Institutions, Interaction and Social Theory Will Gibson,Dirk vom Lehn,2016-01-01 From hospitals and prisons to schools and corporations no matter how large or seemingly abstract all institutions are ultimately the result of the actions and interactions of people In this original and innovative text Gibson and Vom Lehn show the different ways in which studying people s own meaning making practices can help us understand the role of institutions in contemporary society *Institutions Interaction and Social Theory* takes the reader through the core conceptual foundations of Symbolic Interactionism Ethnomethodology and Conversation Analysis Engaging with a rich tradition in sociological thought it suggests that interactionist perspectives have remained largely absent in the study of institutions and how they contrast with and contribute to the broader field of research in institutional contexts With chapters on healthcare education markets and art and culture this text will be of interest to those studying institutions organisations and work in sociology and in business schools It will also be valuable for students of social theory interested in interactionism and in the challenges and opportunities of connecting complex theoretical discussions to real world examples *Resources in Education* ,1994-10
