

The background of the slide is a detailed botanical illustration in a sepia or light brown tone. It features various types of plants, including large, broad leaves, some with prominent veins, and several clusters of small, round fruits or seed pods hanging from stems. The style is reminiscent of 19th-century scientific illustrations.

**Global Biopiracy** Ikechi Mgbeoji, 2006 Biopiracy raises serious issues pertaining to the conservation of biological diversity and genetic resources in agriculture the integrity of plant life forms a just international economic order and development Since the emergence of the biotechnology industry biopiracy has become a lightning rod for activists from the Introduction The appropriation of plants and traditional knowledge by corporations and other entities is often called biopiracy Such practices arise from a cultural milieu that systematically marginalizes non Western forms of knowledge which are devalued as folk knowledge or characterized as inferior Global Biopiracy rethinks the role of international law and legal concepts global patent systems and international agricultural research institutions as they affect legal ownership and control of plants and the knowledge that makes them valuable Ikechi Mgbeoji first examines the Western assumptions and biases that inform the patent system international law and institutions affecting farmers around the globe He next analyzes the cultural and economic traits that divide the industrialized world and the developing world Finally Mgbeoji confronts the phenomenal loss of human cultures and plant diversity that has already occurred and that will continue in the future unless protective measures are implemented and enforced International Law and Indigenous Knowledge Chidi Oguamanam, 2006-01-01 Discusses the suitability of mainstream forms of intellectual property rights to indigenous knowledge and efforts to reconcile the Western concept of intellectual property with indigenous knowledge Laws and Societies in Global Contexts Eve Darian-Smith, 2013-01-31 This text promotes a more global sociolegal perspective that engages with multiple laws and societies and diverse sociolegal systems based on very different historical and cultural traditions interacting on multiple local national and global levels The approach to global legal pluralism seeks to provide a framework for envisioning new global governance regimes that move beyond state based solutions to deal with trenchant transnational challenges **Law and Society Series** Dale Brawn, 2014-01-01 Using the judiciary of Manitoba as a model Paths to the Bench examines the political nature of Canada's judicial appointment process and suggests that ability alone seldom determined who went to the bench In fact many of Manitoba's early judges spent little time actually practising law since professional merit was not a criterion for judicial appointments Rather it was relationships with influential mentors and communities that ensured appointments and ultimately propelled careers Brawn offers an in depth analysis of how the paths to the bench of competent and connected and less competent and connected lawyers differed This book is one of the few studies to examine why many of the best and brightest members of the bar either did not want to go to the bench or if they did why they did not get there Laws and Societies in the Canadian Prairie West, 1670-1940 Louis A. Knafla, Jonathan Swainger, 2011-11-01 Laws and Societies in the Canadian Prairie West 1670 1940 examines the legal history of the north west frontier from the earliest years of European Native contact in the seventeenth century to the mid 1900s Challenging myths about a peaceful west and prairie exceptionalism the book explores the substance of prairie legal history and the

degree to which the region's mentality is rooted in the historical experience of distinctive prairie peoples. The chapters written by a cross section of established and emerging scholars working in the allied fields of law, legal history, sociology, and criminology focus on what is distinctive in prairie legal culture. By approaching the issue from a variety of perspectives—those of colonial administrators, fur company employees, Native peoples, women, men, entrepreneurs, judges, magistrates, and the police, among others—the authors find evidence of a conscious effort to apply broad, non-regional experiences to seemingly familiar local issues. The ways in which prairie peoples perceived themselves and their relationships to a wider world were directly framed by notions of law and legal remedy shaped by the course and themes of prairie history. Legal history is not just about black letter law. It is also deeply concerned with the ways in which people affect and are affected by the law in their daily lives. By examining how central and important the law has been to individuals, communities, and societies in the Canadian Prairies, this book makes an original contribution.

**Intellectual Property in Global Governance** Chidi Oguamanam, 2013-03-01. Intellectual Property in Global Governance critically examines the evolution of international intellectual property law making from the build up to the TRIPS Agreement through the TRIPS and post TRIPS era. The book focuses on a number of thematic intellectual property issue linkages, exploring the formal and informal institutional interactions and multi-stakeholder intrigues implicated in the global governance of intellectual property. Using examples from bio-technology, bio-diversity, bio-prospecting, and bio-piracy, it investigates the shift or concentration in the focus of innovation from physical to life sciences and the ensuing changes in international intellectual property law making and their implications for intellectual property jurisprudence. It examines the character of the reception, resistance, and various nuanced reactions to the changes brought about by the TRIPS Agreement, exploring the various institutional sites and patterns of such responses, as well as the escalation in the issue linkages associated with the concept and impact of intellectual property law. Drawing upon multiple methodological approaches including law and legal theory, regime theory, globalization, and global governance, Chidi Oguamanam explores the intellectual property dynamics in the Global Knowledge Economy, focusing on digitization and information revolution, phenomenon, and the concept of a post-industrial society. The book articulates an agenda for global governance of intellectual property law in the 21st century and speculates on the future of intellectual property in North-South relations.

**Biotraffic** Christopher Morris, 2024-10-15. Biotraffic explores the complex world of biological resource trade. It takes readers inside the contemporary Ciskei region of South Africa, a once notorious apartheid homeland turned extractive hub for wild medicinal plants. Drawing from in-depth ethnographic and archival research, Christopher Morris examines the region's trade in *Pelargonium sidoides*, a plant once contested as a tuberculosis treatment in early twentieth-century Europe and now an internationally marketed remedy for the common cold. The story of this trade links past and present, encapsulating a larger tale about colonial legacies and their intersection with global environmental governance ambitions. It also teems with a diverse cast of actors from plant harvesters and pharmaceutical

companies to activist NGOs and the chiefs who have become business partners with multinational drug firms The book's analysis extends beyond considering merely the extraction and commercialization of plant resources and offers a critical examination of how demand for therapeutics intertwines with broader struggles over land and political power in South Africa Biotraffic illuminates how a distance defying trade is reshaping the sociopolitical landscape of a region a region grappling with apartheid's afterlives and the challenges of environmental and economic justice

**The Environmental Rights Revolution** David R. Boyd, 2011-11-29 The right to a healthy environment is the subject of extensive philosophical debates that revolve around a key question Should rights to clean air water and soil be entrenched in law This pioneering book answers this by moving beyond theoretical debate to measure the practical effects of enshrining the right in constitutions David Boyd analyzes 193 constitutions and the laws and court decisions of more than 100 nations in Europe Latin America Asia and Africa He reveals that nations with constitutional protections have stronger environmental laws enhanced enforcement greater government accountability and better access to justice information and public participation in decision making than nations without such provisions As a result they demonstrate superior environmental performance and have smaller ecological footprints Boyd not only demonstrates that constitutionalizing environmental protection has the power to make sustainability a priority he tells inspiring stories about the difference the right to a healthy environment is making in people's lives

Intellectual Property and Biotechnology Matthew Rimmer, 2008-01-01 Dr Rimmer's book is a marvellous introduction to a crucial topic of our time. He writes engagingly provocatively and always with good humour. A highly technical and complex area of law has been reduced to clear descriptions and searching analysis. Truly this is an important book on an essential topic that will help define the ethics of a future that includes nothing less than the future of our species. From the foreword by the Hon Justice Michael Kirby AC CMG the High Court of Australia the author has done an excellent job by explaining the subject in an open and accessible manner. This book is a timely and very thought provoking analysis of patent law and biotechnology. The book is a unique theoretical contribution to the controversial public debate over commercialization of biological inventions; there is an extensive bibliography, a valuable resource for further reading. The book will be of prime interest to lawyers and patent attorneys, scientists and researchers, business managers and technology transfer specialists. *Journal of Intellectual Property Rights* Rimmer's book is highly recommended for anyone interested in the issues and debate related to biological inventions regardless of which side the reader is on. Stefan M Miller *Journal of Commercial Biotechnology* this book gives an excellent account of the most celebrated biotechnology cases from three continents and for this alone is to be thoroughly recommended. David Rogers *European Intellectual Property Review* Rimmer has put a great deal of thought and effort into this series of chapters. For those looking at how to reform direct and develop laws in relation to biotechnology this book is brimming with ideas, suggestions and recommendations of what to do next. Rebecca Halford Harrison *Chartered Institute of Patent Attorneys* an excellent introduction to a wide range of legal thinking in an increasingly controversial and relevant area to humankind. Sharon Givoni *Australian Intellectual Property Law Bulletin* Rimmer's new book is a timely and very thought provoking analysis of patent law and biotechnology and asks a very serious question: can a 19th century patent system adequately deal with a 21st century industry? Kate McDonald *Australian Life Scientist* This book documents and evaluates the dramatic expansion of intellectual property law to accommodate various forms of biotechnology from micro organisms, plants and animals to human genes and stem cells. It makes a unique theoretical contribution to the controversial public debate over the commercialization of biological inventions. The author also considers the contradictions between the Supreme Court of Canada rulings in respect of the Harvard oncomouse and genetically modified canola. He explores law, policy and practice in both Australia and New Zealand in respect of gene patents and non coding DNA. This study charts the rebellion against the European Union Biotechnology Directive particularly in respect of Myriad Genetics BRCA1 and BRCA2 patents and stem cell patent applications. The book also considers whether patent law will accommodate frontier technologies such as bioinformatics, haplotype mapping, proteomics, pharmacogenomics and nanotechnology. *Intellectual Property and Biotechnology* will be of prime interest to lawyers and patent attorneys, scientists and researchers, business managers and technology transfer specialists.
