Governance of the Global and Extra-Terrestrial Commons Michael Roe, 2023-06-26 This book provides a unique analysis of the complex relationship between governance and the global commons It has a specific reference to the dynamic and growing outer space economy and society and how experience in the maritime sector which exhibits many of the same issues and challenges as outer space can be useful in suggesting moves forward in policy making and design This book fills a large gap in the literature of both governance and the development of outer space Whilst the maritime sector has a long history of debate albeit little in terms of governance and policy making outer space has much less and what there has been commonly focused upon technical considerations The importance of this book is that the failures of maritime governance need to be avoided in the outer space sector which exhibits many of the same issues particularly those related to the global commons Innovative and exciting this book will be of interest to academics studying corporate governance business management and space capitalism

governance **The Making of International Environmental Treaties** Gerry Nagtzaam, 2009 Gerry Nagtzaam contends that in recent decades neoliberal institutionalist scholarship on global environmental regimes has burgeoned as has constructivist scholarship on the key role played by norms in international politics In this innovative volume the author sets these interest and norm based approaches against each other in order to test their ability to illustrate why and how different environmental norms take hold in some regimes and not others The book explores why some global environmental treaties seek to preserve and protect some parts of nature from human utilization some seek to conserve certain parts of nature for human development whilst others allow the reckless exploitation of nature without accounting for the consequences It tracks the fate of these three underlying environmental norms preservation conservation and exploitation using case studies on whaling mining in Antarctica and tropical timber The book illustrates how international political battles to shape environmental regimes inevitably result in clashes between these competing environmental norms This unique study will prove a fascinating read for both academics and practitioners in the fields of international environmental politics and international environmental law *Routledge Handbook of Global Environmental Politics* Paul G. Harris, 2013-10-15 This handbook provides a comprehensive and authoritative survey of Global Environmental Politics It brings together leading international academic experts and features 40 chapters that Describe the history of global environmental politics as a discipline and explain the various theories and perspectives used by scholars and students to understand it Examine the key actors and institutions in global environmental politics explaining the role of states international organizations regimes international law foreign policy institutions domestic politics corporations and transnational actors Address the ideas and themes shaping the practice and study of global environmental politics including sustainability consumption expertise uncertainty security diplomacy North South relations globalisation justice ethics participation and citizenship Assess the key issues and policies within global environmental politics including energy climate change ozone depletion air pollution acid rain sustainable transport persistent organic pollutants hazardous wastes water rivers wetlands oceans fisheries marine mammals biodiversity migratory species natural heritage forests desertification food and agriculture With an in depth new preface by the Editor this edition of the handbook is an invaluable resource for students scholars researchers and practitioners of environmental politics environmental studies environmental science geography international relations and political science Environment and Citizenship Mark J. Smith, Doctor Piya Pangsapa, 2013-07-04 Citizenship and the environment are hotly debated as climate change places more responsibility on individuals and institutions in shaping policy Using new evidence and cases from across the globe Environment and Citizenship explores the new vocabulary of ecological citizenship and examines how successful environmental policy making depends on the responsible actions of citizens and civil society organizations as much as on governments and international treaties This accessible and thought provoking book provides a comprehensive and timely guide to the debates on environmental and ecological citizenship expertly combining

examples of practice with theory examines how environmental movements have become increasingly involved in governance processes at the local national regional and intergovernmental levels explores the increasing importance of corporations and transnational networks through examples of stakeholding processes and participatory research in environmental decision making calls on researchers policy makers and activists to face a new challenge how to effectively link environmental justice with social justice Breaking new ground Smith and Pangsapa address how environmental responsibility operates through politics ethics culture and the everyday experiences of ctivists as well as how awareness of environmental and social injustice only leads to responsible actions and strategic change through civic engagement

Crafting Trade and Investment Accords for Sustainable Development Marie-Claire Cordonier Segger,2021-06-17 International economic law guides and shapes globalization and the future of the world economy our human societies and the Earth The rules which facilitate trade and investment could defend the interests of Hermes Greek god of commerce and thieves or learn to draw inspiration from Athena goddess of justice wisdom and crafts This volume explores how trade and investment agreements could promote more sustainable development rather than increasing the negative social and environmental impacts of economic growth States and other actors are attempting to integrate social and environmental considerations into trade and investment policies towards more sustainable development Analysing their efforts this volume offers insights into the ways that commitments to sustainability are being operationalized in the texts of economic treaties themselves Written by a renowned expert jurist and professor of law this book examines the measures being debated in the WTO and adopted by States in a selection of innovative and flexible regional and bilateral trade and investment accords With legal examples spanning decades of experimentation and experience the book illuminates how States and stakeholders are seeking innovative ways to integrate environmental and social considerations into trade and investment agreements Introducing a ground breaking systematic approach the volume considers how through this integration international trade and investment law can contribute to the achievement of the world s Sustainable Development Goals

O'connor, 2006 **The Environment and International Relations** Kate O'Neill, 2009-01-22 This textbook enables students to apply the theory and approach of International Relations to environmental challenges facing a complex international political system **Uncommoning, Difference and Politics** Antonio Augusto Rossotto Ioris, 2024-12-30 The book presents a reinterpretation of the meaning and practices of uncommoning It provides a critical reflection on the frontiers of the modern world where uncommoning is often the key driving force underpinning a deceitful democracy and an exclusionary socio economy Uncommoning is a socio spatial process of othering grabbing and reordering that particularly impacts indigenous peoples This book revisits classical contemporary and decolonial literature as well as documents reports and archival data to analyse the Paraguayan case of uncommoning It examines how these processes have deep roots in the shortcomings of Western thinking including religious juridical and moral doctrines The book also demonstrates that Europe has major responsibilities and cannot be removed from the search for responses and alternatives After a detailed theoretical elaboration informed primarily by Hegel's socio spatial sensibilities the book empirically analyses the worldless production of Paraguay as a country with a fragile sovereignty and whose development is more than anything else highly subtractive The text will be of interest to scholars and researchers in development indigenous studies decolonisation human geography agribusiness South American studies as well as policy makers in international development agencies and NGOs The Business of Global Environmental Governance David L. Levy, Peter John Newell, 2005 Theoretical and empirical accounts of the role of business in shaping international environmental policies **Special Bibliography Series**, 1957

Sustainability: Sustainability indicators Michael Redclift, 2005 Introducing the reader to sustainability as a concept a contested idea and a political goal this book brings together a range of articles and published papers that have influenced the course of thinking in social science It examines the links between the natural and social sciences as well as the public policies **International Regimes in China** Gianluca Ferraro, 2013-07-24 According to the Food and Agriculture Organization FAO of the United Nations more than 80% of world's fish stocks are fully exploited over exploited depleted or recovering from depletion Although several international agreements have promoted more responsible fisheries coastal

states have usually maintained national policies that enable higher harvest levels rather than greater conservation of fish stocks and international agreements for more responsible fisheries have generally experienced a weak domestic implementation. Among the major coastal fishing states, China constitutes the largest fish producer and main exporter in the world and therefore presents a fascinating case study for the domestic implementation of international fisheries agreements. This book investigates the degree to which China has complied with the international agreements it has signed and asks why it is failing to meet expectations. Crucially, it calls for greater emphasis on the political rather than technical issues involved in the implementation of international regimes. In turn, it examines how understanding the case of China can help us to develop solutions for improved international compliance in the future. Providing an improved understanding of the implementation of international regimes alongside an in-depth study of China's political system, policy making and compliance, this book will be of great interest to students and scholars of Chinese studies, international relations, public policy and international law and environmental studies. It will also be useful for policy makers working in the fields of environmental regulation and fisheries management.
