Global Boundaries:

Geographic and Global Issues Quarterly, 1993 **Resilience, Development and Global Change** Katrina

Brown, 2015-12-14 Resilience is currently infusing policy debates and public discourses widely promoted as a normative goal in fields as diverse as the economy national security personal development and well being Resilience thinking provides a framework for understanding dynamics of complex inter connected social ecological and economic systems The book critically analyzes the multiple meanings and applications of resilience ideas in contemporary society and to suggests where how and why resilience might cause us to re think global change and development and how this new approach might be operationalized The book shows how current policy discourses on resilience promote business as usual rather than radical responses to change But it argues that resilience can help understand and respond to the challenges of the contemporary age These challenges are characterized by high uncertainty globalized and interconnected systems increasing disparities and limited choices Resilience thinking can overturn orthodox approaches to international development dominated by modernization aid dependency and a focus on economic growth and to global environmental change characterized by technocratic approaches market environmentalism and commoditization of ecosystem services Resilience Development and Global Change presents a sophisticated theoretically informed synthesis of resilience thinking across disciplines It applies resilience ideas specifically to international development and relates resilience to core theories in development and shows how a radical resilience based approach to development might transform responses to climate change to the dilemmas of managing forests and ecosystems and to rural and urban poverty in the developing world The book provides fresh perspectives for scholars of international development environmental studies and geography and add new dimensions for those studying broader fields of ecology and society

Research Handbook on Law, Governance and Planetary

Boundaries Duncan French, Louis J. Kotzé, 2021-04-30 This comprehensive Research Handbook is the first study to link law and Earth system science through the epistemic lens of the planetary boundaries framework It critically examines the legal and governance aspects of the framework considering not only each planetary boundary but also a range of systemic issues including the ability of law to keep us within the planetary boundaries safe operating space

The Routledge Handbook of Global Development Kearnin Sims, Nicola

Banks, Susan Engel, Paul Hodge, Jonathan Makuwira, Naohiro Nakamura, Jonathan Rigg, Albert Salamanca, Pichamon

Yeophantong, 2022-01-31 This Handbook provides a comprehensive analysis of some of the world's most pressing global development challenges including how they may be better understood and addressed through innovative practices and approaches to learning and teaching Featuring 61 contributions from leading and emerging academics and practitioners this multidisciplinary volume is organized into five thematic parts exploring changes in global development financing ideologies

norms and partnerships interrelationships between development natural environments and inequality shifts in critical development challenges and new possibilities for positive change Collectively the handbook demonstrates that global development challenges are becoming increasingly complex and multi faceted and are to be found in the Global North as much as the South It draws attention to structural inequality and disadvantage alongside possibilities for positive change The Handbook will serve as a valuable resource for students and scholars across multiple disciplines including Development Studies Anthropology Geography Global Studies Indigenous and Postcolonial Studies Political Science and Urban Studies The Introduction of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Global Sustainability & Human Prosperity Thomas Elmqvist,Sarah Cornell,Marcus C Öhman,Tim Daw,Fredrik Moberg,Albert Norström,Åsa Persson,Garry Peterson,Johan Rockström,Maria Schultz,Elrika Hermansson Török,Victor Galaz,Claudia Ituarte-Lima,2014-05-15 The development of a Post 2015 agenda and Sustainable Development Goals SDGs provide a global window of opportunity to address both social needs and environmental challenges together This discussion paper by the Stockholm Resilience Centre looks into the links between human wellbeing and the biosphere and describes why and how these links should influence the formulation of the new SDGs It explores what we can learn from the MDGs and how existing international agreements can be reflected in the Post 2015 MDG process The paper also seeks to contribute to the elaboration of targets including process oriented targets and scalable indicators suitable for a rapidly changing world **Effective Conservation Science** Peter Kareiva,Michelle Marvier,Brian Silliman,2017-10-06 This novel text assembles some of the most intriguing voices in modern conservation biology Collectively they highlight many of the most challenging questions being asked in conservation science today each of which will benefit from new experiments new data and new analyses The book s principal aim is to inspire readers to tackle these uncomfortable issues head on A second goal is to be reflective and consider how the field has reacted to challenges to orthodoxy and to what extent have or can these challenges advance conservation science Furthermore several chapters discuss how to guard against confirmation bias The overall goal is that this book will lead to greater conservation of ecosystems and biodiversity by harnessing the engine of constructive scientific scepticism in service of better results The Lens of Ecological Law Carla Sbert,2020-04-24 Containing an in depth study of the emerging theory and core of ecological law this book insightfully proposes a lens of ecological law through which the disparity between current laws and ecological law can be assessed The lens consists of three principles ecocentrism ecological primacy and ecological justice These principles are used within the book to explore and analyse the challenges and opportunities related to the transition to ecological law and to examine three key mining case studies *Environmental Footprints* Kai Fang,2020-10-19 This book focuses on environmental footprints that have attracted considerable interest and discussion within academia policy makers and the public as a tool to assess anthropogenic effects on the environment It begins with an overview which

provides a starting point for understanding the concept of environmental footprints On the basis of a thorough investigation into the theoretical and methodological aspects of selected environmental footprints that have been widely adopted a unified framework for structuring categorizing and integrating various footprint indicators is established Furthermore the book brings clarity to the relationship between footprint analysis and life cycle assessment and challenges the isolation of environmental footprints and planetary boundaries The findings provide novel insights into the development of environmental footprints for environmental impact assessment and environmental sustainability assessment

Ecological Law and the Planetary Crisis Geoffrey Garver, 2020-10-29 This book uses a transdisciplinary systems approach to examine how Earth's human caused ecological crisis arose and presents a new legal approach for overcoming it Ecological Law and the Planetary Crisis first examines how the history of humanity's social metabolism along with the history of human inventions and ideas led to the human Earth dilemma we see today and explains why contemporary law is inadequate for confronting this dilemma The book goes on to propose ecological law that maintains human activity within ecological limits such as planetary boundaries while ensuring social justice and equity as an essential element of an urgently needed radical pathway of change toward a perpetual mutually enhancing human Earth relationship Finally it offers a systems based analytical tool for organizing actions to promote the transition from environmental to ecological law Increasing the visibility clarity and development of ecological law this book will be of great interest to students and scholars of ecological and environmental law and governance

Provisional Cities Renata Tysczuk, 2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re position architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities

Konisky, Sherilyn Macgregor, John M. Meyer, Anthony R. Zito, 2022-03-30 This book explores the dominant framings and paradigms of environmental politics the relationship between academic analysis and environmental politics and reflects on the first thirty years of the journal Environmental Politics The book has two purposes The first is to identify and discuss the key themes that have driven scholarship in the field of environmental politics over the last three decades and to highlight how this has also led to oversights and silences and the marginalisation of important forms of analysis and thought As several chapters in the book explore problem solving frameworks have increasingly taken away space from more radical systemic challenge and critique as the key themes of environmental politics have become ever more central to the field of politics as a whole and as our understandings of social and environmental crisis become ever clearer and more urgent The second purpose of the volume is to map out a series of new and developing agendas for environmental politics The chapters in this volume focus foremost on questions of justice materiality and power Discussing state violence multispecies justice epistemic injustice the circular economy NGOs parties green transition and urban climate governance they call above all for greater attention to intersectionality and interdisciplinarity and for centering key insights about power relations and socio economic inequalities into increasingly widespread yet also often depoliticised topics in the study of environmental politics The chapters in this book were originally published as a special issue of Environmental Politics

Companion to Environmental Studies Noel Castree, Mike Hulme, James D. Proctor, 2018-05-01 Companion to Environmental Studies presents a comprehensive and interdisciplinary overview of the key issues debates concepts approaches and questions that together define environmental studies today The intellectually wide ranging volume covers approaches in environmental science all the way through to humanistic and post natural perspectives on the biophysical world Though many academic disciplines have incorporated studying the environment as part of their curriculum only in recent years has it become central to the social sciences and humanities rather than mainly the geosciences The environment is now a keyword in everything from fisheries science to international relations to philosophical ethics to cultural studies The Companion brings these subject areas and their distinctive perspectives and contributions together in one accessible volume Over 150 short chapters written by leading international experts provide concise authoritative and easy to use summaries of all the major and emerging topics dominating the field while the seven part introductions situate and provide context for section entries A gateway to deeper understanding is provided via further reading and links to online resources Companion to Environmental Studies offers an essential one stop reference to university students academics policy makers and others keenly interested in the environmental question the answer to which will define the coming century

Fragile World William T. Cavanaugh, 2018-05-22 In Fragile World Ecology and the Church scholars and activists from Christian communities as far flung as Honduras the Philippines Colombia and Kenya present a global angle on the global ecological crisis in both its material and spiritual senses and offer Catholic resources for responding to it This volume explores the deep

interconnections for better and for worse between the global North and the global South and analyzes the relationship among the physical environment human society culture theology and economics the integral ecology described by Pope Francis in Laudato Si Integral ecology demands that we think deeply about humans and the physical environment but also about the God who both created the world and sustains it in being At its root the ecological crisis is a theological crisis not only in the way that humans regard creation and their place in it but in the way that humans think about God For Pope Francis in Laudato Si the root of the crisis is that we humans have tried to put ourselves in God s place According to Pope Francis therefore A fragile world entrusted by God to human care challenges us to devise intelligent ways of directing developing and limiting our power
