Glimpse Of Chinas Rural Reform:

A Glimpse of China's Rural Reform Yaowu Li, Changhe Liu, 1989 *Old China's New Economy* T K Bhaumik, 2009-01-06

This book presents a comprehensive analysis of the rise and growth of the Chinese economy since the beginning of the country's transition to a socialist market economy and captures the growth story in its historical backdrop. It sequentially unveils the story and highlights the critical role of two major change agents: the government and the people. While the credit goes to the former for the successful transition to a high growth economy, there is an equally important role played by the Chinese people displayed by their hard work, tenacity, and struggle for a better living standard. The book provides a complete account of this transition from the pre-revolution feudalistic China to where it stands today as a viable market economy. It analyses the key drivers of high growth and has delved into the much debated and discussed issue of sustainability. The author has analysed in detail numerous challenges that high growth has thrown up for the people and the government. It is argued that China is likely to see its high growth continuing for many years to come after having already secured a high pedestal in the global economy. This book will prove valuable insight for China observers, political economists, business analysts, serious media, and students and teachers of development economics.

China's Long March Toward a Market Economy Jinglian Wu, 2005. International interest in China is increasing. Not surprisingly, China-related news is hitting the headlines of leading international media. This is well grounded given the fact that China is the largest developing country in the world with almost a quarter of the world's population. However, many reports on China are self-contradictory, which again reveals the complexities of a nation that has experienced dramatic change for over a century. For the outsider, it is virtually impossible to follow China's overriding trends of change without understanding its past and present. This book provides a chronological record of the major changes that have taken place in the Chinese economy over the past five decades.

Contemporary Chinese Rural Reform Xiang Wu, 2015-12-30. This book offers an eyewitness account of China's twenty years of rural reform. It records the successive changes in different types of China's rural economic systems from rural cooperatives to the people's communes to the household responsibility system. It demonstrates that as the starting point of rural reform, the household contract management played an unexpected role in promoting the acceleration of China's modernization process. Further, the book presents a systematic explanation for the cause and results of the reforms without which it would be impossible to fully comprehend the rise of China over the last three decades.

Glimpses of China's Economic Reform John E. Roemer, 1988 **Paradoxes of Post-Mao Rural Reform** Frederick C. Teiwes, Warren Sun, 2015-12-22. The decollectivization of Chinese agriculture in the early post-Mao period is widely recognized as a critical part of the overall reform program. But the political process leading to this outcome is poorly understood. A number of approaches have dominated the existing literature: 1) a power policy struggle between Hua Guofeng's alleged neo-Maoists and Deng Xiaoping's reform coalition; 2) the power of the peasants; and 3) the leading role of provincial reformers. The first has no

validity while second and third must be viewed through more complex lenses This study provides a new interpretation challenging conventional wisdom Its key finding is that a game changer emerged in spring 1980 at the time Deng replaced Hua as CCP leader but the significant change in policy was not a product of any clash between these two leaders Instead Deng endorsed Zhao Ziyang s policy initiative that shifted emphasis away from Hua s pro peasant policy of increased resources to the countryside to a pro state policy that reduced the rural burden on national coffers To replace the financial resources policy measures including household farming were implemented with considerable provincial variations The major unexpected production increases in 1982 confirmed the arrival of decollectivization as the template on the ground The dynamics of this policy change has never been adequately explained Paradoxes of Post Mao Rural Reform offers a deep empirical study of critical developments involving politics from the highest levels in Beijing to China s villages and in the process challenges many broader accepted interpretations of the politics of reform It is essential reading for students and scholars of contemporary Chinese political history
