Drugs for the Control of Epilepsy Carl L. Faingold, Gerhard H. Fromm,2019-06-04 Originally published in 1991 This book brings together the ideas of an international group of experts on clinical and experimental epilepsy These authors consider how antiepileptic drugs may act on elements of neuronal networks to reduce seizure incidence and severity The book addresses such topics as the four general classes of anticonvulsant drug mechanisms major epilepsy models the proposed mechanisms of action of major antiepileptic drugs and the clinical use of antiepileptic drugs in the treatment of various forms of human epilepsy This volume is special for its focus on the neuronal network approach to epilepsy as well as for its comprehensive review and integration of human and animal data Neurologists pharmacologists psychiatrists and other investigators actively working on epilepsy research will find this book to be a useful thought provoking reference volume

Epilepsy in Our World Steven C. Schachter, Lisa Francesca Andermann,2008 In the last 5 years approximately 2 7 million people have been treated for epilepsy and between 0 5% 2% of people will develop epilepsy during their lifetime Up to 5% of the worldwide population may have a single seizure in their lifetime It is further estimated that 60 million people in the World have had at least one epileptic seizure in their lifetime Most shockingly is that between 70 80K people each year in the US alone are diagnosed with epilepsy Because of these figures and Dr Schachter s roll as Director of the Comprehensive Epilepsy Center Dr Schachter sought to create a series of books written from the viewpoint of people with Epilepsy This volume Epilepsy in Our World presents accounts of seizures by patients from 20 different countries Not only are the patient stories presented with the series signature frankness and honesty but the volume also discusses the different impressions and treatment of epilepsy around the world

Global excellence in ethnopharmacology: Africa Hellen Oketch-Rabah, David R. Katerere, Fawzi Mohamad Mahomoodally,2025-07-31 The practice of traditional medicine in Africa African Traditional Medicine ATM has a long history dating back thousands of years and has resulted in a wealth of therapeutic agents from plants and animals used in the treatment diseases Most of the associated knowledge about these medicines has been passed down from generation to generation via oral folklore However as a result of westernization and globalization and the loss of natural habitats and biodiversity as well as the loss of oral traditions the empirical knowledge associated with medicinal substances is at a risk of being lost forever A great deal of related research has been done and published in academic doctorate and master s theses most of which are available only as hard copies at the respective universities in herbal texts and journals Most of these works have not been published and made available to the international community It is well acknowledged that the origin of many drugs can be traced back to natural sources for example artemisinin ephedrine tubocurarine digoxin reserpine Some popular herbal medicines have their origin in African plants for example Umckaloabo EPs 7630 a standardized proprietary extract of *Perlagonium sidoides* used in some

over the counter medicines for upper respiratory infections Other African plants have also offered medicines and or healthcare products and pharmacologically active compounds e g *Prunus africana* bark extracts for the management for prostate and lower urinary tract symptoms LUTS yohimbe from *Pausinystalia johimbe* or Bitter Aloe or Cape Aloes *Aloe ferox* This Research Topic is intended to highlight primary research on pharmacological and biological effects of plants fungi animals microorganisms and minerals used in African traditional medicine for humans and livestock We welcome articles on the documentation of indigenous knowledge on medicines and medical practices the pharmacology and pharmacognosy of indigenous African medicines and the search for pharmacologically active principles of traditional African medicines Review articles covering the study areas delineated above should reflect the multi disciplinary nature of ethnopharmacology The sub topics to be covered within this Research Topic include but are not limited to the following Pharmacological and biological effects of organisms plants fungi animals microorganisms and minerals used in African traditional medicine Indigenous knowledge on medicines medical practices ethnoveterinary food and cosmetic uses Pharmacology and or pharmacognosy of indigenous African medicines The search for pharmacologically active principles of traditional African medicines antivirals antibacterial antifungal Clinical trials using formulations based on ATM Commercialization and R D utilizing African bioresources All the manuscripts submitted to the collection will need to fully comply with the Four Pillars of Best Practice in Ethnopharmacology you can freely download the full version here We also expect that the MS follow the standards established in the ConPhyMP statement Front Pharmacol 13 953205
