the science of attachment the field of psychology that explores the question of why from an evolutionary point of view love exists between parents and children Saltman went on a ten year journey visiting labs archives and training sessions while learning the meaning of delight from Mary Ainsworth one of psychology s most important but unsung researchers who died in 1999 Saltman went deep into the history and findings from Ainsworth s famous laboratory procedure the Strange Situation which like an X ray is still used today by scientists around the world to catch a glimpse of the internal workings of attachment In this simple twenty minute procedure a baby and a caregiver enter an ordinary room with two chairs and some toys During a series of comings and goings a trained observer studies the minutiae of the pair s back and forth with each other Through the science of attachment what Saltman discovered was a radical departure from everything she thought she knew about love and about her own family her story and herself She was far from broken she saw that love is too powerful to ever break Strange Situation reveals the startling truth at the heart of the Strange Situation far from the attachment parenting emphasis on external activities like breastfeeding and sleep sharing what truly affects our children is the way we think and feel on the inside about love It s our perceptions that are transmitted mind to mind from generation to generation This is excellent news because it s completely within our power to change our minds Strange Situation is a scientific lyrical life affirming exploration of love Not only will readers be taken on an emotional ride through one mother s reckoning with her own past and her family s future but they will also be given the tools with which to better understand their own life histories and their relationships today
