Glencoe And Beyond:

Glencoe and Beyond Iain S. MacDonald, 2005 This perceptive and informative study examines all these aspects and shows ultimately that chiefs tacksmen clansmen and even southern sheep farmers were all individuals reacting to the circumstances in which they found themselves and that these circumstances themselves were characterised by a great deal of economic turbulence It has been widely accepted in the past that sheep farming in the Highlands was developed and undertaken by southern incomers some modern historians have even dismissed the possibility that Highlanders could have become sheep farmers because they lacked the necessary skill and capital Ian S MacDonald s meticulous research disproves this and illustrates that in the late eighteenth and early nineteenth centuries that while some southern sheep farmers did indeed move into the Highlands they were in fact greatly outnumbered by native Highlanders who saw a future in sheep farming initiated it themselves and *Beyond the Market* Jens Beckert, 2009-01-10 *Beyond the Market* launches a sociological investigation into economic efficiency Prevailing economic theory which explains efficiency using formalized rational choice models often simplifies human behavior to the point of distortion Jens Beckert finds such theory to be particularly weak in explaining such crucial forms of economic behavior as cooperation innovation and action under conditions of uncertainty phenomena he identifies as the proper starting point for a sociology of economic action Beckert levels an enlightened critique at neoclassical economics arguing that understanding efficiency requires looking well beyond the market to the social cultural political and cognitive factors that influence the coordination of economic action Beckert searches social theory for the components of an alternative theory of action one that accounts for the social embedding of economic behavior In Durkheim and Parsons he finds especially useful approaches to cooperation in Luhmann a way to understand how people act under highly contingent conditions and in Giddens an understanding of creative action and innovation Together these provide building blocks for a research program that will yield a theoretically sophisticated understanding of how economic processes are coordinated and the ways that markets are embedded in social cultural and cognitive structures Containing one of the most fully informed critiques of the neoclassical analysis of economic efficiency as well as one of the most thoughtful blueprints for economic sociology this book reclaims for sociology the study of one of the most important arenas of human action *Beyond Yiddishkeit* Frida K. Furman, 2012-02-01 *Beyond Yiddishkeit* deals in an intelligent and perceptive way with the issue of Jewish identity in an affluent and highly educated suburban community Particularly significant is that it relies upon participant observation as well as ethnographic interview techniques and data on the part of the author In this way the work constitutes the first major study of this type conducted within the liberal Jewish American community As such it is a pioneering work Equally impressive is the author s command of the sociological literature on issues of identity and her ability to apply it to the data gathered in this study She makes sociological jargon intelligible and presents an easily read and well constructed book Her ability throughout the work to focus on issues of modernity is insightful and brilliant I found myself

racing through the book and indeed read it in one sitting This really is an unparalleled work in this field David Ellenson

 minorities have existed in some form in all human societies Throughout history such elites have evoked varied responses
 respect hostility fear envy imitation but never indifference While certain elite groups have been of only passing historical
 importance strategic elites whose members are national and international leaders today are ultimately responsible for the
 realization of social goals and for the continuity of the social order in a swiftly changing world This volume which first
 appeared in 1963 marked a major advance in our theoretical understanding of these elites why they are needed how they
 operate and what effect they have on society Drawing upon the work of such classical writers as Saint Simon Marx Durkheim
 Mosca Pareto and Michels and such modern scholars as Mannheim Lasswell Aron Mills and Parsons the author presents a
 challenging theory of elites that provides the framework for her examination of their co-existence their social origins and
 their rise and decline The elites discussed here include political diplomatic economic and military as well as scientific
 cultural and religious ones Systematically the author surveys available empirical data concerning American society and
 selected materials on Great Britain Germany the Soviet Union and the developing nations of Asia and Africa Written with
 clarity and distinction *Beyond the Ruling Class* remains a thorough and provocative treatment rich in empirical insights of a
 subject that will compel the attention of political scientists sociologists and historians concerned with themes of power
 influence and leadership in national and international life Her new introduction to *Beyond the Ruling Class* is at once an
 appraisal of the current status of elite studies and a careful self-evaluation of her efforts **Lynching Beyond Dixie**
 Michael J. Pfeifer, 2013-02-27 In recent decades scholars have explored much of the history of mob violence in the American
 South especially in the years after Reconstruction However the lynching violence that occurred in American regions outside
 the South where hundreds of persons including Hispanics whites African Americans Native Americans and Asian Americans
 died at the hands of lynch mobs has received less attention This collection of essays by prominent and rising scholars fills this
 gap by illuminating the factors that distinguished lynching in the West the Midwest and the Mid-Atlantic The volume adds to
 a more comprehensive history of American lynching and will be of interest to all readers interested in the history of violence
 across the varied regions of the United States Contributors are Jack S Blocker Jr Brent M S Campney William D Carrigan

 represents a critical yet constructive reappraisal of the role and the limits of the boundaries that define and separate
 disciplines and subfields in the social sciences as well as the boundaries that divide distinct research traditions or paradigms
 in the analysis of international life It provides an integrative and eclectic examination of the virtues of a more flexible division
 of labor a division that facilitates more meaningful communication among scholars of different methodological persuasions

investigating similar problems in international life Part One addresses concrete issues in international studies ranging from international bargaining and interdependence to conceptions of collective identity The essays therein serve as creative models for integrating concepts and analytic logics from different theoretical frameworks rooted in different disciplines Part Two shifts the focus to more wide ranging questions in the philosophy of the social sciences and the organization of social science research in order to shed new light on the value and validity of boundaries currently drawn between different schools sects disciplines and subfields Contributors include Tadashi Anno Jean Marc F Blanchard Anne L Clunan Eileen M Doherty Wade L Huntley Timothy W Luke Norrin M Ripsman and Rudra Sil

Boundary Objects and Beyond Geoffrey C. Bowker, Stefan Timmermans, Adele E. Clarke, Ellen Balka, 2016-02-26 The multifaceted work of the late Susan Leigh Star is explored through a selection of her writings and essays by friends and colleagues Susan Leigh Star 1954-2010 was one of the most influential science studies scholars of the last several decades In her work Star highlighted the messy practices of discovering science asking hard questions about the marginalizing as well as the liberating powers of science and technology In the landmark work *Sorting Things Out* Star and Geoffrey Bowker revealed the social and ethical histories that are deeply embedded in classification systems Star's most celebrated concept was the notion of boundary objects representational forms things or theories that can be shared between different communities with each holding its own understanding of the representation Unfortunately Leigh was unable to complete a work on the poetics of infrastructure that further developed the full range of her work This volume collects articles by Star that set out some of her thinking on boundary objects marginality and infrastructure together with essays by friends and colleagues from a range of disciplines from philosophy of science to organization science that testify to the wide ranging influence of Star's work Contributors Ellen Balka Eevi E Beck Dick Boland Geoffrey C Bowker Janet Ceja Alcal Adele E Clarke Les Gasser James R Griesemer Gail Hornstein John Leslie King Cheris Kramarae Maria Puig de la Bellacasa Karen Ruhleder Kjeld Schmidt Brian Cantwell Smith Susan Leigh Star Anselm L Strauss Jane Summerton Stefan Timmermans Helen Verran Nina Wakeford Jutta Weber *Beyond the Science Wars* Ullica Christina Olofsdotter Segerstråle, Ullica Segerstråle, 2000-08-03 Contextualizes the Science Wars from interdisciplinary sociological historical scientific political and cultural perspectives **Beyond the Atlantic Roar** Donald Fraser Campbell, Douglas F.
