Emotions Hormones And Atherosclerosis:

Emotions, Hormones And Atherosclerosis E. I. Sokolov,1994-01-01 The increase of emotional stress has disturbing effects on the neurohumoral regulation of metabolic processes especially in relation to the cardiovascular system and increases the changes of organisms developing atherosclerosis This book studies the effects on the cardiovascular system in IHD patients caused by emotions of diverse biological qualities both positive and negative At the same time the relationship between these effects on the functional activity of various hormonal systems and the blood coagulation system are studied in order to determine the mechanisms and development of atherosclerotic processes *Obesity and Diabetes Mellitus* E. I.

Sokolov,2020-08-14 This book is the result of the study of metabolic and hormonal disorders in patients suffering obesity and diabetes mellitus focusing on mechanisms of formation of atherosclerotic changes in the myocardium and vessels in diabetes mellitus patient *Hearings, Reports and Prints of the Senate Select Committee on Nutrition and Human Needs* United

Relationships, and Health Carol D. Ryff Professor of Psychology University of Wisconsin-Madison,Burton Singer Office of Population Research Princeton University,2001-05-03 A growing literature in humans and animals documents linkages between social integration and affiliative relationships and a variety of health and disease outcomes including mortality The actual mechanisms through which these efforts occur are however not well understood Emotion likely plays a central role in mediating connections between relational experiences underlying neurobiological processes and health outcomes Many prior studies have focused on the size and proximity of social networks thereby neglecting their emotional features When studied emotion in social relationships has also been heavily weighted on the side of negative and conflicting interactions thus giving minimal attention to the possible protective benefits of enduring love nurturing and affection This volume brings together for the first time these differing lines of inquiry to advance understanding of how emotion in significant social relationships influences health The collection integrates knowledge from those with expertise in mapping the nature of emotional experience in human relations with those who are linking social ties to health outcomes and those who explicate underlying neurobiological mechanisms A main message of the book is that full explication of how emotion social relationships and health are woven together demands multidisciplinary inquiry To this end the volume brings together leading experts from fields of affective science clinical and social psychology epidemiology psychiatry psychoneuroimmunology psychoneuroendocrinology and health to promote the above synthesis Some address how to formulate observe and evaluate social interactions in clinical laboratory or daily life contexts Others link emotional experience in significant social relationships to health outcomes or intervening biological parameters Still others manipulate social environments or

exposure to health challenge to assess impact on respiratory infections and immune function Collectively each contributes different pieces to the larger puzzle that connects emotion in social relationships to health Recurrent themes include the importance of attending to 1 both positive and negative emotional experience in significant social relationships and how they influence underlying mechanisms 2 cumulative emotional experience namely the repeated chronic nature of socioemotional experience both positive and negative 3 gender differences in how emotion in social relationships is experienced and how it effects underlying mechanisms involved in health outcomes and 4 the need for multiple methodologies to advance the emotion social relationships and health agenda

Emotion, Social Relationships, and Health Carol D. Ryff, Burton H. Singer, 2001-05-03 This volume brings together for the first time inquiries into the size and proximity of social networks and emotion in social relationships to advance understanding of how emotion in significant social relationships influences health The collection integrates knowledge from those with expertise in mapping the nature of emotional experience in human relations with those who are linking social ties to health outcomes and those who explicate underlying neurobiological mechanisms The book puts forth the idea that full explication of how emotion social relationships and health are woven together demands multidisciplinary inquiry and brings together leading experts from fields of affective science clinical and social psychology epidemiology psychiatry psychoneuroimmunology psychoneuroendocrinology and health to promote the above synthesis

The New Feminine Brain Mona Lisa Schulz, 2013-07-16 Ever wonder why most women can handle the kids and careers and the renovation but men can concentrate on either the newspaper or a game on TV This is because female brains have more interconnections that allow them to multi task and split their attention The New Feminine Brain is the first book by a medical doctor who is also a psychiatrist and a brain expert to show how modern life challenges are physically rewiring the brain and to address the particular challenges that women face as a result The female brain today is not your grandmother s brain it has even more connections and skills but with that can come more physical problems including an increase in attention and memory deficits and chronic mood and health conditions The New Feminine Brain combines the insights of Dr Schulz s research and stories of clinical experience as a neuropsychiatrist treating people with tough brain disorders with unique self help and expert health advice Readers will discover and cultivate their special genius and intuitive style with provocative self tests so they can hear and heal their depression anxiety attention memory and other brain problems Rewiring exercises herbs and nutritional supplements will improve their physical psychological and emotional health
