GIS and Geocomputation for Water Resource Science and Engineering Barnali Dixon,Venkatesh Uddameri,2015-11-30

GIS and Geocomputation for Water Resource Science and Engineering not only provides a comprehensive introduction to the fundamentals of geographic information systems but also demonstrates how GIS and mathematical models can be integrated to develop spatial decision support systems to support water resources planning management and engineering The book uses a hands on active learning approach to introduce fundamental concepts and numerous case studies are provided to reinforce learning and demonstrate practical aspects The benefits and challenges of using GIS in environmental and water resources fields are clearly tackled in this book demonstrating how these technologies can be used to harness increasingly available digital data to develop spatially oriented sustainable solutions In addition to providing a strong grounding on fundamentals the book also demonstrates how GIS can be combined with traditional physics based and statistical models as well as information theoretic tools like neural networks and fuzzy set theory

**GIS and GeoComputation** Peter Atkinson,2000-03-30 Geographic Information Systems are computer based systems for geographic analysis They have been developed over the past twenty five years and are now widely used A recent research direction has been the development of geocomputation representing computer based geographical analysis beyond the traditional bounds of GIS In geocomputation the computer is the research environment itself not merely a tool A key to geocomputation it that highly powered computing can be used with sufficient data to avoid traditional parametric approaches altogether The term geocomputation includes the use of computer based techniques such as artificial neural networks genetic programming and fuzzy logic but in a geographical context This new book in the prestigious Innovations in GIS series presents the latest research in geocomputational techniques as presented in the GIS UK Annual Conference
