**Defending the Society of States** Jason Ralph, 2007-05-31 This book is among the first to address the issues raised by the International Criminal Court ICC from an International Relations perspective By clearly outlining a theoretical framework to interpret these issues Ralph makes a significant contribution to the English School s study of international society More specifically he offers a concise definition of world society and thus helps to resolve a longstanding problem in international theory This groundbreaking conceptual work is supported by an in depth empirical analysis of American opposition to the ICC Ralph goes beyond the familiar arguments related to national interests and argues that the Court has exposed the extent to which American notions of accountability are tied to the nation state Where other democracies are willing to renegotiate their social contract because they see themselves as part of world society the US protects its particular contract with the people because it offers a means of distinguishing America and its democracy from the rest of the world This sovereigntist or more accurately Americanist influence is further illustrated in chapters on the sources of law universal jurisdiction transatlantic relations and US policy on international humanitarian law in the war on terror The book concludes by evoking E H Carr s criticism of those great powers who claim that a harmony exists between their particular interests and those of wider society It also recalls his argument that great powers sometimes need to

compromise and in this context Ralph argues that support for the ICC is a more effective means of fulfilling America's purpose and a less costly sacrifice than that demanded by the Americanist policy of nation building

**Negotiating sovereignty and human rights** Sibylle Scheipers, 2013-07-19 Negotiating sovereignty and human rights takes the transatlantic conflict over the International Criminal Court as a lens for an enquiry into the normative foundations of international society The author shows how the way in which actors refer to core norms of

the international society such as sovereignty and human rights affect the process and outcome of international negotiations. The book offers an innovative take on the long standing debate over sovereignty and human rights in international relations. It goes beyond the simple and sometimes ideological duality of sovereignty versus human rights by showing that sovereignty and human rights are not competing principles in international relations as is often argued but complement each other. The way in which the two norms and their relationship are understood lies at the core of actors' broader visions of world order. The author shows how competing interpretations of sovereignty and human rights and the different visions of world order that they imply fed into the transatlantic debate over the ICC and transformed this debate into a conflict over the normative foundations of international society.

Theorising International Society C. Navari, 2008-12-19. This volume outlines the methods appropriate to an English School understanding of international relations and their assumptions about how knowledge of the social is gained. It makes clear what is involved in an English School approach and what such an approach delivers in the contemporary understanding of international relations.

*The Future of War* Lawrence Freedman, 2017-10-10. An award winning military historian, professor and political adviser delivers the definitive story of warfare in all its guises and applications, showing what has driven and continues to drive this uniquely human form of political violence. Questions about the future of war are a regular feature of political debate, strategic analysis and popular fiction. Where should we look for new dangers? What cunning plans might an aggressor have in mind? What are the best forms of defense? How might peace be preserved or conflict resolved? From the French rout at Sedan in 1870 to the relentless contemporary insurgencies in Iraq and Afghanistan, Lawrence Freedman, a world renowned military thinker, reveals how most claims from the military futurists are wrong. But they remain influential nonetheless. Freedman shows how those who have imagined future war have often had an idealized notion of it as confined, brief and decisive and have regularly taken insufficient account of the possibility of long wars, hence the stubborn persistence of the idea of a knockout blow, whether through a dashing land offensive, nuclear first strike or cyberattack. He also notes the lack of attention paid to civil wars until the West began to intervene in them during the 1990s and how the boundaries between peace and war, between the military, the civilian and the criminal are becoming increasingly blurred. Freedman's account of a century and a half of warfare and the often misconceived thinking that precedes war is a challenge to hawks and doves alike and puts current strategic thinking into a bracing historical perspective.

Civilization And Governance: The Western And Non-western World Boy Luethje, 2022-11-08. The rapid rise of emerging economies has produced deep ranging changes in the global order during recent decades. At the beginning of the twenty first century the bipolar confrontation of the Cold War seemed to be replaced by a universalized model of political liberalism and economic neo liberalism. In recent years however, rising nationalism and protectionism indicate the end of unfettered globalization, a looming crisis of liberal democracy and a return to ideologies of systemic competition, especially vis a vis China. Against this background, this volume takes a fresh look at the evolution of governance models in Western and non

Western civilizations Africa India China and the Muslim world in particular These models have been largely self contained and without intensive interaction for a long time In the wake of globalization systems ideologies and political values have become part of global discourse eventually turning into what Samuel Huntington called a clash of civilizations The chapters in this volume offer perspectives on the diversity of civilizations of governance as a base for a new multilateralism in the global context The contributions explore relevant theoretical concepts of transnational governance law and multiple modernity The empirical focus is on analyzing different governance systems in non Western civilizations and Europe including national states and transnational institutions traditions and networks The volume assembles papers presented at the 2019 International Conference of the Institute of Public Policy at South China University of Technology in Guangzhou China The contributions and the introductory framework have been updated to reflect the unexpected and unprecedented challenges from the coronavirus pandemic and the related economic and social crises
