Adams,2020 Death studies have over the last

twenty years witnessed a flourishing of research and scholarship particularly in areas such as dying and bereavement cultural practices and fear of dying But despite its importance a specific focus on the nature of personal mortality has attracted surprisingly little attention This book breaks new ground by bringing together available ideas and research on the meaning of one's own death Its content is organized around the question of how an ongoing relationship might be possible when the threat of consciousness coming to an end points to an unthinkable and unspeakable nothingness The book then argues that despite this threat an ongoing relationship with one's own death is still possible by means of conceptual devices that help shape personal mortality into a relatable object Four of these devices or enabling frames are examined essential structures passionate suffusion point of transition and self generative process While each frame conceptualizes mortality differently they share a capacity to move it from unintelligibility to something we can think and speak about thereby enabling us to maintain an ongoing engagement The final chapters explore ways in which pursuing a relationship with our own deaths could become a normal and acceptable activity throughout our lives

Is There Life After Death? David Lester, 2014-09-17 People have believed in the existence of life after death throughout human history and in all regions of the world Mere belief however does not make it true What is the empirical evidence for life after death Has any significant research been conducted and if so what conclusions does it suggest In fact there exists a large body of research on topics relevant to the question of life after death This book objectively examines that research drawing together the observations of social science regarding such phenomena as reincarnation near death experiences deathbed visions cases of possession by dead spirits and apparitions of the deceased It considers possibilities including survival of consciousness and survival of personality and reflects on the logical problems inherent in any model of postmortem survival An extensive bibliography lists hundreds of studies of life after death phenomena

The Secrets of Immortality Prof. Dr. Ernst von Schwarz, 2023-08-01 In view of progressive research advances in biotechnology and medicine the prospect of living longer increased longevity increased health span and even biologic immortality has become more real than ever before The Secrets of Immortality evaluates humankind's continuous quest for immortality an integral part of human nature With hundreds of millions of dollars being spent on anti aging and immortality research some futurists believe that within a few decades man will be able to live up to 150 years if not more

Some believe that the first person to live up to 1000 years old is already alive today While this sounds like a premise from science fiction The Secrets of Immortality describes the current state of biotechnology and medical research data and the possibilities of anti aging and natural or biologic immortality within the near future Prof Dr Ernst von Schwarz wrote The Secrets of Immortality from a theological point of view examining everlasting life from the perspective of different religions with a main emphasis on the Roman Catholic tradition Dr Schwarz is a physician transplant cardiologist and researcher but he is also a theologian offering a unique perspective to longevity and immortality *The Fate of the Dead* Richard Bauckham,2014-04-09 These studies focus on personal eschatology in the Jewish and early Christian apocalypses The apocalyptic tradition from its Jewish origins until the early middle ages is studied as a continuous literary tradition in which both continuity of motifs and important changes in understanding of life after death can be charted As well as better known apocalypses major and often pioneering attention is given to those neglected apocalypses which portray human destiny after death in detail such as the Apocalypse of Peter the Apocalypse of the Seven Heavens the later apocalypses of Ezra and the four apocalypses of the Virgin Mary Relationships with Greco Roman eschatology are explored Several chapters show how specific New Testament texts are illuminated by close knowledge of this tradition of ideas and images of the hereafter
