*Tributary Voices* Paul A. Formisano, 2022-04-26 The Colorado River is in crisis Persistent drought climate change and growing demands from ongoing urbanization threaten this life source that provides water to more than forty million people in the U S and Mexico Coupled with these challenges are our nation s deeply rooted beliefs about the region as a frontier garden and wilderness that have created competing agendas about the river as something to both exploit and preserve Over the last century and a half citizens and experts looked to law public policy and science to solve worsening water problems Yet today s circumstances demand additional perspectives to foster a

more sustainable relationship with the river Through literary rhetorical and historical analysis of some of the Colorado River's lesser known stakeholders Tributary Voices considers a more comprehensive approach to river management on the eve of the one hundredth anniversary of the signing of the Colorado River Compact which governs the allocation of water rights to the seven states in the region Ranging from the early twentieth century to the present Tributary Voices examines nature writing women's narratives critiques of dam development the Latina o communities appeals for river restoration American Indian authors and tribal nations claims of water sovereignty and teachings about environmental stewardship and provident living This innovative study models an interdisciplinary approach to water governance and reinvigorates our imagination in achieving a more sustainable water ethic Late Cenozoic Evaporite Tectonism and Volcanism in West-central Colorado Robert M.
